TROUBLESHOOTING

Here are solutions to common issues you might encounter:

Common Issues and Solutions

- **Bed feels wobbly or unstable:** This is typically caused by loose hardware. Re-tighten all bolts and screws, ensuring they are snug but not overtightened. Ensure the bed is on a level surface.
- **Squeaking noises:** Squeaking often indicates loose connections. Identify the source of the squeak and tighten the corresponding hardware. Applying a small amount of furniture wax or lubricant to joints can also help.
- **Parts arrived damaged or scratched:** If you received damaged or scratched parts, do not proceed with assembly. Contact Flieks customer service immediately for assistance and replacement parts.
