TROUBLESHOOTING

If you encounter any issues with your INFANS Pack and Play, refer to the following common solutions:

- **Playard Not Locking Properly:** Ensure the center of the playard floor is not pushed down before attempting to lock the side rails. All four side rails must be pulled up firmly until they click into place. If a rail does not lock, lift the center of the floor slightly and try again.
- **Difficulty Folding:** Ensure all accessories (bassinet, changing table, mobile) are removed. The side rails must be unlocked before the center of the playard floor can be lifted and folded. Refer to the setup section for the correct folding sequence.
- **Mobile/Hanging Toys Detaching:** Regularly check the attachment points of the mobile and hanging toys to ensure they are securely fastened. If parts are damaged or frequently detaching, discontinue use of those specific accessories and contact customer support.
- **Rocking Mechanism Issues:** Ensure the rocking bars are correctly installed and secured. If they frequently detach, verify they are fully engaged in their designated slots.

If the problem persists, please contact INFANS customer support for further assistance.
