

## PawHut D06-110V01BK

# PawHut D06-110V01BK Extra Wide Pet Gate with Cat Door Instruction Manual

Brand: PawHut | Model: D06-110V01BK

## 1. SAFETY INFORMATION

Please read and follow all instructions carefully before installation and use. Keep these instructions for future reference.

- This gate is designed for pets and toddlers. Ensure proper installation to prevent injury.
- Always check that the gate is securely closed and locked before leaving children or pets unattended.
- Do not use this gate at the top of stairs without proper wall cups and secure mounting.
- Regularly inspect the gate for any loose parts, damage, or wear. Discontinue use if any damage is found.
- Never allow children to climb on or play with the gate.
- The small cat door is intended for pets only. Do not allow children to use the cat door.

## 2. PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Main Gate Frame with Cat Door
- Adjusting Screws (4)
- Round Double-Sided Tapes (4)
- Wall Cups (4)
- Screws (for optional wall mounting)
- Wrench (1)

# AUTOMATICALLY CLOSE DOOR

 Designed to open both direction

  $> 90^\circ$ : Remain Open

  $< 90^\circ$ : Auto Close

## 3. SETUP AND INSTALLATION

This gate features a pressure-fit design, requiring no drilling for most installations. Always measure your opening before installation to ensure proper fit.

### 3.1 Measure Your Opening

Measure the width of the doorway, hallway, or stair opening where you intend to install the gate. This gate is designed for openings between 29.1 inches and 31.5 inches (74-80 cm).

# SMALL DOOR

Designed for cats to pass through easily

Image: Product dimensions for the PawHut Pet Gate, indicating the adjustable width and overall height.

## 3.2 Pressure Mounting

1. **Prepare Wall Cups:** Attach the round double-sided tapes to the back of the four wall cups. These will help secure the wall cups to your surface.
2. **Position the Gate:** Place the gate in the desired opening. It is normal for the door lock to have a large gap before installation.
3. **Install Adjusting Screws:** Insert the four adjusting screws into the corners of the gate frame.
4. **Tighten Screws:** Begin to tighten the adjusting screws by hand, ensuring the gate is centered and level. Gradually tighten all four screws evenly.
5. **Secure Wall Cups:** Once the gate is snug, press the wall cups firmly against the wall or door frame. Continue tightening the adjusting screws using the provided wrench until the gap in the door lock mechanism is reduced to 2-3 mm (0.078 inches). This ensures proper tension and secure installation.
6. **Final Check:** Test the gate by pushing and pulling it to ensure it is firmly in place and does not move. The door should open and close smoothly.

## 4. OPERATING INSTRUCTIONS

### 4.1 Opening and Closing the Main Gate

The gate features a double-locking system for enhanced security and an automatic closing mechanism.

- **To Open:** Slide two buttons simultaneously and lift the gate handle. This allows for one-hand operation, convenient when carrying a child or other items.
- **Automatic Close:** When the door opening angle is less than 90 degrees, the gate will automatically swing shut and lock when released.

- **Stay Open Feature:** If the gate is opened beyond 90 degrees (and the angle is not less than 15 degrees from fully open), it will remain open for extended convenience.

# DOUBLE-LOCKING SYSTEM

## One-Hand Operation

Slide both ends together and then lift

## Bottom Locking Block

Enhances the stability

Image: Visual explanation of the automatic closing and stay-open features based on the gate's opening angle.

## 4.2 Using the Cat Door

The integrated cat door allows smaller pets to pass through freely while keeping larger pets contained.

- The cat door can be opened or closed by sliding the small latch located at the top of the cat door.
- Ensure the cat door is securely latched if you wish to prevent smaller pets from passing through.

# ADJUSTABLE WIDTH

Features 4 adjustable screws and mounting accessories,  
fit the opening **74 to 80 cm**

Please measure your opening before purchasing

## 5. MAINTENANCE

To maintain the appearance and functionality of your PawHut Pet Gate:

- Wipe with a dry cloth to clean. Avoid abrasive cleaners or harsh chemicals.
- Regularly check all screws and connections to ensure they remain tight and secure.
- Inspect the gate for any signs of rust, damage, or wear, especially on moving parts.

## 6. TROUBLESHOOTING

- **Gate feels loose after installation:** Ensure all four adjusting screws are tightened evenly and firmly against the wall or door frame. The gap in the door lock mechanism should be reduced to

2-3 mm.

- **Gate does not close automatically:** Check that the gate is installed level and that the adjusting screws are tightened correctly. The auto-close feature activates when the gate is opened less than 90 degrees.
- **Gate is difficult to open/close:** If the gate is too tight, slightly loosen the adjusting screws until it operates smoothly while remaining secure.

## 7. SPECIFICATIONS

<b>Brand</b>	PawHut
