## HOMCOM 830-574V00GN

# HOMCOM 9 Foot Pine Snow Flocked Artificial Christmas Tree

Model: 830-574V00GN

## 1. SAFETY INFORMATION

Please read and understand all instructions before assembly and use. Keep this manual for future reference.

- This artificial Christmas tree is designed for indoor use only.
- Keep the tree away from open flames, heat sources, and direct sunlight to prevent damage and fire hazards. The tree is flame-retardant, but direct exposure to heat should be avoided.
- Ensure the tree stand is placed on a flat, stable surface to prevent tipping.
- Do not overload branches with heavy ornaments, as this may cause damage or instability.
- Keep small children and pets away from the tree during assembly and decoration to prevent accidents.
- This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm (Proposition 65 warning).

## 2. PACKAGE CONTENTS

Verify that all components are present before beginning assembly.

- Tree Sections (4 pieces)
- Tree Stand (1 piece)

The HOMCOM artificial Christmas tree is packaged in a single cardboard box for convenient transport and storage.

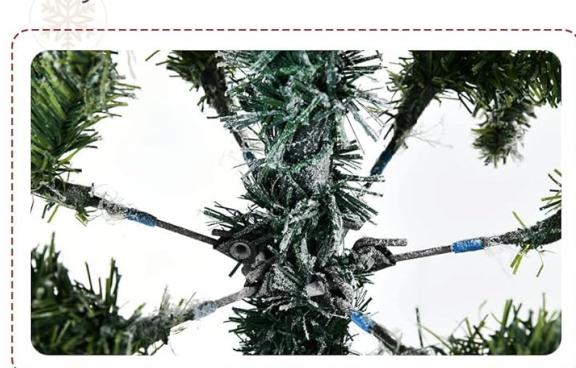

### 3. ASSEMBLY INSTRUCTIONS

Follow these steps to assemble your artificial Christmas tree:

- Assemble the Stand:** Unfold the tree stand and ensure it is stable. Tighten any screws or bolts on the stand to secure it.
- Insert the Bottom Section:** Insert the largest tree section (bottom section) into the assembled stand. Ensure it is firmly seated and upright.
- Attach Middle Sections:** Continue by inserting the subsequent tree sections, from largest to smallest, into the section below it. The branches feature an 'auto open' design, meaning they will fall into place as you connect the sections.
- Insert Top Section:** Place the smallest tree section (top section) into the final opening.
- Shape the Branches (Fluffing):** Once all sections are connected, begin shaping the branches. This tree has 2068 branch tips. Gently spread out each individual tip, working from the inside out and bottom to top, to create a full and realistic appearance. This process typically takes 45-60 minutes. The branches are flexible and can be adjusted to your desired position.

## AUTOMATIC OPEN

Branches are pre-attached to center poles and drop automatically for easy assembly

Saving fluffing time

Sectioned Design

Detachable Base

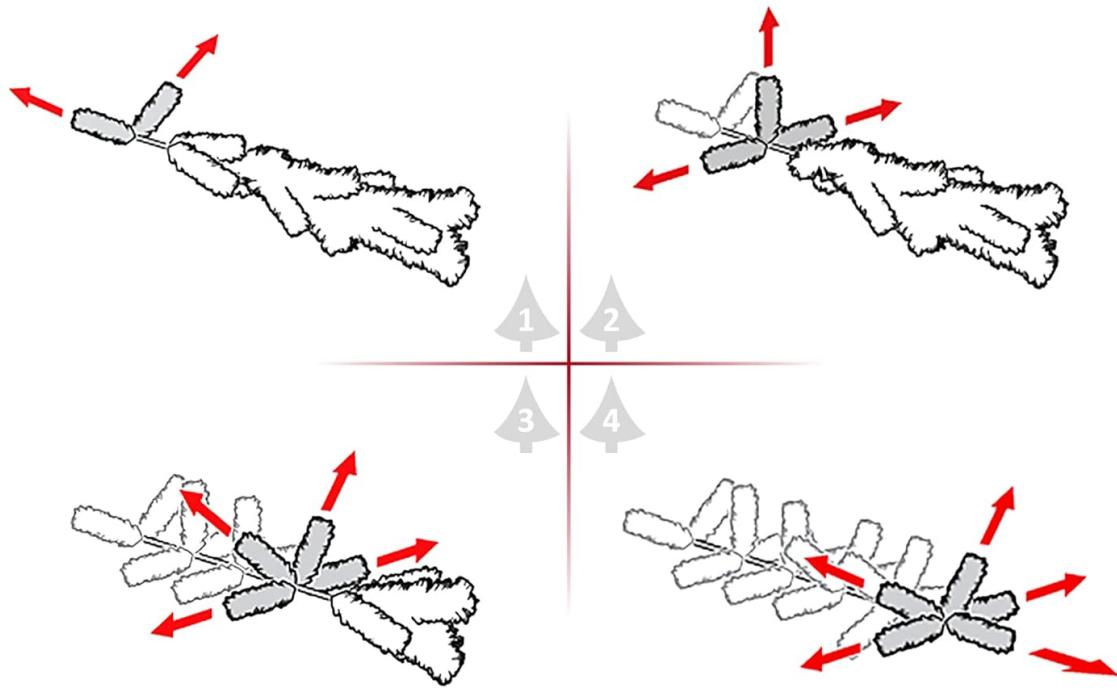

Foldable Base

The tree features an automatic open design for branches and a sectioned structure for easy assembly. The stand is detachable and foldable for convenience.

# TO GET A FULL LOOK

Time for shaping the tree: 45-60 minutes

Please spread out all individual tips for its most lush and full form

Detailed guide on how to spread out individual branch tips to achieve the tree's fullest form. Allow 45-60 minutes for thorough shaping.

## 4. MAINTENANCE AND CARE

Proper care will ensure the longevity and appearance of your artificial Christmas tree.

- Cleaning:** Dust the tree periodically with a soft, dry cloth or a feather duster. For more thorough cleaning, a damp cloth can be used on non-flocked areas. Avoid excessive moisture on flocked areas.
- Flocking:** The snow flocking may shed a small amount over time, especially during initial setup and handling. This is normal and does not affect the overall appearance significantly.
- Storage:** Before storing, ensure the tree is completely dry. Disassemble the tree by reversing the assembly steps. Store the sections in the original slim cardboard box or a dedicated tree storage bag in a cool, dry place away from direct sunlight and extreme temperatures.

## 5. TROUBLESHOOTING

- Tree Not Looking Full:** If the tree does not appear as full as expected, dedicate more time to 'fluffing' the branches. Ensure each individual tip is spread out and positioned to fill any gaps.
- Flocking Shedding:** A small amount of flocking shedding is normal, particularly during the first

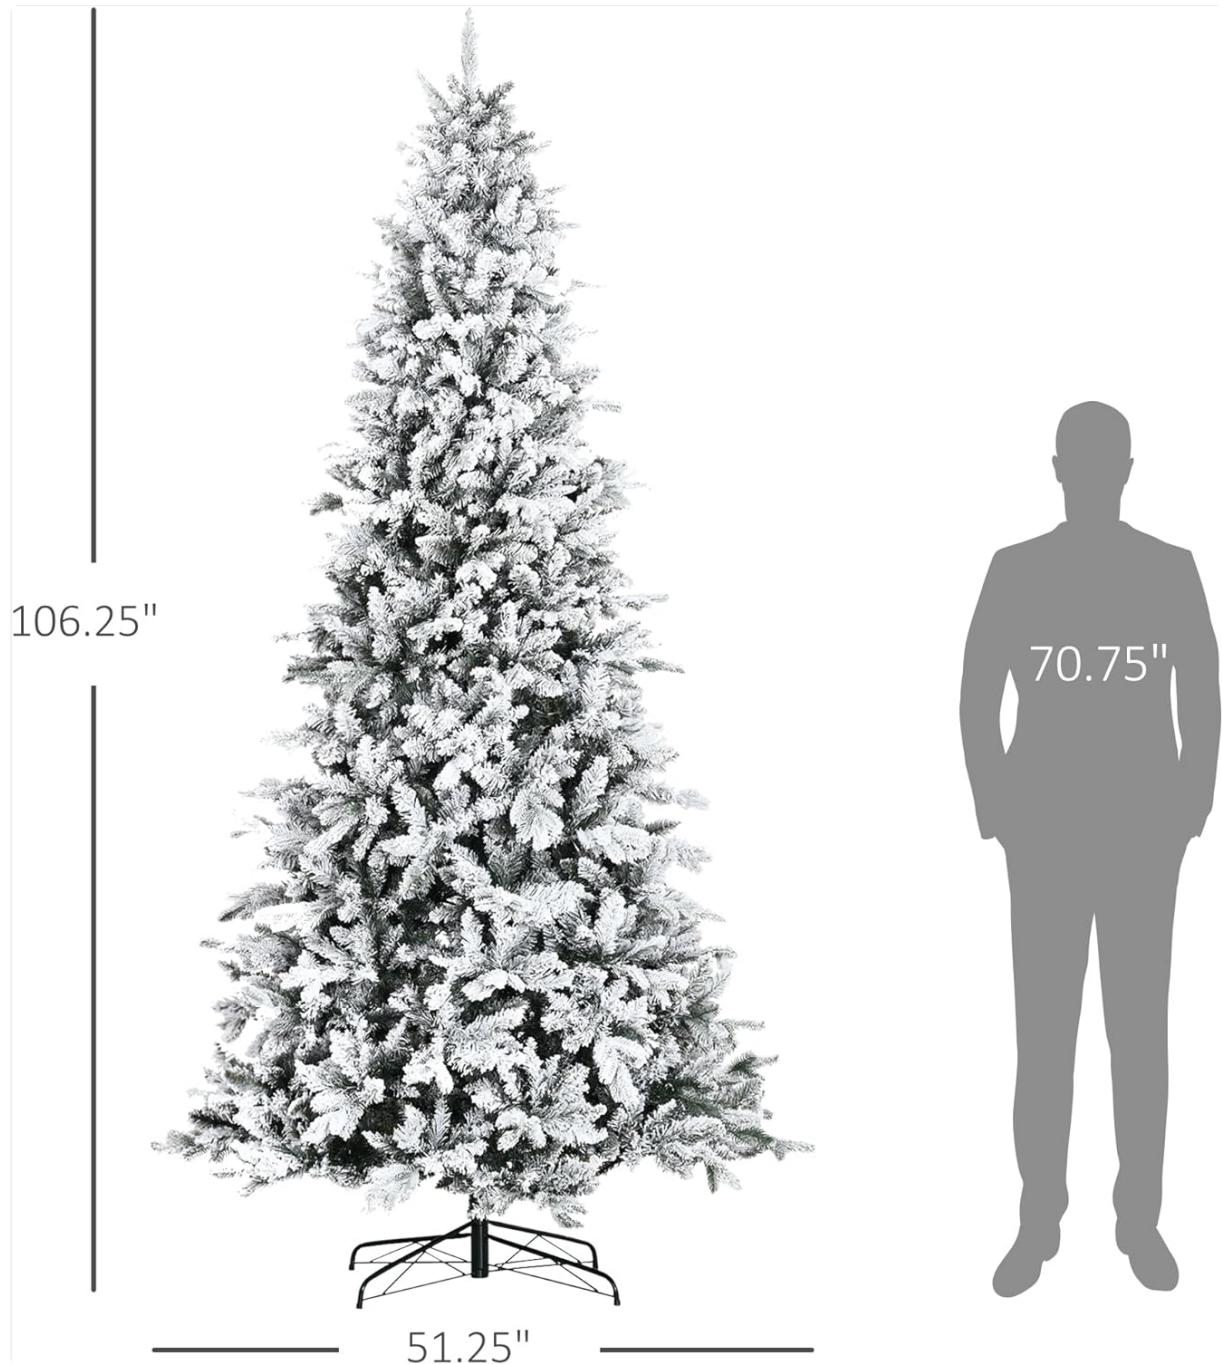

assembly. This will decrease over time. Clean up any fallen flocking with a vacuum cleaner.

- **Unstable Tree:** Ensure the tree stand is fully extended and tightened. Check that each tree section is securely inserted into the section below it. Place the tree on a level surface.

## 6. SPECIFICATIONS
