Maintenance

Proper care will ensure the longevity and optimal performance of your shower panel.

- **Cleaning:** Clean the surface of the shower panel regularly with a soft cloth and mild soap or a non-abrasive bathroom cleaner. Rinse thoroughly with water and dry with a soft cloth to prevent water spots.
- **Anti-Limescale Nozzles:** The silicone nozzles on the shower head and massage jets are designed to resist limescale buildup. If deposits occur, gently rub the nozzles with your finger to dislodge them.
- **Avoid Harsh Chemicals:** Do not use abrasive sponges, scouring pads, or cleaners containing ammonia, bleach, or strong acids, as these can damage the brushed chrome finish and internal components.
