### OPERATING INSTRUCTIONS

Once installed, the Subsonic Pro Gamer Pack accessories are designed to be used seamlessly with your PS5 controller.

- **Joystick Grips:** Provide enhanced grip and comfort, reducing slippage during intense gameplay. Precision grips offer finer control for aiming, while control grips provide optimal tactile feedback.
- **Comfort/Quickfire Triggers:** These extensions allow for a more comfortable finger position and can reduce the travel distance of the L2/R2 buttons, potentially increasing response speed in games requiring rapid trigger presses.
- **L1/R1 Trigger Extensions:** Improve the ergonomics of the L1/R1 buttons, making them easier to reach and press during gameplay.

- **Precision Aiming Foams:** Increase the resistance of the analog sticks, allowing for more precise and controlled movements, particularly beneficial for aiming in first-person shooter (FPS) games.

## MAINTENANCE

---

To ensure the longevity and performance of your Subsonic Pro Gamer Pack accessories, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe down the accessories. For stubborn dirt, a slightly damp cloth with mild soap can be used, followed by thorough drying. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** When not in use, store the accessories in a clean, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically check the accessories for any signs of wear or damage. Replace any worn-out components to maintain optimal performance.

## TROUBLESHOOTING

---

If you encounter any issues with your Subsonic Pro Gamer Pack, refer to the following common solutions:

Problem	Possible Cause	Solution
Joystick grips slide off or rotate easily.	Improper installation or wear.	Ensure grips are fully stretched and seated correctly. If worn, consider replacing them.
Quickfire triggers interfere with button press.	Incorrect alignment or incompatibility.	Re-align the trigger extensions carefully. Ensure they are designed for the PS5 controller. If the issue persists, remove the extensions.
Analog stick movement feels restricted with aiming foams.	Foam is too thick or improperly placed.	Ensure the foam is correctly positioned around the base of the stick. If still too restrictive, try the lighter resistance foam or remove it.
