ASSEMBLY INSTRUCTIONS

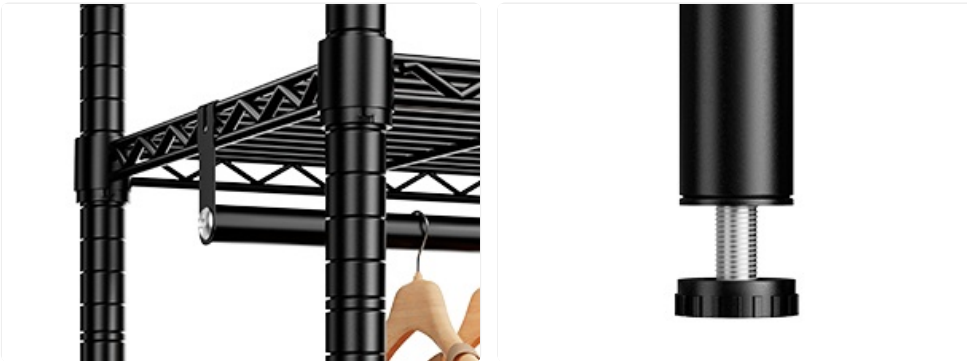

The Raybee Clothes Rack is designed for tool-free assembly. Follow these steps for quick and easy setup:

- 1. Unpack Components:** Carefully remove all parts from the packaging. Verify that all components listed in the parts list are present.
- 2. Install Wheels/Adjustable Feet:** Decide whether to use the movable wheels or the adjustable feet. Screw the chosen components into the bottom of the vertical poles. If using wheels, ensure the two lockable wheels are placed on one side for stability.
- 3. Assemble Lower Poles:** Connect the lower sections of the vertical poles. Ensure they are securely fitted.
- 4. Attach Clips:** Place the plastic clips onto the vertical poles at your desired shelf heights. Ensure the clips are positioned correctly, underneath the grooves, to support the shelves securely. You should hear a "click" when they are perfectly locked.

5. **Install Shelves:** Slide the wire shelves down over the clips until they rest firmly. Apply gentle pressure to ensure they are level and stable.
6. **Connect Upper Poles:** Attach the upper sections of the vertical poles to the lower sections.
7. **Install Remaining Shelves and Hanging Rods:** Repeat the clip and shelf installation process for the upper shelves. Attach the hanging rods to the designated clips on the vertical poles. These rods are detachable, allowing for customization.
8. **Final Adjustments:** Once fully assembled, ensure all connections are tight and the rack is stable. If using adjustable feet, fine-tune them to level the rack on uneven floors. Attach anti-tip straps to a wall if desired for added security.

USAGE AND CONFIGURATION

The Raybee Clothes Rack offers flexible usage options to maximize your storage space:

- **Adjustable Shelves:** The wire shelves can be positioned at various heights along the vertical poles to accommodate items of different sizes, from folded garments to storage bins.
- **Detachable Hanging Rods:** The three hanging rods can be removed or repositioned. For example, you can detach a lower right hanging rod to create space for longer items like dresses or coats.
- **Weight Distribution:** While the rack is heavy-duty, distribute weight evenly across shelves and hanging rods

to maintain stability and prevent tipping. The stationary weight capacity is 176 LBS.

- **Mobility:** Utilize the movable wheels to easily relocate the rack. Lock the two designated wheels when the rack is in its desired position to prevent accidental movement.

MAINTENANCE

To ensure the longevity and optimal performance of your Raybee Clothes Rack, follow these maintenance guidelines:

- **Cleaning:** Wipe down the metal surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish. The surface is smooth, waterproof, and rust-resistant.
- **Check Connections:** Periodically inspect all pole connections and shelf clips to ensure they remain secure. Tighten any loose parts as needed.
- **Wheel Care:** Keep the wheels clean and free of debris to ensure smooth rolling. Lubricate if necessary.
- **Weight Limits:** Adhere to the recommended weight capacity of 176 LBS (stationary) to prevent structural damage or instability.

TROUBLESHOOTING

If you encounter any issues with your Raybee Clothes Rack, refer to the following common troubleshooting tips:

- **Rack is Wobbly:**

- Ensure all pole connections are fully engaged and clips are securely locked.
- Adjust the leveling feet at the bottom of the poles to stabilize the rack on uneven surfaces.
- Verify that the weight is evenly distributed and not exceeding the maximum capacity.

- **Shelves are Not Level:**

- Check that the plastic clips are installed at the same height on all corresponding poles.
- Ensure the clips are fully locked into the grooves on the poles.

- **Wheels Not Rolling Smoothly:**

- Check for any debris or hair caught in the wheels and clean them.
- Ensure the lockable wheels are disengaged if you intend to move the rack.
