## Razer RZ05-04160100-R3U1

# Razer Leviathan V2 X PC Soundbar User Manual

Model: RZ05-04160100-R3U1 | Brand: Razer

## INTRODUCTION

The Razer Leviathan V2 X is a compact PC gaming soundbar designed to enhance your audio experience for games, movies, and music. It features full-range drivers, passive radiators, Chroma RGB lighting, and versatile connectivity options including USB Type C and Bluetooth 5.0.

## WHAT'S IN THE BOX

- Razer Leviathan V2 X Soundbar
- USB Type C Cable
- Important Product Information Guide

## SETUP

Follow these steps to set up your Razer Leviathan V2 X PC Soundbar:

1. **Placement:** Position the soundbar directly beneath your monitor. The compact design allows for a clutter-free desktop. The soundbar comes with pre-installed wide legs that lift it approximately 0.75 inches (1.9 cm) off the desk. An additional set of "raised feet" is included, allowing you to angle the unit upwards or downwards if desired.

Figure 2: Optimal placement under a monitor.

2. **Power and Audio Connection (USB-C):** Connect the included USB Type C cable from the soundbar to an available USB-C port on your PC or laptop. This single cable provides both power and audio delivery.

Figure 3: USB-C port for power and audio.

3. **Bluetooth Pairing (Optional):** For wireless audio from smartphones, tablets, or Nintendo Switch, enable Bluetooth on your device and search for "Razer Leviathan V2 X". Select it to pair. The soundbar supports Bluetooth 5.0 for low-latency connection.
4. **Software Installation:** For full customization of RGB lighting and audio settings, download and install the Razer Synapse software on your PC or the Razer Audio App on your mobile device.

## OPERATING INSTRUCTIONS

---

### Power On/Off

The soundbar powers on automatically when connected via USB-C to a powered device. To turn off, disconnect the USB-C cable or power down the connected device.

### Volume Control

Adjust the volume using the dedicated volume buttons located on the top of the soundbar, or through your connected device's system volume controls. The soundbar offers fine-tuned volume adjustments.

Figure 5: Top controls of the soundbar.

### Switching Audio Sources

When both USB-C and Bluetooth connections are active, the soundbar can seamlessly switch between them. Use the source selection button on the soundbar or manage through the Razer Audio App.

### Razer Chroma RGB Customization

The soundbar features 14 customizable lighting zones powered by Razer Chroma RGB. Use the Razer Synapse software (PC) or Razer Audio App (mobile) to:

- Select from countless lighting patterns.
- Create dynamic in-game lighting effects.
- Synchronize lighting with other Razer Chroma-enabled devices.

### MAINTENANCE

---

To ensure the longevity and optimal performance of your Razer Leviathan V2 X Soundbar, follow these simple maintenance guidelines:

- **Cleaning:** Gently wipe the soundbar with a soft, dry, lint-free cloth. Avoid using abrasive cleaners, solvents, or aerosol sprays, as these can damage the surface and internal components.
- **Liquid Exposure:** The soundbar is not waterproof. Keep it away from liquids and moisture to prevent damage.
- **Storage:** When not in use for extended periods, store the soundbar in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Cable Management:** Ensure the USB-C cable is not kinked or strained, which can lead to internal wire damage.

### TROUBLESHOOTING

---

If you encounter issues with your Razer Leviathan V2 X Soundbar, refer to the following common problems and solutions:

Problem	Possible Solution
---------	-------------------

Problem	Possible Solution
No sound from soundbar.	<p>Ensure the USB-C cable is securely connected to both the soundbar and your device.</p> <p>Check your device's audio output settings to ensure the Razer Leviathan V2 X is selected as the default playback device.</p> <p>Increase the volume on both the soundbar and your connected device.</p> <p>If using Bluetooth, ensure the soundbar is paired and connected, and that Bluetooth is enabled on your source device.</p>
Bluetooth connectivity issues.	<p>Ensure the soundbar is in pairing mode (refer to the Important Product Information Guide for specific instructions).</p> <p>Disable and re-enable Bluetooth on your source device.</p> <p>Move the soundbar closer to your source device to reduce interference.</p> <p>Forget the device in your Bluetooth settings and attempt to re-pair.</p>
RGB lighting not working or incorrect.	<p>Ensure Razer Synapse (PC) or Razer Audio App (mobile) is installed and updated to the latest version.</p> <p>Check the lighting settings within the software to ensure desired effects are selected.</p> <p>Restart the Razer Synapse software or Razer Audio App.</p> <p>Ensure the soundbar's firmware is up to date.</p>
Sound quality issues (e.g., distortion, low bass).	<p>Adjust the equalizer settings within Razer Synapse or Razer Audio App.</p> <p>Ensure audio drivers on your PC are up to date.</p> <p>Try switching between "Stereo" and "THX" audio modes in Razer Synapse if available, as THX mode may offer improved sound.</p>

If the issue persists, please contact Razer Support for further assistance.
