LG LT1000P2

LG LT1000P2 Refrigerator Water Filter Instruction Manual

Model: LT1000P2 | Brand: LG

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your LG LT1000P2 Refrigerator Water Filter. Designed to provide cleaner, fresher, and better-tasting water and ice, this filter reduces various contaminants to ensure high-quality drinking water for your household.

SAFETY INFORMATION

- Always turn off the water supply to the refrigerator before replacing the filter to prevent leaks.
- Ensure the new filter is correctly aligned and fully inserted to avoid water leakage.
- Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
- Keep the filter and packaging out of reach of children.

PACKAGE CONTENTS

Your LG LT1000P2 Refrigerator Water Filter package includes the following items:

- 2 x LG LT1000P2 Water Filters
- Instructions Manual
- Warranty Information

SETUP AND INSTALLATION

Follow these steps to properly install your new LG LT1000P2 water filter:

1. **Locate the Filter Compartment:** The water filter compartment is typically located inside the fresh food section of your LG refrigerator, usually in the upper right corner. Refer to your refrigerator's specific model

manual if you cannot locate it.

2. **Prepare for Replacement:** Place a towel or small container underneath the filter housing to catch any residual water that may drip during removal.
3. **Remove the Old Filter:** Twist the old filter counter-clockwise until it releases from the housing. Pull it straight out.
4. **Prepare the New Filter:** Remove the protective cap from the new LG LT1000P2 filter.
5. **Install the New Filter:** Insert the new filter into the housing, aligning the filter with the slot. Push it firmly into place and then twist it clockwise until it locks securely. You should feel it click into position.
6. **Flush the System:** After installation, dispense approximately 2.5 gallons (about 5 minutes) of water through the refrigerator dispenser to flush out any air and carbon fines from the system. This ensures optimal filter performance and clear water.
7. **Reset the Filter Indicator:** Most LG refrigerators have a filter indicator light. To reset it, press and hold the "Filter" or "Water Filter" button on your refrigerator's dispenser panel for 3-5 seconds until the light turns off.

OPERATING PRINCIPLES

The LG LT1000P2 water filter utilizes advanced filtration technology to purify your refrigerator's water supply. It contains activated carbon, which effectively absorbs and reduces a wide range of impurities. As water passes through the filter, contaminants are trapped, providing you with clean and fresh water.

- Reduces 99.99% of cysts.
- Reduces 99% of asbestos.
- Significantly reduces mercury, lead, and benzene.
- Removes some herbicides, pesticides, pharmaceuticals, and insect repellents.
- NSF certified for peace of mind.

Quality Assured Tested & Certified by NSF

MAINTENANCE

Regular replacement of your water filter is crucial for maintaining water quality and the efficiency of your refrigerator's water dispensing system.

Filter Replacement Schedule

It is recommended to replace your LG LT1000P2 water filter every **6 months** or after filtering **200 gallons** of water, whichever comes first. This ensures optimal filtration performance and prevents potential issues from an expired filter.

Resetting the Filter Indicator

After replacing the filter, remember to reset the filter indicator light on your refrigerator's control panel. This is typically done by pressing and holding the "Filter" or "Water Filter" button for 3-5 seconds. Consult your refrigerator's user manual for exact instructions if needed.

Smart Reorders with LG ThinQ App and Amazon Alexa

LG ThinQ appliances can detect when you're running low on supplies like water filters and automatically place a smart reorder from Amazon. To enjoy the benefits of smart reorders, connect your LG ThinQ account with Alexa so you never run out.

SHOPPING

Set up smart reorders

Your LG ThinQ appliances can detect when you're running low on supplies such as water filters or laundry detergent and automatically place a smart reorder from Amazon.

To enjoy the benefits of smart reorders, connect your LG ThinQ account with Alexa so you never run out.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Slow water flow from dispenser	Clogged or old filter; air trapped in system.	Replace filter; flush system by dispensing 2.5 gallons of water.
Water tastes or smells bad after replacement	New filter needs flushing; filter not properly installed.	Flush system thoroughly; re-install filter ensuring it's locked in place.
Water leakage from filter area	Filter not properly seated or locked; damaged O-rings.	Remove and re-install filter, ensuring it's fully twisted and locked. Check O-rings for damage.
Filter indicator light remains on after replacement	Indicator not reset.	Press and hold the "Filter" or "Water Filter" button for 3-5 seconds to reset.

SPECIFICATIONS

Model: LT1000P2

Material: Carbon, Plastic

Product Dimensions: 4.33"D x 7.28"W x 7.28"H

Item Weight: 13.7 ounces

Capacity: 200 Gallons

Filter Life: 6 Months (or 200 gallons)

External Testing Certification: NSF

UPC: 195174044513

Part Number: AGF80300812

Color: White
