BOUSNIC RS2

Bousnic Dog Training Collar User Manual

Model: RS2

PRODUCT OVERVIEW

The Bousnic Dog Training Collar is an advanced system designed to assist in training dogs of various sizes and temperaments. It offers multiple stimulation modes to provide effective and humane corrections for unwanted behaviors, promoting a better relationship between pets and their owners. The system includes a remote transmitter and a waterproof receiver collar, ensuring durability and reliability in diverse training environments.

IMPORTANT SAFETY INFORMATION

- This device is intended for dog training purposes only. Do not use it on aggressive dogs.
- Ensure the collar is properly fitted. It should be snug enough for the contact points to touch the dog's skin, but not so tight as to impede breathing or cause discomfort.
- Avoid leaving the collar on the dog for more than 12 hours per day to prevent skin irritation.
- Regularly check the dog's neck area for any signs of irritation or sores. If irritation occurs, discontinue use until the skin heals.
- The shock mode should be used as a last resort and at the lowest effective level. Always start with the lowest intensity and gradually increase if necessary.
- Keep the remote control and receiver out of reach of children.
- Do not attempt to disassemble or modify the device, as this may void the warranty and pose safety risks.

PACKAGE CONTENTS

Upon opening your Bousnic Dog Training Collar package, you should find the following components:

- 1 x Remote Transmitter
- 1 x Receiver Collar
- 1 x Adjustable Nylon Strap
- 1 x USB Charging Cable
- 2 x Sets of Contact Points (Short and Long)
- 1 x Test Light Tool
- 1 x User Manual (PDF version available via link below)

The Bousnic Dog Training Collar set, including the remote transmitter and receiver collar.

SETUP GUIDE

1. Charging the Devices

Before initial use, fully charge both the remote transmitter and the receiver collar. The included USB charging cable allows for convenient charging. The receiver's battery can last for up to 15 days in working modes, while the remote can last for over 1 month on a single charge, providing excellent battery life for extended training sessions.

Security **on/off switch**

Prevent any misoperation

ON/OFF

Always starts shock at level 1

Both the remote and receiver feature long-lasting battery life, reducing the need for frequent recharging.

2. Attaching the Collar Receiver

Select the appropriate contact points (short for short-haired dogs, long for long-haired dogs) and screw them securely onto the receiver. Ensure they are firmly attached to provide consistent contact with your dog's skin.

3. Fitting the Collar

Thread the adjustable nylon strap through the receiver. Place the collar around your dog's neck, ensuring the contact points are positioned underneath the neck. The collar is designed to fit dogs weighing 5-120 lbs, with an adjustable strap length of 0-24 inches. It should be snug enough to allow the contact points to make proper contact

with the skin, but loose enough to allow one finger to fit comfortably between the strap and your dog's neck.

For dogs **5-120lbs**

0-24 inches adjustable strap

5lbs

120lbs

27.5 INCHES TOTAL LENGTH

The Bousnic collar is suitable for a wide range of dog sizes, from 5 to 120 pounds, with an adjustable strap for a comfortable fit.

4. Pairing the Remote and Receiver

Refer to the detailed instructions in the included user manual for specific pairing steps. The remote supports dual-channel operation, allowing you to train two dogs simultaneously.

OPERATING THE TRAINING COLLAR

Training Modes

The Bousnic Dog Training Collar offers three distinct training modes:

- **Beep Mode:** Provides an audible tone (1-8 levels of intensity).
- **Vibration Mode:** Delivers a tactile vibration (1-16 levels of intensity).
- **Safe Shock Mode:** Applies a static correction (1-99 levels of intensity).

The collar offers three effective and humane training modes: Beep, Vibration, and Safe Shock, each with adjustable intensity levels.

Adjusting Intensity Levels

The remote transmitter features intuitive controls to adjust the intensity level for each mode. This allows for precise customization based on your dog's sensitivity and the specific training situation. Always start with the lowest level and increase gradually to find the most effective setting for your dog.

Long-Lasting Battery Life

Say Good Bye to frequently charge

15 Days
Working time

2 Months
Standby time

The remote lasts even longer

The remote control includes a security on/off switch to prevent accidental activation during handling.

Dual Dog Training

The Bousnic training system supports training for up to two dogs simultaneously. The remote has dual-channel functionality, allowing you to switch between collars to deliver commands to individual dogs. This is particularly useful for households with multiple pets, offering a seamless training experience up to a range of 3/4 mile.

MAINTENANCE AND CARE

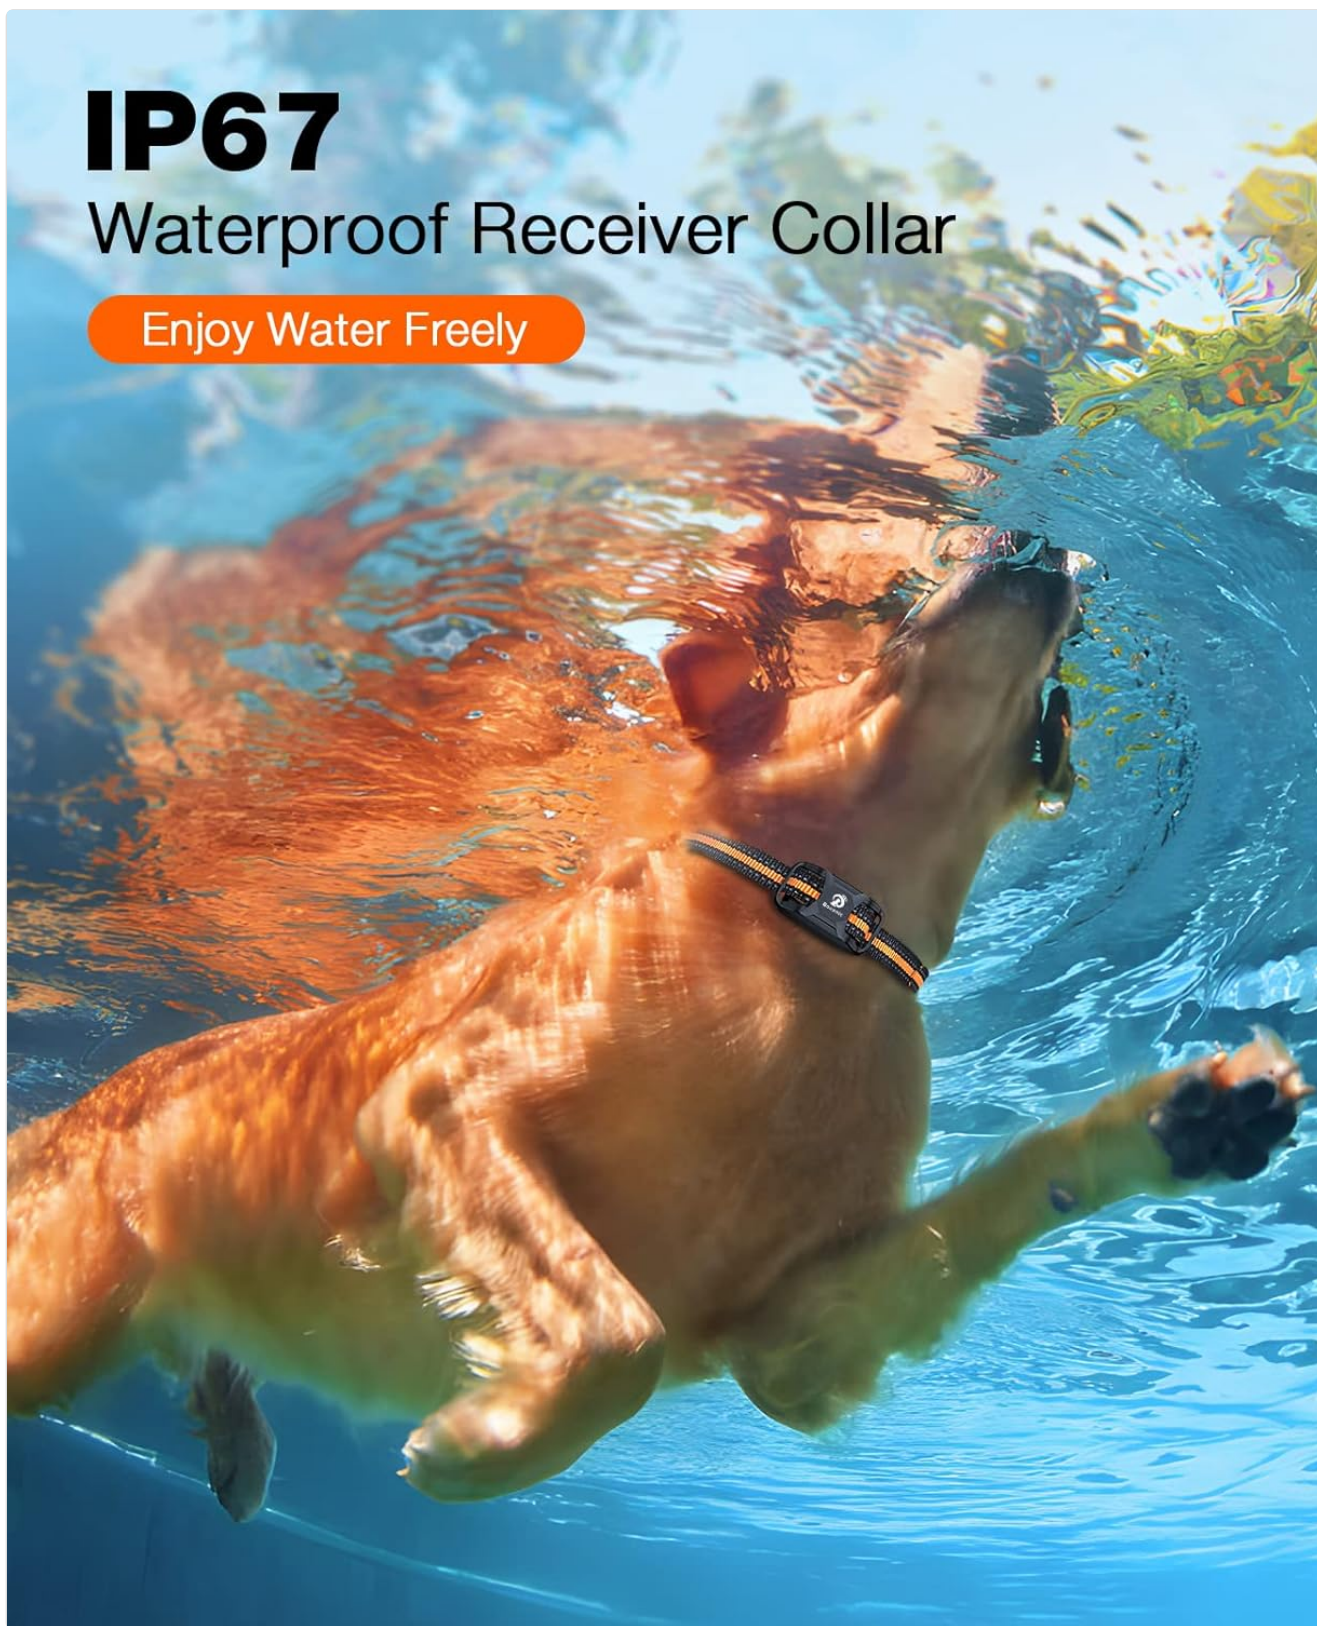

Waterproofing

The receiver collar boasts an IP67 waterproof rating, meaning it can withstand submersion in water up to 1 meter for 30 minutes. This makes it suitable for use in various weather conditions and allows your dog to swim or play in water without damaging the device. The remote control, however, is not waterproof and should be kept away from water.

IP67

Waterproof Receiver Collar

Enjoy Water Freely

The IP67 waterproof receiver collar allows your dog to enjoy water activities without concern for device damage.

Cleaning

Regularly clean the receiver collar and contact points to ensure optimal performance and hygiene. Use a damp cloth to wipe down the surfaces. Ensure the contact points are free of dirt or debris that could interfere with proper function.

Battery Management

To maximize battery life, fully charge the devices when the battery indicator shows low power. Avoid overcharging. Store the devices in a cool, dry place when not in use for extended periods.

TROUBLESHOOTING

If you encounter any issues with your Bousnic Dog Training Collar, consider the following common troubleshooting steps:

- **No response from receiver:** Check if the receiver is turned on and fully charged. Ensure it is properly paired with the remote.
- **Weak or inconsistent stimulation:** Verify that the contact points are making proper contact with your dog's skin. Adjust the collar's tightness or switch to longer contact points if necessary.
- **Remote not working:** Check the remote's battery level. Ensure it is turned on and within the effective range of the receiver.
- **Shortened range:** Environmental factors such as terrain, weather, and electromagnetic interference can affect the range. Try moving to an open area.

For more detailed troubleshooting or persistent issues, please refer to the comprehensive user manual or contact customer support.

PRODUCT SPECIFICATIONS

Feature	Specification
Brand	BOUSNIC
Model Name	RS2
Item Weight	11.6 ounces
Remote Range	Up to 3300 feet (3/4 mile)
Training Modes	Beep (1-8 levels), Vibration (1-16 levels), Safe Shock (1-99 levels)
Waterproof Rating (Receiver)	IP67
Dog Weight Compatibility	5-120 lbs
