DELTA 3536-CZMPU-DST

Delta Saylor Widespread Bathroom Faucet User Manual

Model: 3536-CZMPU-DST | Brand: DELTA

PRODUCT OVERVIEW

The Delta Saylor Bath Collection faucet combines traditional and contemporary design elements, featuring strong, geometric forms and industrial-style handles. This widespread bathroom sink faucet is designed for durability and efficient water usage, incorporating Delta's DIAMOND Seal Technology and WaterSense certification.

SETUP AND INSTALLATION

This widespread bathroom faucet is designed for easy DIY installation, fitting 3-hole, 4-16 inch widespread installations. The quick-connect hose system ensures a secure, leak-preventing connection.

Key Installation Features:

- **Wrench-free, Quick-Connect Hoses:** Water lines audibly click into place for proper connection.
- **Widespread Compatibility:** Designed for 3-hole installations with a 4-16 inch spread.
- **Included Components:** Faucet, mounting hardware, and supply lines are provided.

OPERATING INSTRUCTIONS

The Delta Saylor faucet features two lever handles for controlling water flow and temperature. The left handle typically controls hot water, and the right handle controls cold water. Adjust the handles to achieve the desired water temperature and flow rate.

- **Water Flow:** The maximum flow rate is 1.2 Gallons Per Minute (GPM), meeting WaterSense criteria for water efficiency.
- **Temperature Control:** Rotate the handles to mix hot and cold water.

MAINTENANCE AND CARE

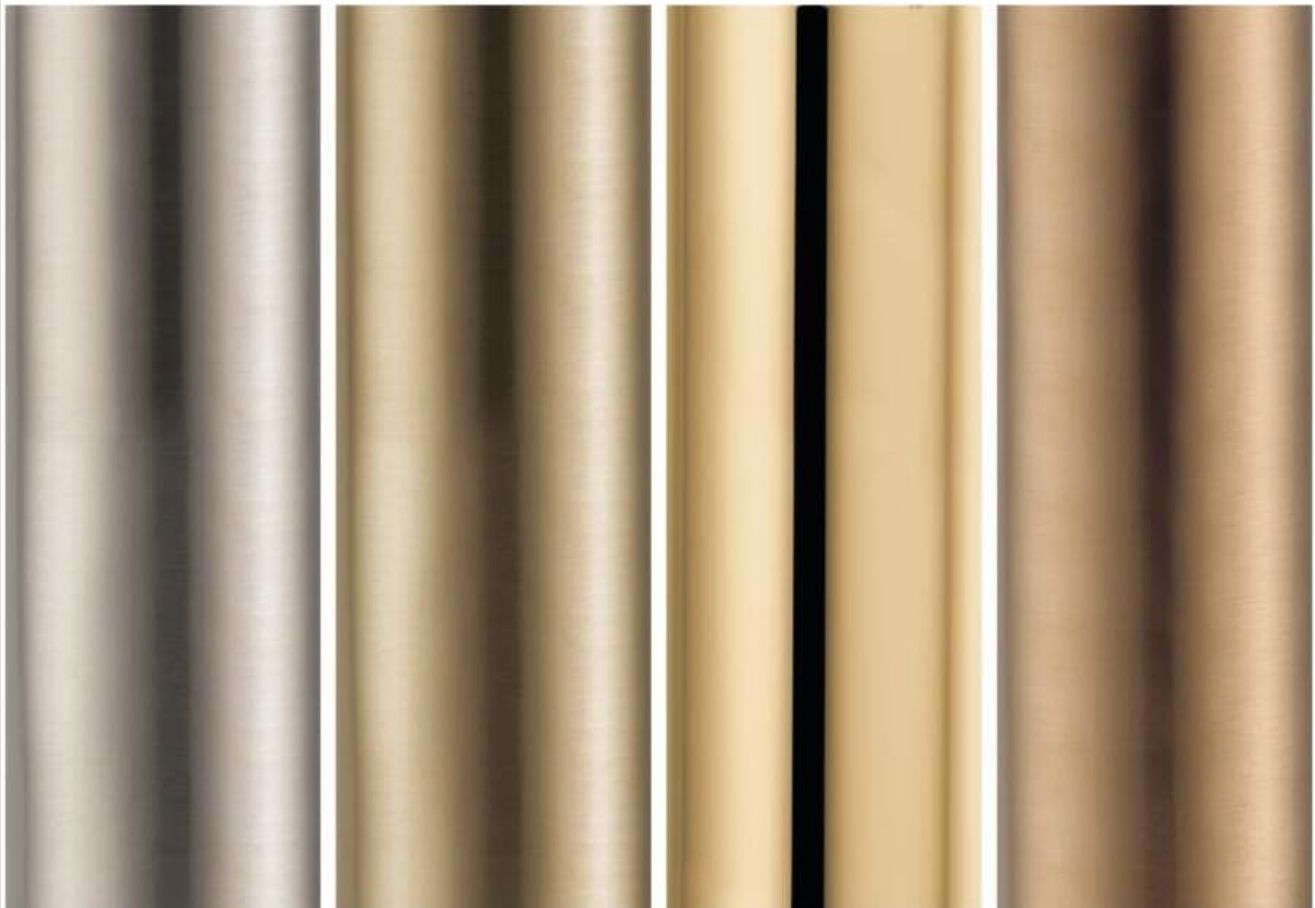

Proper maintenance ensures the longevity and appearance of your Delta Saylor faucet.

Cleaning the Faucet:

- Use a soft, damp cloth and mild soap to clean the Champagne Bronze finish.
- Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.
- The Brilliance finish is engineered for durability and tested for corrosion resistance, exceeding industry standards.

Drain Maintenance:

The metal push pop-up drain assembly is designed for easy cleaning. It can be unscrewed from above the deck for quick removal and cleaning of hair and other debris from the sink.

TROUBLESHOOTING

This section provides general guidance for common issues. For specific problems not addressed here, please refer to the support section.

Reduced Water Flow:

- Check if the aerator is clogged with debris. Unscrew and clean the aerator.
- Ensure water supply valves under the sink are fully open.

Leaks:

- Verify that all connections, especially the quick-connect hoses, are properly seated and tightened.
- The faucet features DIAMOND Seal Technology, designed to reduce leak points and provide leak-free operation. If leaks persist, professional assistance may be required.
