7. TROUBLESHOOTING

If you encounter issues with your OPPO Enco Buds2, refer to the following common solutions:

- **Earbuds not pairing:** Ensure the earbuds are charged, Bluetooth is enabled on your device, and the earbuds are in pairing mode (flashing light on case). Try resetting the earbuds by placing them in the case, closing the lid, and then opening it again.
- **No sound from one earbud:** Place both earbuds back into the charging case, close the lid for a few seconds, then open it and try reconnecting. Check if the earbud is charged.
- **Charging issues:** Clean the charging contacts on both the earbuds and the case. Ensure the USB-C cable and power adapter are working correctly.
- **Low volume:** Adjust the volume on both your connected device and via the earbud touch controls.
- **Unstable connection:** Ensure you are within the Bluetooth range (typically 10 meters) and there are no significant obstructions between the earbuds and your device. Avoid strong electromagnetic interference.

If problems persist, consult the official OPPO support website or contact customer service.
