PATPET P-Collar 680

PATPET Dog Training Collar User Manual

Model: P-Collar 680 | Brand: PATPET

INTRODUCTION

The PATPET Dog Training Collar is designed to help you train your dog effectively and humanely. Featuring multiple adjustable modes including tone, vibration, and static shock, this collar provides versatile options to suit your dog's specific needs and temperament. With a robust remote control function and waterproof design, it ensures reliable performance in various training environments and weather conditions.

KEY FEATURES

- Powerful Remote Control Function:** Effective control from up to 4000 Ft range, supporting training for two dogs simultaneously.
- Multiple Training Modes:** 3 safe, effective, and humane training modes: Tone, Vibration (adjustable levels), and Static Shock (1-16 adjustable levels).
- 2 Hour Quick Charge & Longer Battery Life:** Fully charges in 2 hours, supporting 40-60 days of training sessions. Convenient USB charging.
- IPX7 Waterproof Technology:** Collar receiver is waterproof up to 3.2 Ft for 30 minutes, ideal for all weather

conditions.

- **Precise Adjustment & Reliability:** Adjustable nylon collar fits dogs with neck sizes 7" - 27", suitable for dogs 8 lbs - 100 lbs.

PACKAGE CONTENTS

Your PATPET Dog Training Collar package includes the following items:

- Remote Control Transmitter
- Training Collar Receiver
- Adjustable Nylon Collar Strap
- USB Charging Cable (Dual-port for simultaneous charging)
- Long and Short Contact Points (for different coat lengths)
- Test Light Tool (to verify static shock function)
- User Manual (this document)

SETUP

1. Charging the Devices

Before initial use, fully charge both the remote control and the collar receiver. Use the provided dual-port USB charging cable to charge both units simultaneously. A full charge typically takes 2 hours.

Image: Remote and receiver connected to the dual USB charging cable.

2. Attaching Contact Points

Select the appropriate contact points (short for short-haired dogs, long for long-haired dogs) and screw them firmly onto the receiver. Ensure good skin contact for effective operation. If not using the static shock function, you can use the rubber covers provided.

Image: Collar receiver showing contact points and rubber covers.

3. Fitting the Collar

Place the receiver centrally on your dog's neck, ensuring the contact points touch the skin. The collar should be snug enough for the contact points to make reliable contact, but not so tight as to restrict breathing or cause discomfort. A good rule of thumb is to be able to fit two fingers snugly between the collar and your dog's neck.

OPERATING THE COLLAR

Remote Control Overview

The remote control features clearly labeled buttons for each training mode and a digital display for settings and battery life.

Dog Remote Training Collar features

Image: Detailed view of the remote control and receiver features.

Training Modes

The collar offers three distinct training modes:

- **Tone Mode:** Delivers an audible beep. Ideal for initial warnings or positive reinforcement.
- **Vibration Mode:** Provides a gentle vibration. Levels can be adjusted to suit your dog's sensitivity.
- **Static Shock Mode:** Delivers a static stimulation. Levels 1-16 are available for precise control. Use this mode cautiously and only when necessary, starting with the lowest effective level.

New Look Transmitter

Image: Visual representation of the three training modes.

Multi-Dog Training

The remote supports training up to two dogs simultaneously. Use the channel switch on the side of the remote to toggle between Dog 1 and Dog 2, allowing you to control each collar independently.

Control Range

The PATPET training collar offers an impressive control range of up to 4000 feet, providing ample freedom for training in open spaces without losing connection.

Adjustable Collar

Suitable for all size of dogs

*Extra part of collar can be cut off

WATERPROOF FEATURE

The collar receiver is designed with IPX7 waterproof technology, making it suitable for use in various weather conditions, including rain, or even if your dog enjoys playing in water. It can withstand submersion up to 3.2 feet for 30 minutes.

Longer Control Distance

Train your dog without any bound

MAINTENANCE

To ensure the longevity and proper functioning of your PATPET training collar, follow these maintenance guidelines:

- **Cleaning:** Clean the collar and receiver with fresh water and allow them to dry completely after any water exposure.
- **Skin Health:** Regularly check your dog's skin condition under the collar to prevent irritation. Reposition the receiver on your dog's neck every 1 to 2 hours.

- **Storage:** Store the collar and remote in a dry, cool place when not in use.

TROUBLESHOOTING

If you encounter any issues with your PATPET Dog Training Collar, consider the following common solutions:

- **No Response from Collar:**

- Ensure both the remote and receiver are fully charged.
- Verify the receiver is turned on.
- Check if the remote and receiver are properly paired (refer to the full user manual for pairing instructions).
- Ensure contact points are making proper skin contact.

- **Static Shock Not Working:**

- Confirm the contact points are securely attached and making good skin contact.
- Use the provided test light tool to verify the static shock function.
- Increase the static shock level on the remote.

- **Collar Turning Off Unexpectedly:**

- Check the receiver's on/off switch for accidental activation/deactivation.
- Ensure the battery is not critically low.

For more detailed troubleshooting or persistent issues, please refer to the full user manual PDF or contact PATPET customer support.
