## Firpeesy Twin 16 Inch

# Firpeesy 16 Inch Twin Metal Platform Bed Frame Instruction Manual

Model: Twin 16 Inch

## 1. Important Safety Information

- Do not load more than**3500 lbs** onto the bed frame. Exceeding this weight limit may cause structural damage or injury.
- Ensure all components are properly assembled and tightened before use to prevent instability or pinching hazards.
- Keep small parts away from children during assembly.
- Periodically check all bolts and connections to ensure they remain secure.

## 2. Package Contents

Before beginning assembly, verify that all parts are present and undamaged. Refer to the parts list provided in your packaging. If any parts are missing or damaged, please contact customer support.

Figure 2.1: Included components such as frame sections, a ratchet, rubber feet, and anti-slip baffles.

## 3. Setup and Assembly

This bed frame features a simple assembly design. All necessary tools and instructions are included. Assembly typically takes 10-15 minutes with two people.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches.
2. **Foldable Design:** The main frame sections are designed to unfold easily. Position the sections as shown in the diagram below.

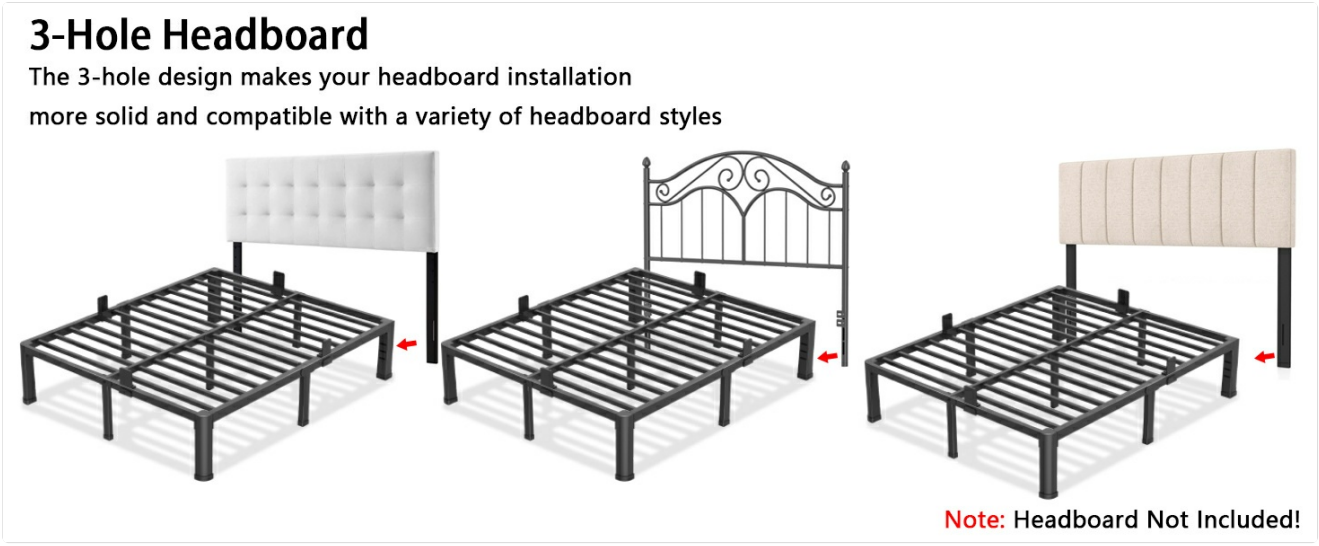

Figure 3.1: Assembly diagram illustrating the arrangement of frame parts before connection.

3. **Connect Frame Sections:** Align the pre-drilled holes and insert the provided screws. Use the included ratchet tool to tighten all connections securely. The U-shaped buckle design facilitates faster and more secure assembly.

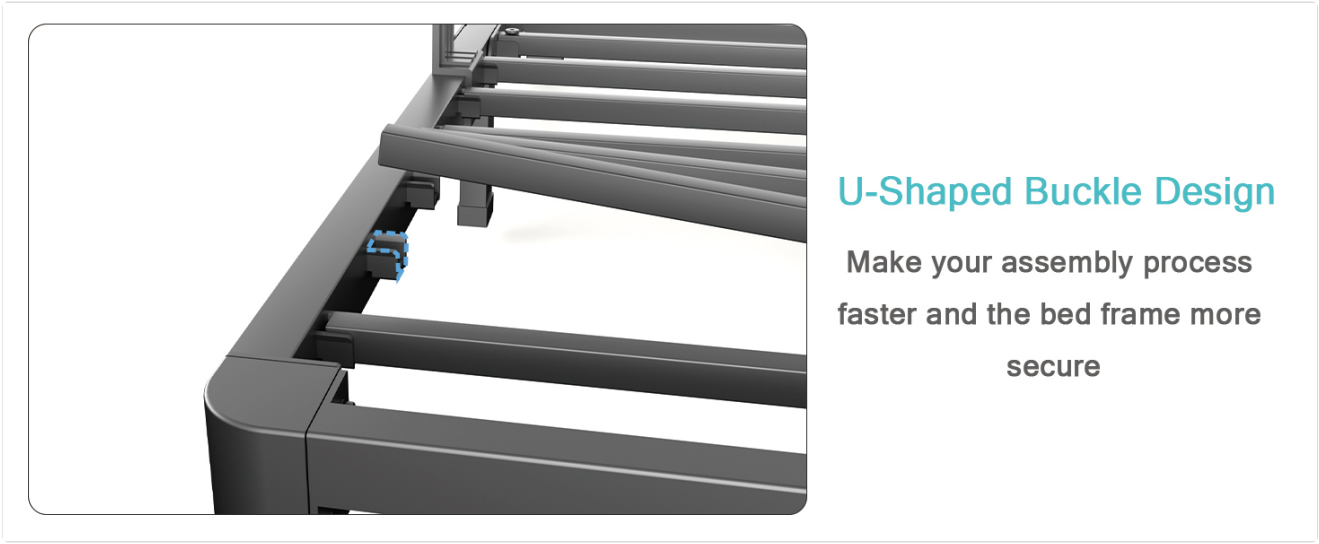

Figure 3.2: Detail of the U-shaped buckle design for secure connections.

4. **Install Rubber Feet:** Attach the anti-slip rubber pads to the bottom of each leg. These pads prevent sliding and protect your floor.

Figure 3.3: Anti-slip rubber pads for floor protection and stability.

5. **Attach Mattress Retainers:** Secure the four mattress stoppers (anti-slip baffles) to the designated slots on the frame to prevent the mattress from sliding.

Figure 3.4: Mattress anti-slip baffle installation.

6. **Optional Headboard Attachment:** The frame includes three reserved holes for attaching a headboard (headboard not included).

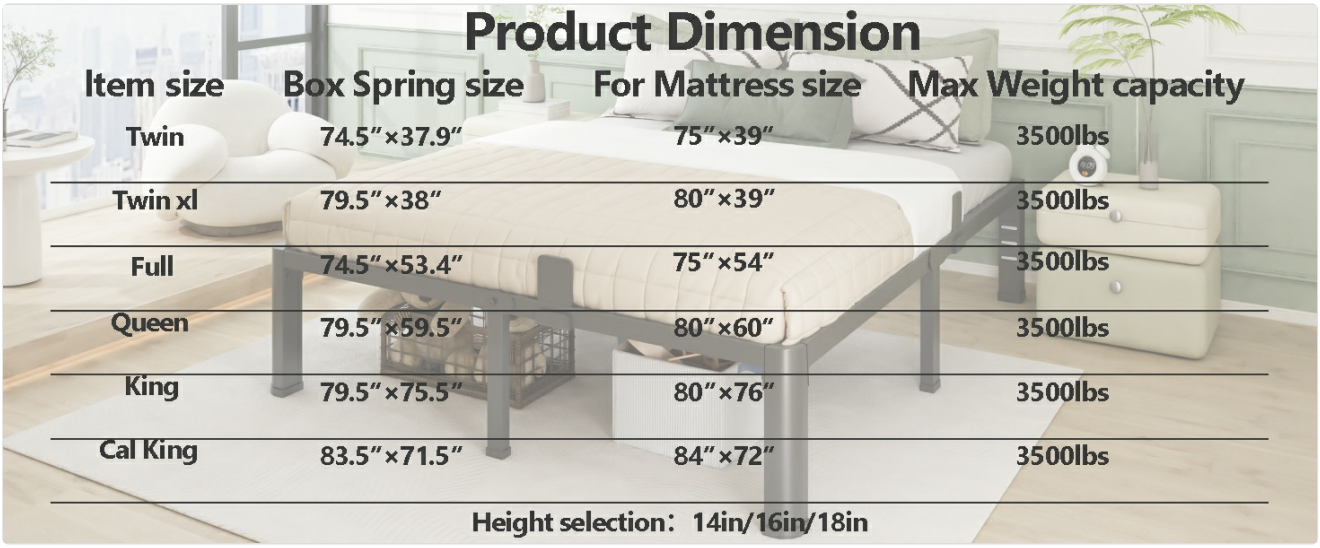

Figure 3.5: Headboard attachment points (headboard not included).

## 4. Operating Instructions

Once assembled, the Firpeesy bed frame is ready for use. It is designed to support your mattress directly, eliminating the need for a box spring.

- **Mattress Placement:** Place your Twin size mattress (recommended size: 75"L x 38"W) directly onto the metal slats. The integrated mattress stoppers will help keep it in place.
- **Noise-Free Design:** The heavy-duty alloy steel construction and rubber feet are engineered to provide stable support and minimize noise.
- **Under-Bed Storage:** The 16-inch height provides approximately 14.4 inches of clearance, offering ample space for storage boxes, luggage, or other items.

Figure 4.1: Illustration of under-bed storage space.

- **Rounded Corners:** The bed frame legs feature rounded corners to prevent accidental bumps and protect your family members.

Figure 4.2: Detail of the rounded corner design for safety.

## 5. Maintenance

To ensure the longevity and optimal performance of your Firpeesy bed frame, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Check Connections:** Periodically (e.g., every 3-6 months) inspect all bolts and screws to ensure they are tight. Re-tighten if necessary to maintain stability and prevent squeaks.
- **Rubber Feet:** Ensure the rubber feet remain securely attached to the legs to protect your flooring and maintain noise reduction.

## 6. Troubleshooting

If you encounter any issues with your bed frame, refer to the following common troubleshooting tips:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all bolts and screws on the frame. Ensure the mattress is properly seated and the rubber feet are in place.
- **Mattress Sliding:** Verify that the four mattress anti-slip baffles are correctly installed and securely fastened to the frame. If the mattress still slides, ensure it is the correct size for the frame.
- **Instability/Wobbling:** Check that all frame sections are fully engaged and all bolts are tightened. Ensure the bed frame is placed on a flat, even surface.

## 7. Specifications

| Feature | Detail |
|---|---|
| Brand | Firpeesy |
| Model | Twin 16 Inch |
| Product Dimensions | 74.5"L x 37.9"W x 16"H |
| Compatible Mattress Size | Twin (75" x 38") |
| Max Weight Capacity | 3500 lbs |
| Material | Alloy Steel |
| Color | Black |
| Special Features | No Box Spring Needed, Headboard Hole Leg, Rounded Corner, Anti-slip and Noise-free Rubber Pads |
| Assembly Required | Yes |
| Item Weight | 26.3 pounds |
| UPC | 710456862168 |
