Glitzhome 11ft Prelit Flocked Pencil Artificial Christmas Tree

INSTRUCTION MANUAL

Introduction

Thank you for choosing the Glitzhome 11ft Prelit Flocked Pencil Artificial Christmas Tree. This manual provides detailed instructions for safe assembly, operation, and maintenance of your new Christmas tree. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

This artificial Christmas tree features a natural, lifelike appearance with flocked 3D fir needles and 950 warm white LED lights. Its slender pencil design is ideal for adding height without occupying excessive floor space.

Safety Information

- **Electrical Safety:** Ensure the power outlet used for the tree lights is easily accessible and not overloaded. Do not connect the tree to a power supply while assembling.

- **Fire Safety:** The tree features fire-resistant materials. However, keep all flammable materials away from the tree and its electrical components. Do not use candles or other open flames near the tree.

- **Stability:** Always ensure the tree stand is fully assembled and tightened before placing tree sections. Place the tree on a flat, stable surface to prevent tipping.

- **Children and Pets:** Keep small children and pets away from the tree during assembly and ensure all small parts are out of reach.

- **Indoor Use Only:** This product is designed for indoor use only.

Package Contents

Before assembly, verify that all components are present:

- Tree Sections (5 hinged sections)
- Folding Metal Stand
- Screws for Stand

- Extra White Gloves (for safe setup and handling)

Assembly Instructions

Follow these steps to assemble your Glitzhome 11ft Prelit Flocked Pencil Artificial Christmas Tree:

1. **Preparation:** Carefully remove all contents from the box. Lay out the tree sections, stand, and accessories on a clean, flat surface. It is recommended to wear the included white gloves during assembly to protect your hands and minimize contact with the flocking.

2. **Assemble the Tree Stand:** Unfold the metal stand and insert the screws into the designated holes. Tighten the screws to secure the stand firmly.

3. **Insert Tree Section 1:** Place the bottom-most tree section (Section 1) into the assembled stand. Ensure it is seated securely and tighten the stand screws around the pole.

4. **Insert Remaining Tree Sections:** Continue by inserting Section 2 into Section 1, then Section 3 into Section 2, and so on, until all 5 sections are stacked. Each section should fit snugly into the one below it.

5. **Connect the Lights:** Once all tree sections are in place, locate the light connectors between each section. Carefully connect the male and female plugs to ensure all lights are powered.

6. **Shape the Branches:** Begin at the bottom of the tree and work your way up. Gently pull apart and spread out the hinged branches, shaping them to fill any gaps and create a full, natural appearance. Adjust individual branch tips as needed.

7. **Power On:** Once assembly and shaping are complete, plug the tree's power cord into a suitable electrical outlet.

Operating Instructions

- **Turning Lights On/Off:** The tree's lights are pre-strung. Simply plug the power cord into an electrical outlet to illuminate the tree. Unplug to turn off.

- **Optimizing Appearance:** After initial setup and each subsequent assembly, take time to fluff and shape the branches. This involves gently spreading out the individual branch tips to create a full and realistic look.

Maintenance and Storage

- **Cleaning:** To clean the tree, gently dust the branches with a soft cloth or use a vacuum cleaner with a brush attachment on a low setting. Do not use liquid cleaners, as they may damage the flocking or electrical components.

- **Disassembly:** Unplug the tree from the power outlet. Carefully disconnect the light connectors between sections. Starting from the top, lift each section off the one below it.

- **Storage:** Compress the branches of each section before placing them back into the original packaging or a suitable storage bag. Store the tree in a cool, dry place away from direct sunlight and extreme temperatures to preserve its quality.

Troubleshooting

- **Lights Not Working:**

  - Check all light connections between tree sections to ensure they are securely plugged in.
  - Verify that the power cord is firmly plugged into a working electrical outlet.
  - Inspect individual bulbs for looseness or breakage. Replace any faulty bulbs if necessary (replacement bulbs are typically included with the tree or can be purchased separately).

- **Tree is Unstable:**

  - Ensure the metal stand is fully unfolded and all screws are tightened securely.
  - Confirm that the tree pole is properly seated in the stand.
  - Place the tree on a completely flat and level surface.

- **Excessive Flocking Shedding:** It is normal for some flocking to shed during initial setup and handling. This is not a defect. Minimize shedding by handling branches gently during assembly and shaping.

Product Specifications

Feature	Specification
Brand	Glitzhome
Model	B0BCP6MYSW
Height	11 feet (132 inches)
Base Diameter	3.3 feet (40.25 inches)
Color	Flocked (Snowy Splendor Fir)
