It shows the cabinet effectively used in a garage for tools, a pantry for food items, an office for documents and supplies, and a living room for general storage, demonstrating its adaptability to various storage needs.

2. SAFETY INSTRUCTIONS

Please read and understand all safety instructions before assembling, operating, or maintaining the SISESOL Metal Storage Cabinet. Failure to follow these instructions may result in injury or damage to the product.

- **Assembly Safety:** Always assemble the cabinet on a clean, flat, and stable surface. Ensure all parts are present before beginning assembly. Use appropriate tools and follow the instructions carefully. It is recommended to have two people for assembly to prevent injury.
- **Weight Capacity:** Do not exceed the maximum weight capacity of **180 lbs (81.6 kg) per shelf**. Distribute weight

evenly across shelves to maintain stability. Overloading can cause structural damage or tipping.

- **Stability:** Ensure the cabinet is placed on a level surface. Use the adjustable levelers at the base to stabilize the cabinet and prevent wobbling or tipping. For added safety, especially in areas with children or pets, consider anchoring the cabinet to a wall (anchoring hardware not included).
- **Door Operation:** Always open and close doors carefully. Ensure hands and fingers are clear of hinges and closing mechanisms.
- **Locking Mechanism:** Use the provided keys to secure the cabinet. Keep keys in a safe place away from unauthorized access.
- **Children and Pets:** Keep children and pets away from the cabinet during assembly. Do not allow children to climb on or play inside the cabinet.
- **Maintenance:** Regularly inspect the cabinet for any signs of wear, damage, or loose components. Address any issues promptly to ensure continued safe operation.

4. SETUP AND ASSEMBLY

The SISESOL Metal Storage Cabinet is designed for straightforward assembly. Please follow the numbered instructions provided in the separate assembly guide included with your package. The general steps are outlined below:

1. **Prepare the Area:** Clear a spacious, flat, and clean area for assembly. Lay out all components and hardware.
2. **Assemble the Frame:** Connect the side panels to the back panel, followed by the top and bottom panels, using the provided hardware. Ensure all connections are secure.
3. **Install Doors:** Attach the cabinet doors to the main frame using the hinges. Ensure the doors align correctly and swing freely.
4. **Install Handles and Lock:** Secure the door handles and integrate the locking mechanism as per the detailed instructions. Test the lock with the provided keys.

5. **Insert Shelf Support Pegs:** Determine your desired shelf heights and insert the shelf support pegs into the corresponding slots on the side panels.
6. **Place Shelves:** Carefully place the adjustable shelves onto the installed support pegs.
7. **Attach Levelers:** Screw the four adjustable levelers into the base of the cabinet.
8. **Final Adjustment:** Once assembled, move the cabinet to its desired location. Adjust the levelers to ensure the cabinet is stable and level on the floor.

This image provides detailed close-ups of the SISESOL cabinet's key features. It shows the magnetic mechanism that keeps the doors closed, the secure lock with two keys for protecting valuables, the adjustable shelf pegs allowing for flexible storage configurations, and the four adjustable levelers at the base for ensuring stability on uneven surfaces.

5. OPERATING INSTRUCTIONS

Using your SISESOL Metal Storage Cabinet is straightforward. Here are instructions for its primary functions:

- **Opening and Closing Doors:** Gently pull the handles to open the doors. To close, push the doors firmly until the integrated magnets engage, ensuring they remain securely shut.
- **Locking and Unlocking:** Insert one of the provided keys into the lock located on the right door. Turn the key clockwise to lock the cabinet and counter-clockwise to unlock it. Remove the key after locking to secure your items. The 3-point locking system engages at the top, middle, and bottom for enhanced security.

- **Adjusting Shelves:** To adjust a shelf, first remove all items from it. Carefully lift the shelf off its support pegs. Remove the pegs from their current slots and reinsert them into the desired new slots. Ensure all four pegs are at the same height to keep the shelf level. Then, place the shelf back onto the pegs. This allows you to customize the storage space to fit items of various sizes.
- **Loading Items:** When placing items on shelves, distribute the weight as evenly as possible. Avoid concentrating heavy items in one small area. Always adhere to the 180 lbs (81.6 kg) per shelf weight limit.

6. MAINTENANCE

Proper maintenance will ensure the longevity and optimal performance of your SISESOL Metal Storage Cabinet.

- **Cleaning:** The cabinet's surface is waterproof, scratch-resistant, and rust-resistant. For general cleaning, wipe surfaces with a soft, damp cloth and mild detergent. Avoid abrasive cleaners or harsh chemicals, as these can damage the finish. Dry thoroughly after cleaning.
- **Inspection:** Periodically inspect all bolts, screws, and connections to ensure they remain tight. Tighten any loose hardware as needed. Check the door hinges and locking mechanism for smooth operation.
- **Leveling:** Re-check the cabinet's levelness periodically, especially if it has been moved or if the floor is uneven. Adjust the levelers as necessary to maintain stability.
- **Rust Prevention:** While the cabinet is rust-resistant, avoid prolonged exposure to excessive moisture or highly corrosive environments to maintain its finish.

7. TROUBLESHOOTING

If you encounter any issues with your SISESOL Metal Storage Cabinet, please refer to the following common problems and their solutions:

Problem	Possible Cause	Solution
Cabinet is wobbly or unstable.	Uneven floor; levelers not adjusted correctly; loose assembly hardware.	Adjust the four levelers at the base until the cabinet is stable. Ensure all assembly hardware is tightened.
Doors do not close properly or are misaligned.	Hinges are loose or misaligned; cabinet is not level; obstruction.	Check and tighten hinge screws. Ensure the cabinet is level using the adjustable levelers. Remove any obstructions.
Lock mechanism is stiff or not engaging.	Mechanism needs lubrication; key is bent or damaged; internal component misalignment.	Apply a small amount of graphite lubricant to the lock. Try the spare key. If the issue persists, contact customer service.
Shelves sag or appear weak.	Overloaded shelf; uneven weight distribution.	Reduce the weight on the shelf, ensuring it does not exceed 180 lbs (81.6 kg). Redistribute items evenly across the shelf.

If you encounter a problem not listed here or if the suggested solutions do not resolve the issue, please contact SISESOL

customer service for further assistance.
