## Karl home 5-Tier Adjustable Metal Storage Shelves, 35.4"L X 13.8"W X 70.9"H Black

# Karl home 5-Tier Adjustable Metal Storage Shelves User Manual

Model: 35.4"L X 13.8"W X 70.9"H Black

Brand: Karl home

## INTRODUCTION

---

This manual provides detailed instructions for the assembly, operation, maintenance, and troubleshooting of your Karl home 5-Tier Adjustable Metal Storage Shelves. Please read this manual thoroughly before assembly and use to ensure safe and efficient operation. Keep this manual for future reference.

Image: The Karl home 5-Tier Adjustable Metal Storage Shelf, fully assembled and ready for use. This black wire shelving unit features five adjustable shelves and sturdy metal construction, suitable for various storage needs.

## SAFETY INFORMATION

---

Always follow these safety precautions to prevent injury or damage to the product:

- Ensure all components are present and undamaged before beginning assembly. Do not use if any parts are missing or broken.
- Assemble the unit on a flat, stable surface to prevent tipping.
- Do not overload the shelves. The maximum weight capacity is 1000 lbs (distributed evenly).

- Distribute weight evenly across the shelves to maintain stability.
- Keep children and pets away from the assembly area.
- Do not climb on the shelving unit.
- For optimal stability, place heavier items on lower shelves.

## PARTS LIST

---

Before assembly, verify that all the following components are included in your package:

Component	Quantity	Description
Shelf Panels	5	Wire grid shelves for storage.
Upper Poles	4	Top sections of the vertical support poles.
Lower Poles	4	Bottom sections of the vertical support poles, with leveling feet.
Coupling Sleeves	4	Connects upper and lower poles.
Plastic Clips (Split Sleeves)	20 pairs (40 pieces)	Used to secure shelves at desired height on poles.
Adjustable Leveling Feet	4	Pre-installed in lower poles, for stability on uneven surfaces.

## SETUP AND ASSEMBLY

---

Assembly of the Karl home 5-Tier Adjustable Metal Storage Shelves is designed to be straightforward and typically takes about 10 minutes. No tools are required.

### 1. Prepare the Poles:

Screw the upper poles into the lower poles using the coupling sleeves. Ensure they are securely tightened to form four complete vertical poles.

### 2. Attach Plastic Clips:

Determine the desired height for your bottom shelf. Snap two halves of a plastic clip together around each pole at the same desired height. Ensure the arrow on each clip points upwards and that all clips for a single shelf are at the exact same level. Repeat this for all four poles for the first shelf.

Image: A hand demonstrating how to snap the two halves of a plastic clip around a metal pole. These clips are crucial for setting the shelf height.

### 3. Install the First Shelf:

Carefully slide the first shelf down over the four poles until it rests firmly on the plastic clips. The shelf corners are designed to fit snugly over the clips, securing the shelf in place.

Image: A detailed view of a shelf corner, showing how it sits securely on the plastic clips attached to the vertical pole, ensuring stability.

**4. Install Remaining Shelves:**

Repeat steps 2 and 3 for the remaining four shelves, adjusting the height of the plastic clips as desired for each shelf. Ensure all clips for each shelf are at the same level before placing the shelf.

**5. Adjust Leveling Feet:**

Once all shelves are installed, gently rock the unit to check for stability. If the unit wobbles, adjust the leveling feet located at the bottom of each lower pole by twisting them clockwise or counter-clockwise until the unit is stable on your floor.

Image: A close-up of the adjustable leveling foot, which can be twisted to compensate for uneven floor surfaces, ensuring the shelf remains stable.

Your Karl home 5-Tier Adjustable Metal Storage Shelves are now assembled and ready for use.

## OPERATING INSTRUCTIONS

---

The Karl home storage shelves are designed for versatility and ease of use.

### Adjusting Shelf Height

The height of each shelf can be adjusted to accommodate items of various sizes. To adjust a shelf:

1. Remove all items from the shelf you wish to adjust.
2. Lift the shelf off the plastic clips.
3. Remove the plastic clips from the poles.
4. Re-attach the plastic clips at the new desired height on all four poles, ensuring they are level.
5. Carefully lower the shelf back onto the newly positioned clips.

### Using Adjustable Leveling Feet

The adjustable leveling feet ensure the shelf remains stable on uneven surfaces. If the shelf wobbles:

- Identify the foot or feet that need adjustment.
- Twist the leveling foot clockwise to raise that corner of the shelf, or counter-clockwise to lower it.
- Continue adjusting until the shelf is stable and level.

## MAINTENANCE

Proper maintenance will extend the life and appearance of your shelving unit.

- **Cleaning:** Wipe the shelves and poles with a dry cloth to remove dust and debris. For more stubborn dirt, use a slightly damp cloth and then immediately dry the surface thoroughly. Avoid abrasive cleaners or harsh chemicals, as they may damage the anti-corrosion coating.
- **Rust Prevention:** The metal shelves feature an anti-corrosion coating. To maintain this protection, ensure the unit remains dry, especially after cleaning. Avoid prolonged exposure to excessive moisture.
- **Regular Inspection:** Periodically check all connections, especially the plastic clips and pole couplings, to ensure they remain secure. Re-tighten or re-position as necessary.

## TROUBLESHOOTING

---

Here are solutions to common issues you might encounter:

Problem	Possible Cause	Solution
Shelf wobbles after assembly.	Uneven floor surface; leveling feet not adjusted; uneven weight distribution.	Adjust the leveling feet at the bottom of the poles until the unit is stable. Ensure weight is distributed evenly across shelves.
Shelves are not level.	Plastic clips are not at the same height on all four poles for a given shelf.	Remove the shelf, re-position the plastic clips to ensure they are all at the exact same height, then re-install the shelf. Use the grooves on the poles as a guide.
Difficulty snapping plastic clips together.	Clips may be stiff or misaligned.	Ensure the two halves of the clip are correctly aligned before pressing them together. Apply firm, even pressure. If still difficult, try gently wiggling them into place.
Missing parts upon unboxing.	Packaging error or transit damage.	Contact Karl home customer support immediately with your purchase details. Do not attempt to assemble with missing parts.

## SPECIFICATIONS

---

- **Model:** 5-Tier Adjustable Metal Storage Shelves
- **Dimensions (L x W x H):** 35.43"D x 13.78"W x 70.87"H (35.4"L X 13.8"W X 70.9"H)
- **Number of Shelves:** 5
- **Weight Capacity:** Up to 1000 lbs (evenly distributed)
- **Material:** Commercial-grade Steel
- **Finish:** Black (with anti-corrosion coating)
- **Special Features:** Adjustable shelf height, Adjustable leveling feet
- **Recommended Uses:** Kitchen, Bathroom, Pantry, Cabinet, Garage, Office
