Sizzix 666024

Sizzix Thinlits Die Set 21PK Seasonal House Gift Box (Model 666024) Instruction Manual

Comprehensive guide for using your Sizzix Thinlits Die Set.

1. INTRODUCTION

The Sizzix Thinlits Die Set 21PK Seasonal House Gift Box, model 666024, offers a versatile wafer-thin die collection designed for intricate papercraft projects. This set allows you to create detailed designs with clean and precise cuts, ideal for enhancing birthday cards, invitations, and various other crafts. The primary design enables the creation of a milk carton-style gift box that can be customized for different seasons and occasions.

2. SETUP AND COMPATIBILITY

This Thinlits die set requires a compatible Sizzix die-cutting machine for operation. Compatible machines include the Sizzix Big Shot, Sizzix Big Shot Express, Sizzix Big Shot Foldaway, Sizzix Big Shot Plus, and Sizzix Big Shot Pro.

2.1 Die Cutting Process

- 1. Prepare your machine:** Ensure your Sizzix Big Shot Machine (or compatible model) is ready for use. You will need Standard Cutting Pads (655093).
- 2. Create the sandwich:**
 - Place one cutting pad on the machine's platform.
 - Position your Thinlits die on top of the cutting pad.
 - Place your chosen material (e.g., paper, cardstock) on top of the die.
 - Complete the sandwich with a second cutting pad placed on top of the die and material.
- 3. Roll through the machine:** Feed the assembled sandwich through your die-cutting machine by turning the handle. The machine applies pressure to cut the design.
- 4. Reveal your design:** Once rolled through, carefully remove the cutting pads and separate your newly cut design from the die and excess material.

Important Note: An Adapter Platform (658992) is required when using Thinlits dies with any Sizzix Big Shot machines. If you have already purchased a Big Shot machine, the adapter is typically included. Place this adapter under the cutting pad sandwich before rolling through the machine.

3. OPERATING INSTRUCTIONS: CUTTING MATERIALS

Thinlits dies are designed to cut intricate shapes from a variety of materials. The die-cutting machine provides the necessary pressure, while the die itself performs the cutting action. Always refer to the die's compatibility guidelines for specific material recommendations.

3.1 Compatible Materials

This Thinlits die set can cut a single sheet of the following materials:

- Paper

- Cardstock
- Metallic foil
- Vellum
- Shrink plastic
- Stencil film

For best results, ensure your material is flat and properly aligned with the die before passing it through the machine.

4. MAINTENANCE

To ensure the longevity and optimal performance of your Sizzix Thinlits dies, follow these simple maintenance guidelines:

- **Cleaning:** After each use, gently remove any small pieces of paper or material that may be lodged in the die's intricate designs. A small brush or pick tool can be helpful.
- **Storage:** Store your dies flat in a dry environment to prevent warping or damage. Magnetic storage sheets or dedicated die storage binders are recommended.
- **Handling:** Handle dies carefully to avoid bending or dulling the cutting edges.

5. TROUBLESHOOTING

If you encounter issues while using your Thinlits die set, consider the following:

- **Incomplete Cuts:**
 - Ensure your die-cutting machine's pressure is correctly set for the material thickness.
 - Verify that the cutting pads are not excessively worn or warped. Replace them if necessary.
 - Check the compatibility of your material with Thinlits dies. Some very thick or dense materials may not cut cleanly.
 - Ensure the Adapter Platform is correctly used with Big Shot machines if required.
- **Die Compatibility with Non-Sizzix Machines:** Sizzix dies are designed for optimal performance with Sizzix machines. If using an alternative machine, consult the manufacturer of that machine for compatibility information.
- **General Assistance:** For further guidance, refer to the "From the Manufacturer" section on the product page or visit the official Sizzix Brand Store for educational videos and resources.

6. SPECIFICATIONS

Model Number:	666024
Brand:	Sizzix
Manufacturer:	Ellison
Material:	Paper, Plastic (for dies)
Die Dimensions (L x W):	2.37"L x 2.37"W (approximate largest die)
Assembled Box Size:	10.16cm x 6.03cm x 6.03cm
Item Weight:	0.04 Grams
GTIN (UPC):	630454282273
