Frigidaire EFIC255-CREAM

Frigidaire Nugget Ice Maker Instruction Manual

Model: EFIC255-CREAM

INTRODUCTION

The Frigidaire Nugget Ice Maker is designed to provide chewable, crunchy nugget ice, similar to what you find in restaurants. This countertop unit is capable of producing up to 44 pounds of ice per day, with the first batch ready in as little as 10-15 minutes. It features a large 3-pound capacity ice bin, a convenient viewing window, and an automated self-cleaning function for ease of use and maintenance. Its compact and sleek design allows it to fit comfortably on most kitchen countertops, even under cabinets.

IMPORTANT SAFEGUARDS

Please read all instructions carefully before operating this appliance to ensure safe and efficient use.

- This ice maker is designed to produce ice, not to store it. The unit does not keep ice frozen once it's made. To prevent melting, transfer the ice to your freezer promptly after it is produced.
- Ensure the product dimensions and weight are suitable for your intended space before setup.
- Always unplug the appliance before cleaning or performing any maintenance.
- Do not immerse the appliance, cord, or plug in water or other liquids.
- Keep the appliance away from heat sources and direct sunlight.

PRODUCT OVERVIEW AND COMPONENTS

The Frigidaire Nugget Ice Maker features a stylish viewing window, automated self-cleaning, a large 3 lbs. ice basket, and includes an ice scoop.

What's in the Box:

- Frigidaire Nugget Ice Maker Unit
- Ice Bin
- Ice Scoop
- Drip Tray

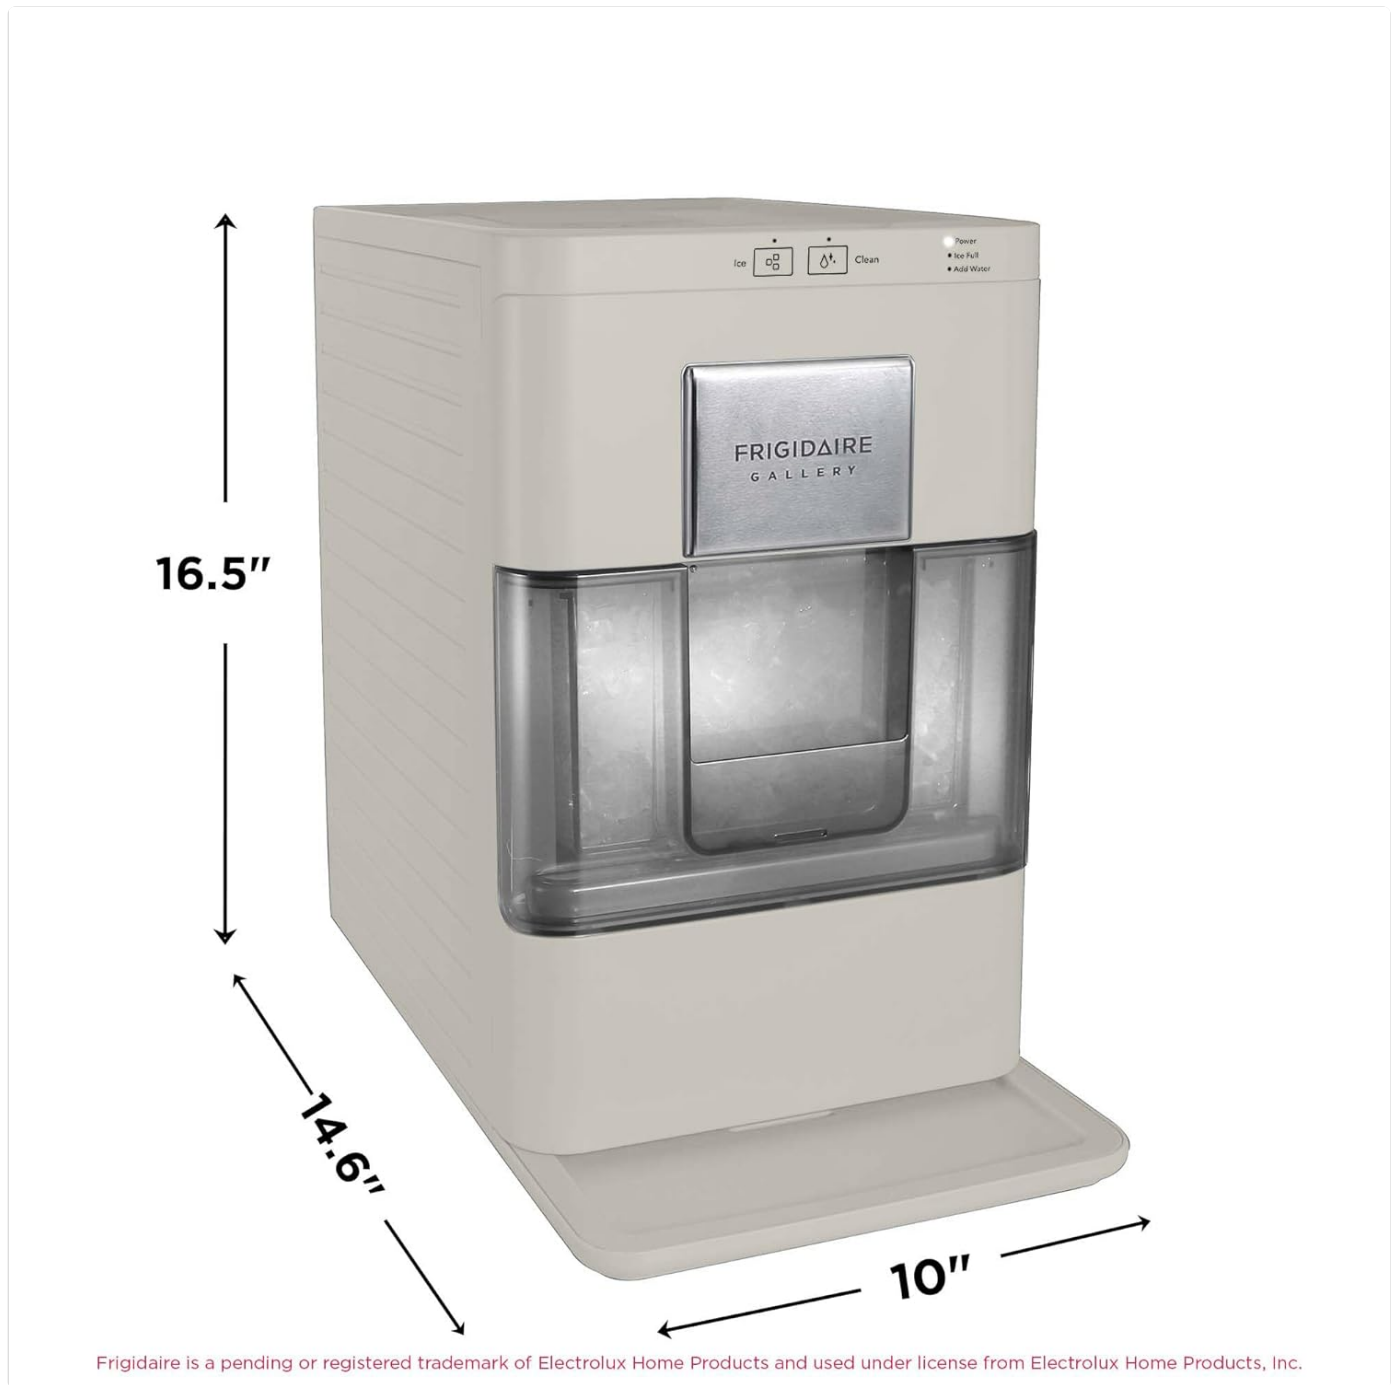

SETUP

Unpacking

Carefully remove all packaging materials and inspect the ice maker for any damage. Retain the packaging for future transport or storage.

Placement

Place the ice maker on a stable, level surface. Ensure there is adequate ventilation around the unit. The compact design allows it to fit on countertops and under most kitchen cabinets. No water hookup is needed, simply plug it into a standard electrical outlet.

The ice maker's dimensions are 16.5"H x 14.6"D x 10"W, designed for compact placement.

OPERATING INSTRUCTIONS

Filling the Water Reservoir

The ice maker features a built-in reservoir. To fill, pull out the top drawer section. The reservoir has a maximum fill line. Fill with clean, potable water. The unit has a large water capacity, reducing the need for frequent refills.

Making Ice

After filling the reservoir and plugging in the unit, press the 'Ice' button on the control panel. The ice maker will begin producing nugget ice. The first ice nuggets are typically ready in just 10-15 minutes. The unit can produce up to 44 lbs. of

ice per day.

Control Panel

Intuitive Digital LCD Control Panel

**Ice Full
Notification**

**Add Water
Notification**

**Select Large
Or Small Nuggets**

**Automated
Self-cleaning**

The intuitive digital LCD control panel provides indicators for Ice Full, Add Water, Ice size selection (S/L), and Automated Self-cleaning.

The control panel includes indicator lights for 'Power', 'Ice Full', and 'Add Water'. It also has buttons for 'Ice' (to start/stop ice production), 'Clean' (to initiate self-cleaning), and 'Select' (to choose between small or large nugget ice, if applicable).

Ice Collection

The ice is collected in a large 3 lbs. capacity bin accessible via a pull-out drawer at the bottom. Use the included ice scoop to retrieve the ice. The unit also includes a drip tray to catch any melted ice or spills.

Effortless Ice Making

Produce up to 44 lbs. of ice daily with first ice nuggets ready in just 10-15 minutes.

Effortlessly scoop fresh nugget ice from the convenient pull-out bin.

The included ice scoop and removable drip tray enhance convenience and cleanliness.

MAINTENANCE

Self-Cleaning Function

The ice maker features an automated self-cleaning function. To activate, press the 'CLEAN' button on the control panel. This function helps maintain optimal hygiene and ensures fresh-tasting ice.

Manual Cleaning

For thorough cleaning, the ice bin and water reservoir components are removable. Regularly clean these parts with mild soap and water. Ensure all parts are completely dry before reassembling. It is recommended to clean the unit periodically to prevent mineral buildup and maintain ice quality.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No ice production	Low water level; Power off; Ice bin full.	Add water to reservoir; Check power connection; Empty ice bin.
Ice is too soft/melts quickly	Ambient temperature too high; Unit not designed for long-term storage.	Ensure proper ventilation; Transfer ice to freezer promptly after production.
Unusual noise during operation	Normal operation sounds (e.g., water pump, ice dropping); Component issue.	Refer to manual for normal sounds; Contact customer support if persistent or unusual.
"Add Water" indicator on, but reservoir is full	Water sensor issue; Reservoir not properly seated.	Ensure reservoir is correctly seated; Clean water sensor if accessible.
"Clean" indicator on	Time for routine cleaning.	Perform self-cleaning cycle or manual cleaning as per instructions.
