WinZo WZ5079WB

WinZo Small One Piece Toilet WZ5079WB Instruction Manual

Model: WZ5079WB | Brand: WinZo

PRODUCT OVERVIEW

The WinZo WZ5079WB is a compact, one-piece toilet designed for space-saving in smaller bathrooms or powder rooms. It features a sleek white finish with a matte black button, a high-efficiency dual flush system, and a powerful double cyclone flushing mechanism for effective cleaning and water conservation. The toilet also includes a soft-close seat with a quick-release design for easy maintenance.

SETUP AND INSTALLATION

This toilet is designed for floor-mounted installation. Careful planning is essential due to its compact design and side access for bolts.

Package Contents:

- One-piece toilet unit
- Soft close toilet seat
- Fill valve
- Flush valve
- Matte black flush button (may be in a separate package)

Pre-Installation Considerations:

- Ensure sufficient room on both sides of the toilet for access to the side holes for tightening flange bolts. This is crucial for a smooth installation.
- Verify the rough-in measurement (12 inches) to ensure compatibility with your plumbing.
- Confirm the water supply line position; some installations may require minor adjustments to the supply line for proper fit.

Installation Steps (General Guidance):

1. Prepare the flange and wax ring according to standard plumbing practices.
2. Carefully position the toilet over the flange bolts. Due to the one-piece design, it can be helpful to mark the floor and bolt locations for alignment.
3. Access the side holes to tighten the flange bolts. Use appropriate tools for limited access.
4. Connect the water supply line to the fill valve.
5. Install the soft-close seat.
6. Perform a test flush to check for leaks and proper operation.

Main Features

Dual Flush 0.8/1.6GPF-Optional for half or full flush

High efficiency, low water consumption
Environmentally friendly
Save water and money every year..

Half Flush 0.8 GPF

Full Flush 1.6 GPF

OPERATING INSTRUCTIONS

The WinZo WZ5079WB toilet features an efficient dual flush system and a powerful flushing mechanism.

Dual Flush System:

- **Half Flush (0.8 GPF):** Press the smaller button on the matte black flush mechanism for liquid waste. This conserves water.

- **Full Flush (1.6 GPF):** Press the larger button for solid waste. This provides a more powerful flush.

Double Cyclone Flushing System:

The bowl is designed with a double cyclone flushing system, which creates a powerful whirlpool action. This system efficiently cleans the entire bowl surface, reducing the need for manual cleaning and ensuring hygienic operation.

Image: Illustration of the Double Cyclone Flushing Bowl in action, showing the powerful whirlpool effect for thorough cleaning. This system is designed to be quiet, water-efficient, and reduce trapped dirt, making it easy to clean and more hygienic.

MAINTENANCE

Regular maintenance will ensure the longevity and optimal performance of your WinZo toilet.

Cleaning:

- Clean the exterior and interior of the toilet regularly with a mild, non-abrasive bathroom cleaner.
- The double cyclone flushing system helps keep the bowl clean, but occasional brushing may still be necessary for stubborn stains.
- Avoid using harsh chemicals or abrasive scrubbers that could damage the porcelain finish.

Soft-Close Seat:

- The soft-close seat is designed for quiet operation and easy removal. To remove for cleaning, press the quick-release

- buttons (if applicable) and lift the seat.
- Clean the seat and hinges with a damp cloth and mild soap.
- Ensure the seat is properly re-attached after cleaning.

TROUBLESHOOTING

This section addresses common issues you might encounter with your WinZo toilet.

Problem	Possible Cause	Solution
Toilet does not flush or flushes weakly.	Low water level in tank, clogged siphon jet or rim holes, faulty flush valve.	Check water supply valve. Ensure fill valve is set correctly. Inspect and clean siphon jet/rim holes. Consult a plumber if flush valve is faulty.
Toilet constantly runs or leaks.	Faulty flapper/flush valve seal, fill valve malfunction, water level too high.	Inspect flapper for wear or debris. Adjust fill valve to lower water level if necessary. Replace faulty components.
Toilet seat clicks or flexes when sat upon.	Insufficient support bumpers on the seat.	Consider adding additional rubber bumpers to the underside of the toilet seat, particularly near the front, to provide more support and eliminate clicking.
Difficulty tightening flange bolts during installation.	Limited access through side holes of the one-piece design.	Ensure ample working space around the toilet during installation. Use specialized tools or techniques for tight spaces. Marking bolt locations on the floor before setting the toilet can aid alignment.

SPECIFICATIONS

Attribute	Detail
Model Number	WZ5079WB
Brand	WinZo
Color	White (WZ5079 with Black Button)
Product Dimensions	23"D x 15"W x 29.13"H
