TECHNOVIEW Holder-Camera

TECHNOVIEW Spy HD WiFi Hidden 1080P Bulb Holder Camera User Manual

MODEL: HOLDER-CAMERA

Brand: TECHNOVIEW

1. Product Overview

The TECHNOVIEW Spy HD WiFi Hidden 1080P Bulb Holder Camera is a discreet security device designed for indoor surveillance. It integrates a high-definition camera into a standard bulb holder, allowing for continuous monitoring of your home, office, or other personal spaces.
Key features include:

- **2-in-1 Design:** Functions as both a bulb holder and a surveillance camera.
- **HD 1080P Video:** Provides clear image and video quality with remote viewing capabilities.
- **Night Vision:** Offers clear visibility in low-light or dark conditions.
- **Loop Recording:** Automatically overwrites older files when the memory card is full, ensuring continuous recording.
- **Wi-Fi Connectivity:** Enables remote viewing and control via a smartphone application.

2. Setup Instructions

Follow these steps to set up your TECHNOVIEW Bulb Holder Camera:

1. **Power Connection:** Ensure the camera is connected to a 220 Volt AC power supply. This device operates directly from the mains power.

2. **Micro SD Card Insertion:** Locate the Micro SD card slot on the device. Gently insert a Micro SD card (up to 128 GB capacity) for video storage. Ensure it is inserted correctly until it clicks into place.
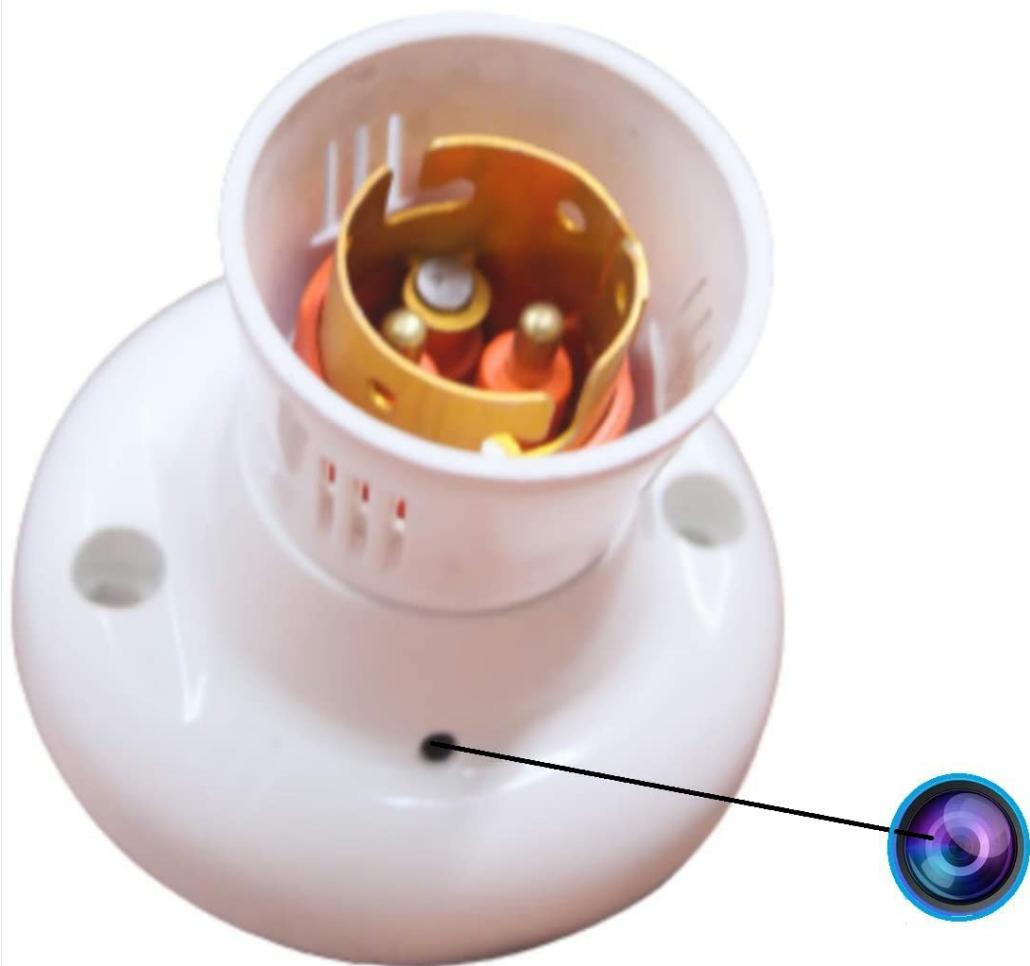

Figure 2.1: Close-up view of the camera lens on the bulb holder, indicating the discreet placement.

3. **App Installation:** Download and install the **LOOKCAM PRO APP** on your smartphone. This app is available for Android devices.

4. **Device Pairing:** Open the LOOKCAM PRO APP and follow the in-app instructions to connect your camera to your home or office Wi-Fi network. This typically involves scanning a QR code or connecting to the camera's temporary Wi-Fi hotspot.

3. Operating Instructions

Once set up, you can operate your camera using the LOOKCAM PRO APP:

- **Live View:** Open the LOOKCAM PRO APP to access the live video feed from your camera. You can switch between 1080P and 720P resolution as needed.

Figure 3.1: Remote viewing of the camera feed on a smartphone, accessible anytime, anywhere.

- **Video Recording:** The camera supports continuous loop recording. When the Micro SD card is full, the newest files will automatically overwrite the oldest files. Video files are saved in 10-minute segments.

- **Night Vision:** The camera is equipped with night vision technology, providing clear surveillance even in complete darkness.

- **Photo Capture:** Use the app to take still photos from the live video feed.

- **Playback:** Access recorded videos and photos directly through the LOOKCAM PRO APP. Files can also be downloaded to your phone or computer for review.

4. Maintenance

To ensure optimal performance and longevity of your TECHNOVIEW Bulb Holder Camera, consider the following maintenance tips:

- **Cleaning:** Gently wipe the camera lens and exterior with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials that could damage the device.
- **Power Supply:** Ensure a stable 220V AC power supply. Fluctuations can affect performance.
- **Memory Card Management:** While the camera features loop recording, it is advisable to periodically back up important footage from the Micro SD card to another storage device.
- **Firmware Updates:** Check the LOOKCAM PRO APP regularly for any available firmware updates for your camera. Updates can improve performance and add new features.

5. Troubleshooting

If you encounter issues with your TECHNOVIEW Bulb Holder Camera, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
Camera not powering on / **Not working**	Ensure the camera is securely connected to a 220V AC power source. Check the power outlet for functionality.
Interrupted recording / **Wireless connection issues**	Verify your Wi-Fi network is stable and within range of the camera. Restart your Wi-Fi router and the camera. Ensure the LOOKCAM PRO APP is updated to the latest version. Check the Micro SD card for errors or if it's full (though loop recording should manage this). Try reformatting the card or using a different one.
Not covering full area / **Limited view**	The camera has a 90-degree viewing angle. Ensure the camera is positioned optimally to cover the desired area. Consider the camera's fixed position and adjust its mounting location if a wider field of view is required.
App not connecting to camera	Ensure your smartphone is connected to the same Wi-Fi network as the camera. Restart both the app and the camera. Re-pair the device through the app if necessary.

6. Specifications

Feature	Detail
Model	Holder-Camera
Mounting Type	Embedded
Video Capture Resolution	4K, 1080p
Colour	White
Wireless Communication Technology	Wi-Fi
