podofo 4G+64G Android 13 Car Stereo Instruction Manual

For Honda Odyssey 2005-2010

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your podofo 4G+64G Android 13 Car Stereo. This unit is specifically designed for Honda Odyssey models manufactured between 2005 and 2010, offering an upgraded in-car entertainment and navigation experience with a 10.1-inch IPS touchscreen, wireless CarPlay, and Android Auto functionality.

VEHICLE COMPATIBILITY

This car stereo is compatible with Honda Odyssey models from 2005 to 2010. It is designed for a direct fit and includes a plug-and-play wiring harness for simplified installation.

Important Compatibility Note

This product does **not** support vehicles equipped with a factory-installed central control unit featuring a large screen or original car navigation system. Please verify your vehicle's dashboard configuration before installation.

PLEASE NOTE

This product does not support the central control with large screen.

WHAT'S IN THE BOX

The package includes the following components:

- Android Car Stereo Unit
- GPS Antenna
- External Microphone
- HD Backup Camera
- RCA Cable Set
- USB Cable
- Power Cable
- Rear Camera Input Cable
- Installation Tool (typically plastic pry tools)

SETUP AND INSTALLATION

Before beginning installation, ensure your vehicle's battery is disconnected to prevent electrical damage. Refer to your vehicle's service manual for specific dashboard removal procedures.

Wiring Connections

1. **Power Cable:** Connect the main power harness to the vehicle's wiring. The included harness is designed for plug-and-play installation for Honda Odyssey 2005-2010.
2. **RCA Cables:** Connect audio output (FR, FL, RR, RL), auxiliary input (AUX R IN, AUX L IN), subwoofer output, and video output as needed for external amplifiers or monitors.
3. **USB Cables:** Connect the provided USB cables for external USB devices.
4. **Radio Antenna:** Connect the vehicle's radio antenna to the unit.
5. **GPS Antenna:** Mount the GPS antenna in a location with a clear view of the sky, such as on the dashboard or under the windshield.
6. **External Microphone:** Connect the external microphone for improved call quality and voice commands. Position it near the driver for optimal performance.
7. **Rear Camera Input:** Connect the HD backup camera cable to the designated input. Ensure the camera's power and ground wires are correctly connected, typically to the vehicle's reverse light circuit.
8. **Steering Wheel Control (SWC):** The unit supports steering wheel controls. Connect the SWC wires according to the wiring diagram. The system may require a learning process for the controls to function correctly.

IPS HD Screen

Image: Comprehensive wiring diagram illustrating all necessary connections for the car stereo, including power, audio, video, USB, GPS, and backup camera inputs.

Dashboard Integration

Once all wiring is connected, carefully mount the car stereo unit into the dashboard opening. Secure it using the appropriate mounting brackets and screws. Reassemble the dashboard trim panels.

OPERATING INSTRUCTIONS

Power On/Off

Press and hold the power button (usually located on the front panel or screen) to turn the unit on or off. A short press typically mutes or unmutes the audio.

Touchscreen Interface

The unit features a responsive 10.1-inch IPS touchscreen. Navigate through menus and applications by tapping, swiping, and pinching gestures, similar to a smartphone or tablet.

Wireless CarPlay / Android Auto

Connect your compatible iOS or Android smartphone wirelessly to access navigation, music, calls, and other apps directly on the car stereo display. Follow the on-screen prompts to pair your device via Bluetooth and Wi-Fi.

GPS Navigation & WiFi

The unit comes with a built-in offline map application. Connect to a Wi-Fi network or mobile hotspot to use online navigation services and download additional map data. The Wi-Fi connection also enables access to the application store for downloading Android apps.

Bluetooth Functions

Pair your phone via Bluetooth 5.0 for hands-free calling and audio streaming. Access your phone's contact list and call history directly from the stereo.

FM/RDS Radio

Tune into your favorite FM radio stations. The RDS (Radio Data System) feature displays station information, song titles, and other relevant data where available.

Multimedia Playback

Play audio and video files from connected USB devices. The unit supports various formats. The 32-band DSP audio processor allows for precise sound adjustments to optimize your listening experience.

Backup Camera Display

When the vehicle is shifted into reverse, the display automatically switches to the view from the connected HD backup camera, providing parking assistance with guidelines.

AHD BACKUP CAMERA

MAINTENANCE

To ensure the longevity and optimal performance of your car stereo, follow these maintenance guidelines:

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- **Software Updates:** Periodically check for available software updates to ensure the system has the latest features and bug fixes. Updates can typically be performed via Wi-Fi.
- **Environmental Conditions:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.
- **Cable Connections:** Periodically check all cable connections to ensure they are secure and free from corrosion or damage.

TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on	Loose power connection, blown fuse, vehicle battery issue.	Check power cable connections. Inspect vehicle fuses. Ensure vehicle battery is charged.
No sound	Volume muted, incorrect audio source, loose speaker wires, amplifier issue.	Check volume and mute settings. Select correct audio source. Verify speaker wire connections.
Backup camera not displaying	Incorrect camera wiring, faulty camera, reverse signal not detected.	Verify camera power and video signal connections. Ensure the reverse trigger wire is correctly connected.
Wi-Fi disconnects frequently	Weak signal, interference, software glitch.	Ensure strong Wi-Fi signal. Try restarting the unit. Check for software updates.

Problem	Possible Cause	Solution
Steering wheel controls not working	Incorrect wiring, controls not programmed.	Verify SWC wiring. Access the steering wheel control learning function in the unit's settings to program the buttons.
System is slow or unresponsive	Too many apps running, low memory, software issue.	Close unnecessary applications. Restart the unit. Perform a factory reset if issues persist (note: this will erase all data).

SPECIFICATIONS

Feature	Detail
Brand	podofa
Operating System	Android 13
RAM	4GB
ROM (Internal Storage)	64GB
