3.4. Learning Power and Volume Functions (Function 4)

To control your TV's power and volume using the Yimaut remote, you must program these functions from your original TV remote control. This process requires your old TV remote to be functional.

1. Ensure both the Yimaut remote and your original TV remote have working batteries.
2. Place the Yimaut remote and your original TV remote face-to-face, approximately 1 inch apart.
3. On the Yimaut remote, press and hold the **Power** button until the indicator light begins to flash slowly.
4. While the indicator light is flashing, press the **Power** button on your original TV remote. The Yimaut remote's indicator light should flash rapidly, then turn solid, indicating successful learning.
