## MAINTENANCE

---

To maintain the appearance and structural integrity of your bed frame, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the metal surfaces with a dry cloth to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners, as these may damage the powder-coated finish.
- **Fastener Check:** Periodically inspect all bolts and screws to ensure they remain tight. Re-tighten as necessary to prevent wobbling or squeaking.
- **Avoid Excessive Weight:** Do not place excessive weight on the frame beyond its stated capacity of 800 pounds.

## TROUBLESHOOTING

---

If you encounter any issues with your HOOMIC Metal Platform Bed Frame, refer to the following common solutions:

- **Squeaking Noises:** If the bed frame begins to squeak, check all connections and tighten any loose bolts or

screws. Ensure the noise-free foam strips are properly positioned between the slats and the mattress.

- **Mattress Sliding:** If your mattress slides, verify that the sticky tape on the slats is clean and making proper contact with the mattress. You may also consider using a non-slip mattress pad.
- **Instability/Wobbling:** Ensure the bed frame is assembled on a flat, even surface. Re-check all connections and tighten all hardware. Verify that all support legs are making firm contact with the floor.
