REVLON RVST2211

REVLON SmoothStay 1 Inch Hair Straightener User Manual

Model: RVST2211

PRODUCT OVERVIEW

The REVLON SmoothStay 1 Inch Hair Straightener is designed to provide visibly shinier, smoother hair with reduced frizz and static. It features triple-coated ceramic plates infused with coconut oil and ceramic tourmaline ionic technology for enhanced hair health and sleek results. Heat-sensing technology ensures even heat distribution for faster styling and reduced heat damage.

Key Features:

- **Coconut Oil Infused Ceramic Plates:** Enhances shine, safeguards hair, and reduces frizz and static.
- **Ceramic Tourmaline Ionic Technology:** Locks in moisture and further reduces frizz and static.
- **1" Floating Plates:** Provides a 30% smoother glide and prevents crease marks.
- **10 Precise Heat Settings:** Customizable temperatures up to 430°F (221°C) suitable for all hair types.
- **Dual Voltage (120V/240V):** Travel-ready for international use.
- **Automatic Shut-off:** Powers off after 1 hour of non-use for safety.
- **6ft Tangle-Free Swivel Cord:** Offers flexibility and ease of use.
- **Precise LED Temperature Display:** Easy monitoring of heat settings.
- **Accessible On-Off Button:** Simple operation.

Beautiful, Salon-Worthy Hair

SAFETY INFORMATION

For external use only. Always exercise caution when using heat styling tools.

- Do not use near water or while bathing/showering.
- Keep away from children.
- Ensure the appliance is unplugged when not in use.
- Allow the straightener to cool completely before storing.
- Do not wrap the cord around the appliance as this may damage the cord.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent to avoid a hazard.

SETUP

1. Unpack the REVLON SmoothStay straightener and ensure all components are present and undamaged.

2. Remove any protective coverings or labels from the plates.
3. Plug the straightener into a suitable electrical outlet (120V or 240V, depending on your location).

OPERATING INSTRUCTIONS

First-Time Use:

When using the styling iron for the first time, select the **LOWEST** heat setting (180°F) and test it on one small section of hair for 5 to 8 seconds. If you desire a higher setting, gradually increase the temperature. Never style hair for the first time on a high setting as this may cause damage. Use only the necessary heat for effective styling.

General Use:

1. Ensure hair is clean, dry, and detangled before styling.
2. Press the accessible on-off button to power on the straightener. The LED display will illuminate.
3. Use the temperature control buttons (+/-) to select your desired heat setting. The LED lights will indicate the chosen temperature.
4. Allow the straightener to heat up. The heat-sensing technology will quickly bring the plates to the selected temperature.
5. Section your hair into manageable portions.
6. Place a section of hair between the plates, close to the roots.
7. Gently glide the straightener down the hair section from root to tip in a smooth, continuous motion.
8. Repeat for all sections of hair until desired straightness or curl is achieved. The rounded edges allow for easy straightening or curling.
9. After use, press and hold the on-off button to power off the straightener. Unplug the appliance from the outlet.
10. Allow the straightener to cool down completely on a heat-resistant surface before storing.

Fast, Flawless Styling!

SMOOTHSTAY™

Heat-sensing technology maintains even heat for **faster styling** with **less damage**

MAINTENANCE

- Always unplug the straightener and allow it to cool completely before cleaning.
- Wipe the plates and exterior with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Ensure the straightener is completely dry before storing or reusing.
- Store in a dry, safe place, away from moisture and extreme temperatures.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Straightener does not heat up.	Not plugged in correctly; Power outlet issue; Appliance malfunction.	Ensure the straightener is securely plugged into a working outlet. Check the circuit breaker. If the issue persists, contact customer support.
Hair is not straightening effectively.	Temperature setting too low; Hair is not fully dry; Sections are too large.	Increase the temperature setting gradually. Ensure hair is completely dry. Work with smaller, more manageable sections of hair.
Hair feels static or frizzy after styling.	Hair not fully dry; Product buildup on plates; Hair type requires higher heat.	Ensure hair is completely dry. Clean the ceramic plates. Experiment with a slightly higher temperature setting, following first-time use guidelines.
Automatic shut-off activates too soon.	Appliance has been inactive for 1 hour.	This is a safety feature. Simply turn the straightener back on if you need to continue styling.

SPECIFICATIONS

- **Model Number:** RVST2211
- **Product Dimensions:** 2.2 x 4.6 x 4.6 inches
- **Weight:** 14.88 ounces
- **Material:** Ceramic
- **Hair Type Compatibility:** All
- **Temperature Settings:** 10 precise settings (180°F - 430°F)
- **Voltage:** Dual Voltage (120V/240V)
- **Cord Length:** 6 feet
- **Country of Origin:** China
- **UPC:** 761318022114, 761318822110
