Arcmira HB-80A

Arcmira Automatic Nut Milk Maker User Manual

Model: HB-80A

1. Product Overview

The Arcmira Automatic Nut Milk Maker is designed to effortlessly create fresh, homemade plant-based and dairy-free beverages. With a 20oz (600mL) capacity, it allows you to make milk from various nuts, seeds, grains, and beans, offering an economical and environmentally friendly alternative to store-bought options. Beyond milk, it can also prepare smoothies and hot or cold plant-based drinks.

2. Product Components

Your Arcmira Nut Milk Maker comes with the following components:

- **Nut Milk Maker Unit:** The main appliance with integrated controls and heating element.
- **Lid:** Features a safety sensor to ensure proper operation.
- **Nut Milk Bag:** For straining pulp from homemade milks.
- **Cleaning Brush:** For easy cleaning of the internal components.
- **Measuring Spoons:** For accurate ingredient measurement.
- **Recipe Book:** Contains various recipes for plant-based milks and beverages.

3. Setup and First Use

Before first use, ensure all components are clean. Wash the internal stainless steel liner and lid with warm soapy water, then rinse thoroughly. Do not immerse the main unit in water.

Basic Steps:

1. **Prepare Ingredients:** Add your desired nuts, seeds, or grains into the stainless steel liner. Refer to the recipe book for recommended quantities.
2. **Add Water:** Pour water into the liner, ensuring it is between the MIN and MAX fill lines indicated inside the unit.
3. **Secure Lid:** Place the lid firmly on the unit and twist to lock it into place. The machine will display an "E2" error code if the lid is not properly secured, indicating it cannot operate for safety.
4. **Plug In:** Connect the power cord to a suitable electrical outlet. The LED panel will illuminate.

4. Operating Instructions

The Arcmira Nut Milk Maker features a user-friendly digital touch control panel with various functions to suit your beverage needs.

Control Panel Overview:

Figure 4: Control Panel

Functions:

- **Room Temp:** Ideal for chilled nut milks like almond milk. The machine will blend for 5 minutes.
- **Warm (140°F):** For warm beverages. The machine will heat to 140°F and blend for 3 minutes.
- **Hot (212°F):** Suitable for making soy and rice milk. The machine will heat to 212°F and blend for 13 minutes.
- **Boil Water:** Heats water to 212°F.
- **Keep Warm:** Maintains a constant temperature of 140°F for up to 6 hours.
- **Delay Start:** Allows you to set a delayed start time for up to 18 hours.
- **Self Clean:** Initiates a 60-second rinse cycle for easy cleaning.

How to Use:

1. After plugging in, press the **Menu/Cancel** button to cycle through the desired function. The selected function's light will illuminate.

2. Once the desired function is selected, the machine will automatically begin the process after a few seconds.
3. The LED display will show a countdown timer.
4. When the program is complete, the machine will beep.

5. Recipes

Your Arcmira Nut Milk Maker includes a comprehensive recipe book to guide you in creating a variety of delicious plant-based milks and beverages. Some popular recipes include:

- Homemade Almond Milk
- Homemade Cashew Milk
- Homemade Coconut Milk
- Homemade Walnut Milk
- Homemade Hazelnut Milk
- Homemade Hemp Milk
- Homemade Oat Milk
- Homemade Rice Milk
- Homemade Soy Milk
- Strawberry Banana Smoothies
- Homemade Hot Chocolate

Experiment with different ingredients and adjust ratios to suit your taste. The built-in quadrilateral stirring column ensures smooth blending for a creamy texture.

6. Maintenance and Cleaning

Regular cleaning ensures the longevity and optimal performance of your Arcmira Nut Milk Maker.

Self Clean Function:

For quick and easy cleaning, use the **Self Clean** function. Add water to the unit, a tiny drop of dish soap, and select the Self Clean mode. The machine will run a 60-second rinse cycle. After the cycle, rinse the unit thoroughly with clean water.

Manual Cleaning:

- Always unplug the power cord before cleaning.

- Wipe the machine body with a wet towel. Do not immerse the main unit in water to avoid electrical damage.
- For the internal stainless steel liner, use the provided cleaning brush to scrub away any residue. For stubborn residue, a mild detergent can be used.
- The lid can be rinsed directly under water.
- Ensure all parts are completely dry before storage.

7. Troubleshooting

Refer to the table below for common issues and their resolutions:

Problem	Possible Cause	Resolution
Machine does not work / E2 code	Lid is not closed correctly or power cord is loose.	Ensure lid is securely closed and power cord is firmly plugged in.
Liquid boils over	Too much water or ingredients.	Reduce water/ingredients to below MAX line. Ensure proper ratios.
Abnormal heating / Motor not working	Overheating protection activated or motor overload.	Unplug the machine, let it cool for 5-10 minutes, then try again. Ensure ingredients are not too thick.
Milk is too thick/thin	Incorrect ingredient-to-water ratio.	Adjust the amount of ingredients or water according to desired consistency.

If you encounter any issues not listed here, please contact customer support for assistance.

8. Specifications
