1. **Unpacking:** Carefully remove the machine and all accessories from the packaging. Retain the packaging for future

storage or transport.

2. **Placement:** Place the machine on a stable, flat surface with adequate lighting. Ensure there is enough space for fabric movement around the machine.
3. **Power Connection:** Insert the foot pedal plug into the machine's receptacle, then connect the power cord to a suitable electrical outlet.
4. **Threading the Machine:** Refer to the threading diagrams usually found on the machine itself or in the quick start guide. Ensure the bobbin is correctly wound and inserted into its case.
5. **Needle Installation:** Insert the correct needle type for your fabric, ensuring it is fully seated and tightened with the needle clamp screw.

Operating Instructions

Basic Sewing

1. **Selecting a Stitch:** Turn the stitch selector dial to choose your desired stitch pattern. The machine offers 16 different stitch patterns.
2. **Adjusting Stitch Length:** Use the stitch length dial to set the desired length, up to 4 mm.

Working with Different Fabrics

The Janome EASY JEANS is designed to work with light, medium, and heavy fabrics, including denim. For best results:

- Use appropriate needle size and type (e.g., denim needles for heavy fabrics).
- Adjust tension settings as needed for fabric thickness.
- Test stitches on a scrap piece of your fabric before sewing the main project.

Maintenance

Regular maintenance will help keep your sewing machine in optimal working condition:

- **Cleaning:** Regularly clean lint and dust from the bobbin case area and feed dogs using a small brush. Always unplug the machine before cleaning.
- **Oiling:** Refer to your machine's specific oiling points in the detailed manual (if provided separately). Do not over-oil.
- **Needle Replacement:** Replace needles frequently, especially if they become bent, dull, or if you notice skipped stitches.
- **Storage:** When not in use, cover the machine to protect it from dust. Store in a dry place away from direct sunlight or extreme temperatures.

Troubleshooting

This section provides solutions to common issues you might encounter:

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Skipped Stitches	Incorrect needle, bent needle, improper threading.	Replace needle with the correct type and size, check for bends, re-thread machine carefully, ensure needle is fully inserted.
Thread Breaking	Incorrect tension, poor quality thread, burr on needle plate, needle inserted incorrectly.	Adjust tension settings, use good quality thread, check for burrs on the needle plate and remove if found, re-insert needle correctly.
Machine Not Sewing	Machine unplugged, bobbin winder engaged, foot pedal not connected properly.	Check power connection, ensure bobbin winder is disengaged, verify foot pedal is securely connected to the machine.
