## Cyber Acoustics DS-1000

# Cyber Acoustics DS-1000 USB-C Laptop Docking Station User Manual

## INTRODUCTION

Thank you for choosing the Cyber Acoustics DS-1000 USB-C Laptop Docking Station. This manual provides detailed instructions for setting up, operating, and maintaining your docking station to optimize your workspace and connectivity.

## What's Included

- CA Essential Laptop Docking Station (DS-1000)
- 130-Watt Dual Voltage (120/230V) AC Power Adapter
- User Guide

## PRODUCT OVERVIEW

The Cyber Acoustics DS-1000 is designed to streamline your workspace by providing comprehensive connectivity through a single USB-C cable. It features a variety of ports for peripherals, external displays, and network access, while also delivering power to your laptop.

### Front Panel Features

- **1x USB-A 3.2 Gen 2 Port:** For connecting USB-A devices.
- **1x USB-C 3.2 Gen 2 Port:** For connecting USB-C devices.

### Rear Panel Features

- **2x HDMI Ports:** Supports dual 4K@60Hz displays.
- **1x RJ-45 Gigabit Ethernet Port:** For stable wired network connection.
- **4x USB-A 3.2 Gen 2 Ports:** For connecting additional USB-A devices.
- **Power Input:** For connecting the 130-Watt AC power adapter.
- **Integrated Security K-Slot:** For securing the docking station (lock cable not included).

## Connecting the Docking Station

1. Connect the 130-Watt AC Power Adapter to the power input port on the rear of the docking station, then plug the adapter into a wall outlet.
2. Connect the integrated USB-C cable from the docking station to your laptop's USB-C or Thunderbolt 3 port.
3. Connect your external monitors to the HDMI ports on the rear of the docking station using HDMI cables.
4. Connect any USB peripherals (keyboard, mouse, external drives) to the available USB-A or USB-C ports on the docking station.
5. For a wired network connection, connect an Ethernet cable from your router or network switch to the RJ-45 Gigabit Ethernet port on the rear of the docking station.

# Comprehensive Connectivity

## 2 External Displays, Ethernet, 5 USB-A and 1 USB-C

Image: The Cyber Acoustics DS-1000 docking station connected to a laptop and various peripherals, illustrating a typical setup.

### Dual Display Configuration

- **Windows 10 or 11:** The docking station supports extended displays for both connected monitors, allowing you to expand your desktop across multiple screens.
- **Mac OS:** Supports extended display on one monitor and mirroring on the other.

## Dual 4K HDMI Displays

Extended displays with dual monitors

### Power Delivery

When connected to your laptop via the USB-C cable, the CA Essential Laptop Docking Station charges your laptop with up to 90-Watt power delivery. The included 130-Watt dual voltage power adapter ensures sufficient power for both the docking station and your laptop.

Image: A laptop connected to the docking station, with an icon indicating 96W power delivery to charge the laptop.

## MAINTENANCE

- Keep the docking station in a clean, dry environment.
- Avoid exposing the device to extreme temperatures or humidity.
- Clean the exterior with a soft, dry cloth. Do not use liquid cleaners or aerosols.
- Ensure proper ventilation around the docking station to prevent overheating.

## TROUBLESHOOTING

| Issue                                | Possible Solution                                                                                                                                                                                                                               |
|--------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| No display on external monitors.     | Ensure all HDMI cables are securely connected. Verify your laptop's display settings are configured for external monitors (extended or mirrored). Check that the docking station is powered on.                                                 |
| Laptop is not charging.              | Confirm the 130-Watt AC Power Adapter is correctly connected to the docking station and a working power outlet. Ensure the USB-C cable from the docking station is securely connected to your laptop's USB-C port that supports power delivery. |
| USB devices are not recognized.      | Try connecting the USB device to a different port on the docking station. Ensure the docking station is powered. Restart your laptop.                                                                                                           |
| No internet connection via Ethernet. | Check the Ethernet cable connection between the docking station and your router/switch. Verify network settings on your laptop. Restart your router/modem.                                                                                      |

## SPECIFICATIONS

| Feature            | Detail                                         |
|--------------------|------------------------------------------------|
| Model Number       | DS-1000                                        |
| Product Dimensions | 6.3"L x 3.3"W x 0.9"H (15.88 x 8.26 x 2.29 cm) |
| Item Weight        | 2.3 pounds (1.04 kg)                           |
| Total USB Ports    | 6 (5x USB-A 3.2 Gen 2, 1x USB-C 3.2 Gen 2)     |

| Feature            | Detail                                               |
|--------------------|------------------------------------------------------|
| Total HDMI Ports   | 2 (Dual 4K@60Hz support)                             |
| Ethernet Port      | 1x RJ-45 Gigabit Ethernet                            |
| Power Delivery     | Up to 90 Watts to laptop                             |
| Power Adapter      | 130-Watt Dual Voltage (120/230V) AC                  |
| Hardware Interface | Thunderbolt, USB                                     |
| Compatible Devices | USB-C with DisplayPort (DP Alt Mode) enabled laptops |
| Compliance         | TAA Compliant                                        |
