Sembo Block Famous Car 2 Donlup (607030) Building Kit Instruction Manual

Model: 607030 | Brand: Sembo Block

INTRODUCTION

This instruction manual provides detailed guidance for the assembly, operation, and maintenance of your Sembo Block Famous Car 2 Donlup (607030) building kit. Please read all instructions carefully before beginning assembly to ensure a correct and enjoyable building experience.

This kit is designed to enhance creativity, fine motor skills, and STEM knowledge through hands-on construction. It includes components to build multiple models, offering varied challenges and learning opportunities.

SAFETY INFORMATION

- **Recommended Age:** This product is suitable for ages 6 to 18 years. Small parts may pose a choking hazard for younger children.
- **Adult Supervision:** Adult supervision is recommended during assembly and play, especially for younger users.
- **Material:** All components are made from plastic. Do not expose to extreme heat or open flames.
- **Handling:** Handle small pieces with care to prevent loss.

SETUP AND ASSEMBLY

Your Sembo Block kit includes all necessary pieces to construct various models. Follow the included pictorial instructions for step-by-step assembly.

1. **Unpack Components:** Carefully open the packaging and lay out all the building blocks. Verify that all pieces are present according to the parts list provided in the separate instruction booklet.
2. **Prepare Workspace:** Use the double-sided playing mat provided in the kit as a clean and organized surface for assembly. This helps prevent pieces from getting lost.
3. **Follow Instructions:** Refer to the dedicated assembly booklet for detailed, step-by-step instructions for each of the 7 main models and the bonus model. Each model has its own specific building sequence.
4. **Connect Blocks:** Firmly press the blocks together to ensure secure connections. If a piece does not fit easily,

check its orientation and ensure it is the correct part for that step.

5. **Multiple Models:** This kit allows for the construction of a car, airplane, motorcycle, helicopter, tractor, forklift, and buggy, plus an additional bonus model. You can build one model at a time, then disassemble to build another.

OPERATING AND PLAY

Once assembled, the Sembo Block models are ready for imaginative play. This kit is designed to encourage creative thinking and problem-solving.

- **Creative Play:** Engage in imaginative scenarios with the built models. The various vehicle types allow for diverse play experiences.
- **STEM Learning:** Encourage exploration of basic engineering principles, spatial awareness, and cause-and-effect through building and interacting with the models.
- **Disassembly and Reassembly:** The blocks are designed for repeated assembly and disassembly, allowing users to build all 7+1 models. This process reinforces fine motor skills and understanding of construction.

MAINTENANCE AND STORAGE

Proper care and storage will extend the life of your Sembo Block kit and ensure all pieces remain available for future builds.

- **Cleaning:** To clean the blocks, wipe them with a damp cloth. For stubborn dirt, a mild soap solution can be used, followed by thorough rinsing and air drying. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** After play, disassemble the models and store all blocks in the sturdy plastic box provided. The box features a safety lock and handle for secure and convenient storage, preventing pieces from getting lost.
- **Avoid Extreme Conditions:** Do not store the blocks in direct sunlight or in areas with extreme temperatures, as this may cause material degradation or warping.

TROUBLESHOOTING

If you encounter any issues during assembly or play, refer to the following common solutions:

- **Missing Pieces:** Double-check the packaging and your workspace. If a piece is genuinely missing, contact customer support (see "Support" section).
- **Difficulty Connecting Blocks:** Ensure the blocks are correctly aligned and oriented. Apply firm, even pressure. If a block still doesn't fit, verify it is the correct piece for that step in the instructions.
- **Model Instability:** Review the assembly steps for the specific section that is unstable. Ensure all connections are firm and that no steps were skipped or incorrectly performed.
