ASSEMBLY INSTRUCTIONS

Assembling your Larcele Micro Building Blocks model requires patience and attention to detail. Please follow these guidelines:

1. **Review Instructions:** Carefully read through the entire instruction manual provided in the box before beginning assembly.
2. **Organize Pieces:** Due to the tiny size of the bricks, it is highly recommended to sort them by color and shape. This will significantly aid in the assembly process.
3. **Use Tweezers (Recommended):** The bricks are very small. Using a pair of fine-tipped tweezers (not included) can greatly assist in handling and placing the pieces accurately.
4. **Layer-by-Layer Assembly:** The model is designed to be built layer by layer. Follow the diagrams in the included instruction booklet precisely. Each diagram illustrates a specific layer or step.
5. **Identify Connection Points:** Pay close attention to the diagrams to identify the exact connection points for each brick. Ensure each piece is firmly pressed into place.
6. **Patience is Key:** The assembly process can be intricate and may take time. Be patient, especially during the initial layers. It often becomes easier as the structure takes shape.
