Ariete 418

Ariete Breakfast 418 Electric Citrus Juicer User Manual

Model: 418

1. Introduction

Thank you for choosing the Ariete Breakfast 418 Electric Citrus Juicer. This manual provides essential information for the safe and efficient use, maintenance, and care of your appliance. Please read these instructions carefully before first use and keep them for future reference.

2. Safety Instructions

Always observe basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and personal injury.

- Ensure the voltage indicated on the appliance corresponds to your local mains voltage before connecting.
- Do not immerse the motor base in water or any other liquid.
- Unplug the appliance from the power outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Keep hands and utensils away from moving parts during operation.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction.
- Do not operate the appliance if the power cord or plug is damaged, or if the appliance malfunctions or has been damaged in any way.
- Use the appliance only for its intended purpose: juicing citrus fruits.

3. Product Overview and Components

Familiarize yourself with the parts of your Ariete Breakfast 418 Citrus Juicer:

1. **Motor Base:** Contains the electrical components and motor.
2. **Juice Container:** Collects the extracted juice. Features a drip-stop spout.
3. **Filter Grid:** Separates pulp and seeds from the juice.
4. **Large Cone:** For larger citrus fruits like oranges and grapefruits. Made of stainless steel.
5. **Small Cone with Pin:** For smaller citrus fruits like lemons and limes. The pin helps secure smaller fruits.
6. **Dust Cover:** Protects the cones and juicing mechanism when not in use.

4. Setup

Before first use, wash all removable parts (juice container, filter grid, cones, dust cover) in warm soapy water, rinse thoroughly, and dry. The motor base should only be wiped with a damp cloth.

1. Place the motor base on a stable, flat, and dry surface. The non-slip feet will help secure it.
2. Place the juice container onto the motor base, ensuring it is correctly seated.
3. Insert the filter grid into the juice container.
4. Select the appropriate cone for the size of the citrus fruit you intend to juice. For larger fruits, use the large cone. For smaller fruits, place the small cone onto the large cone, ensuring the pin aligns.

5. Place the selected cone(s) onto the central shaft of the filter grid.
6. Ensure the drip-stop spout is in the closed (upward) position if you wish to collect juice in the container, or open (downward) if you want to dispense directly into a glass.

5. Operating Instructions

Follow these steps to extract juice from citrus fruits:

1. Plug the power cord into a suitable electrical outlet. The integrated cable winder at the base helps manage the cord.
2. Cut the citrus fruit (orange, lemon, grapefruit, etc.) in half.
3. Place one half of the fruit onto the cone.
4. Press down firmly on the fruit. The motor will automatically start rotating. The juicer features double rotation, meaning the cone will rotate in both directions to maximize juice extraction.
5. Continue pressing and rotating the fruit until all juice is extracted.
6. Once juicing is complete, release the pressure on the fruit. The motor will stop.
7. If the drip-stop spout was closed, move it to the open (downward) position to dispense the juice into a glass or pitcher.
8. Repeat the process for additional fruit halves.

Image 5.1: Operating the juicer by pressing a citrus fruit half onto the cone.

6. Maintenance and Cleaning

Regular cleaning ensures optimal performance and extends the life of your juicer.

1. Always unplug the appliance before cleaning.
2. Disassemble all removable parts: dust cover, cones, filter grid, and juice container.
3. Wash these removable parts immediately after use to prevent pulp from drying and sticking. They can be washed by hand in warm soapy water or placed in the dishwasher.
4. Wipe the motor base with a damp cloth. Do not immerse the motor base in water or rinse it under running water.
5. Ensure all parts are completely dry before reassembling or storing the appliance.
6. Store the juicer with the dust cover in place to keep it clean.

7. Troubleshooting

If you encounter issues with your juicer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Juicer does not turn on.	Not plugged in; power outage; appliance not assembled correctly.	Check power connection; check circuit breaker; ensure all parts are correctly assembled and cone is pressed down.
Motor runs slowly or struggles.	Too much pressure applied; fruit too hard or large for cone.	Reduce pressure; ensure fruit is cut appropriately and the correct cone is used.
Juice leaks from the base.	Juice container not seated correctly; drip-stop spout open when not intended.	Re-seat the juice container; ensure drip-stop spout is in the closed position.
Pulp in juice.	Filter grid clogged or not properly installed.	Clean the filter grid; ensure it is correctly placed in the juice container.

If the problem persists after attempting these solutions, please contact customer support.

8. Specifications

Feature	Detail
Model Number	418
Brand	Ariete
Power	40W
Product Dimensions (L x W x H)	15 cm x 16.5 cm x 25.5 cm
Weight	1 kg

Feature	Detail
Special Features	Drip-stop spout, Double rotation, 2 cones (large stainless steel), Non-slip feet, Integrated cable winder
Care Instructions	Removable parts are dishwasher safe. Motor base wipe clean only.
Recommended Use	Citrus fruits
