5. TROUBLESHOOTING

- **Mattress not fully expanded:** The memory foam mattress requires 48-72 hours to fully regain its elasticity and reach its intended thickness after unpacking. This is normal and expected.
- **Bed feels unstable:** Ensure all support legs are fully extended and locked into place. Check that the wheel locks are engaged if you intend for the bed to remain stationary. Periodically tighten all frame connections.
- **Missing headboard/dust cover:** Please note that only the upgraded version of the Mjkone Folding Bed includes a headboard and dust cover. If you purchased the standard version, these components are not included.
- **Difficulty folding/unfolding:** Ensure no bedding or obstructions are preventing the frame from moving freely. Apply gentle, even pressure when folding or unfolding.
