WJYLM Professional Pressotherapy Lymphatic Drainage Machine User Manual

Model: f8476b89-c72e-49a9-9339-9d480487468f

1. Introduction

This manual provides comprehensive instructions for the safe and effective use of your WJYLM Professional Pressotherapy Lymphatic Drainage Machine. Please read this manual thoroughly before operating the device and retain it for future reference.

2. Safety Information

Your safety is paramount. Adhere to the following safety guidelines to prevent injury or damage to the device.

- **Water Exposure:** Keep the device and all its components away from water and moisture. Do not operate in wet environments.
- **Usage During Sleep:** Do not use the device while sleeping. Continuous use without supervision may pose risks.
- **Medical Consultation:** Consult a medical professional before using this device if you are pregnant, have a pre-existing medical condition, or are undergoing medical treatment.
- **Supervision:** This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- **Power Supply:** Use only the provided power adapter. Ensure the voltage matches your local power supply.
- **Maintenance:** Do not attempt to repair or modify the device yourself. Contact qualified service personnel for any repairs.

3. Product Components

The WJYLM Pressotherapy Machine typically includes the following components:

- **Control Unit:** The main device housing the pump, control panel, and power input.
- **Air Pressure Suit:** A garment designed to be worn around the legs or body, containing multiple air chambers.
- **Air Hoses/Tubes:** Connectors that transfer air pressure from the control unit to the suit.
- **Power Cable:** For connecting the control unit to an electrical outlet.

Figure 3.1: The air pressure suit, highlighting its dimensions (approximately 145cm length, 60cm width, 25cm foot width) and the connection points for air tubes. The suit features a waterproof PU material and an adjustable design.

Figure 3.2: A close-up view of the air pressure suit's material, showing its textured surface and robust construction, designed for durability and comfort.

4. Setup Instructions

Follow these steps to set up your pressotherapy machine for first use:

1. **Placement:** Place the control unit on a stable, flat surface, ensuring adequate ventilation around the device.
2. **Connect Air Hoses:** Identify the air hose connectors on the control unit (labeled 1, 2, etc.) and on the air pressure suit. Carefully insert the air hoses into the corresponding ports. Ensure a secure connection.

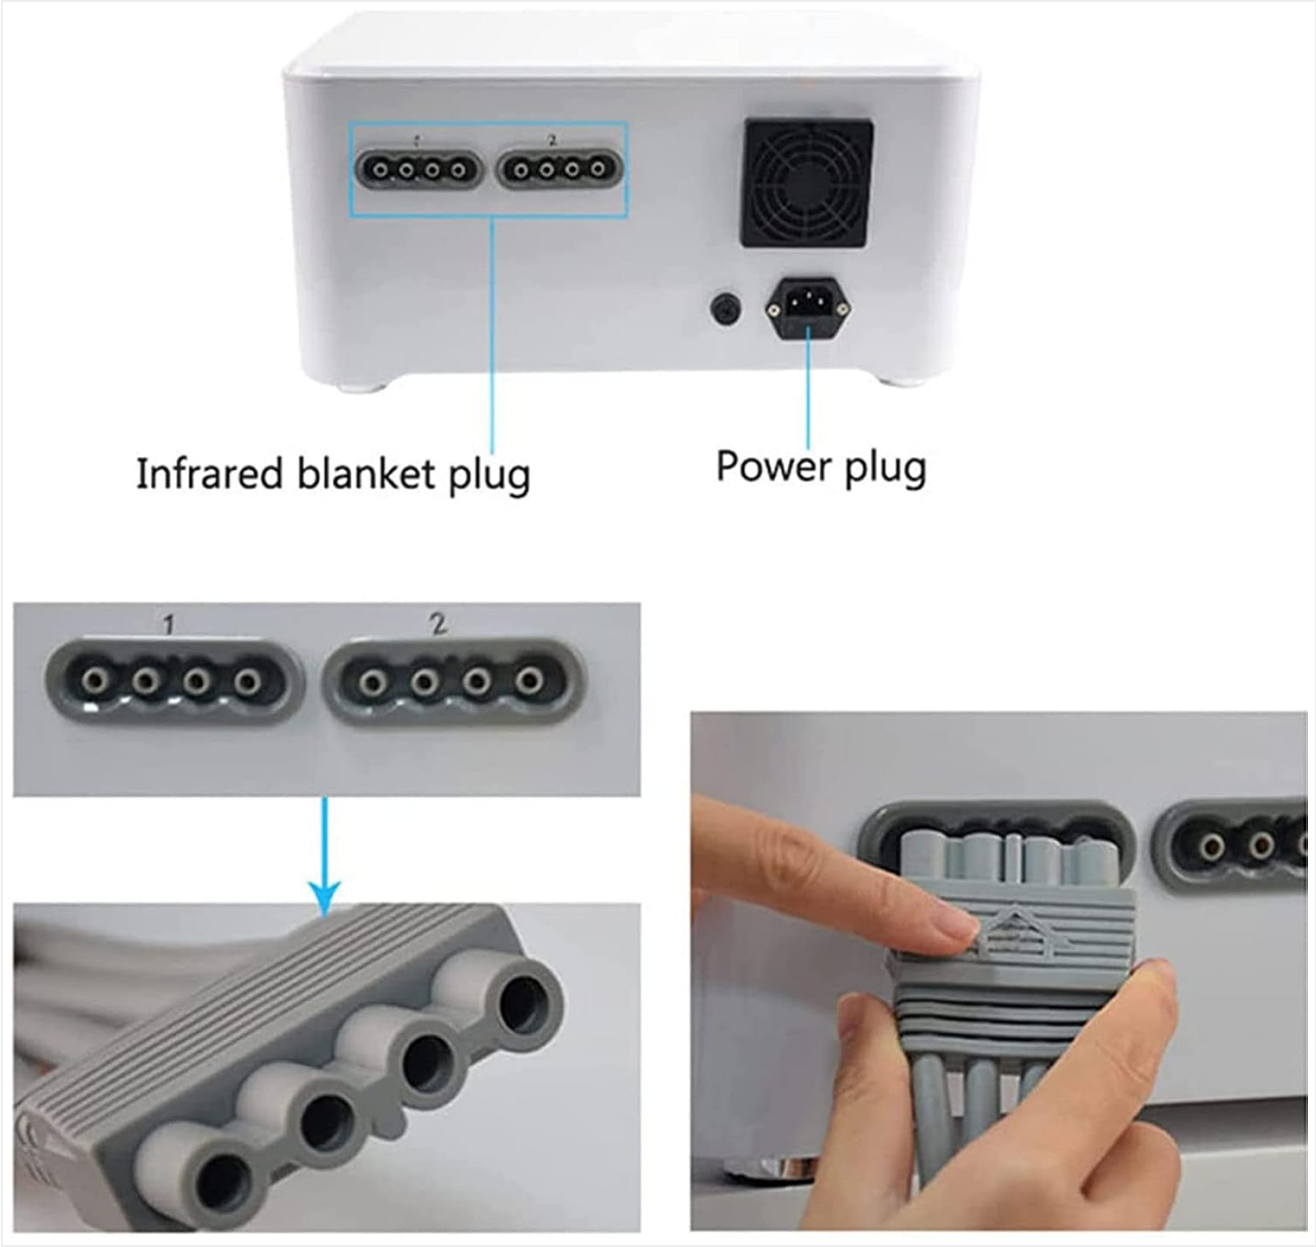

Figure 4.1: Rear view of the control unit, indicating the power plug and the ports for connecting air hoses (labeled 1 and 2).

3. **Connect Power:** Plug the power cable into the power input port on the back of the control unit, then plug the other end into a suitable electrical outlet.
4. **Prepare the Suit:** Lay the air pressure suit flat. Ensure there are no kinks or obstructions in the air hoses.

5. Operating Instructions

Once the device is set up, follow these steps to begin a pressotherapy session:

1. **Wear the Suit:** Carefully put on the air pressure suit. Ensure it fits comfortably and is properly secured with the adjustable straps.

Figure 5.1: A user demonstrating the correct application of the air pressure suit while lying down.

2. **Power On:** Press the power button on the control unit to turn on the device. The display screen will illuminate.
3. **Select Mode:** Use the control panel to select your desired operating mode. The device typically offers various modes for different massage patterns and intensities. Refer to the on-screen interface for specific mode descriptions.
4. **Adjust Pressure/Intensity:** Adjust the air pressure level according to your comfort and therapeutic needs. Start with a lower setting and gradually increase if desired.
5. **Set Time:** Set the duration of your session using the timer function on the control panel.
6. **Start Session:** Press the start button to begin the pressotherapy session. The air chambers in the suit will inflate and deflate according to the selected mode.
7. **Monitor Comfort:** Throughout the session, monitor your comfort level. If you experience any discomfort or pain, stop the session immediately and adjust settings or consult a medical professional.
8. **End Session:** The device will automatically stop when the set time expires. You can also manually stop the session by pressing the stop button.
9. **Power Off:** After the session, power off the control unit and disconnect the power cable.

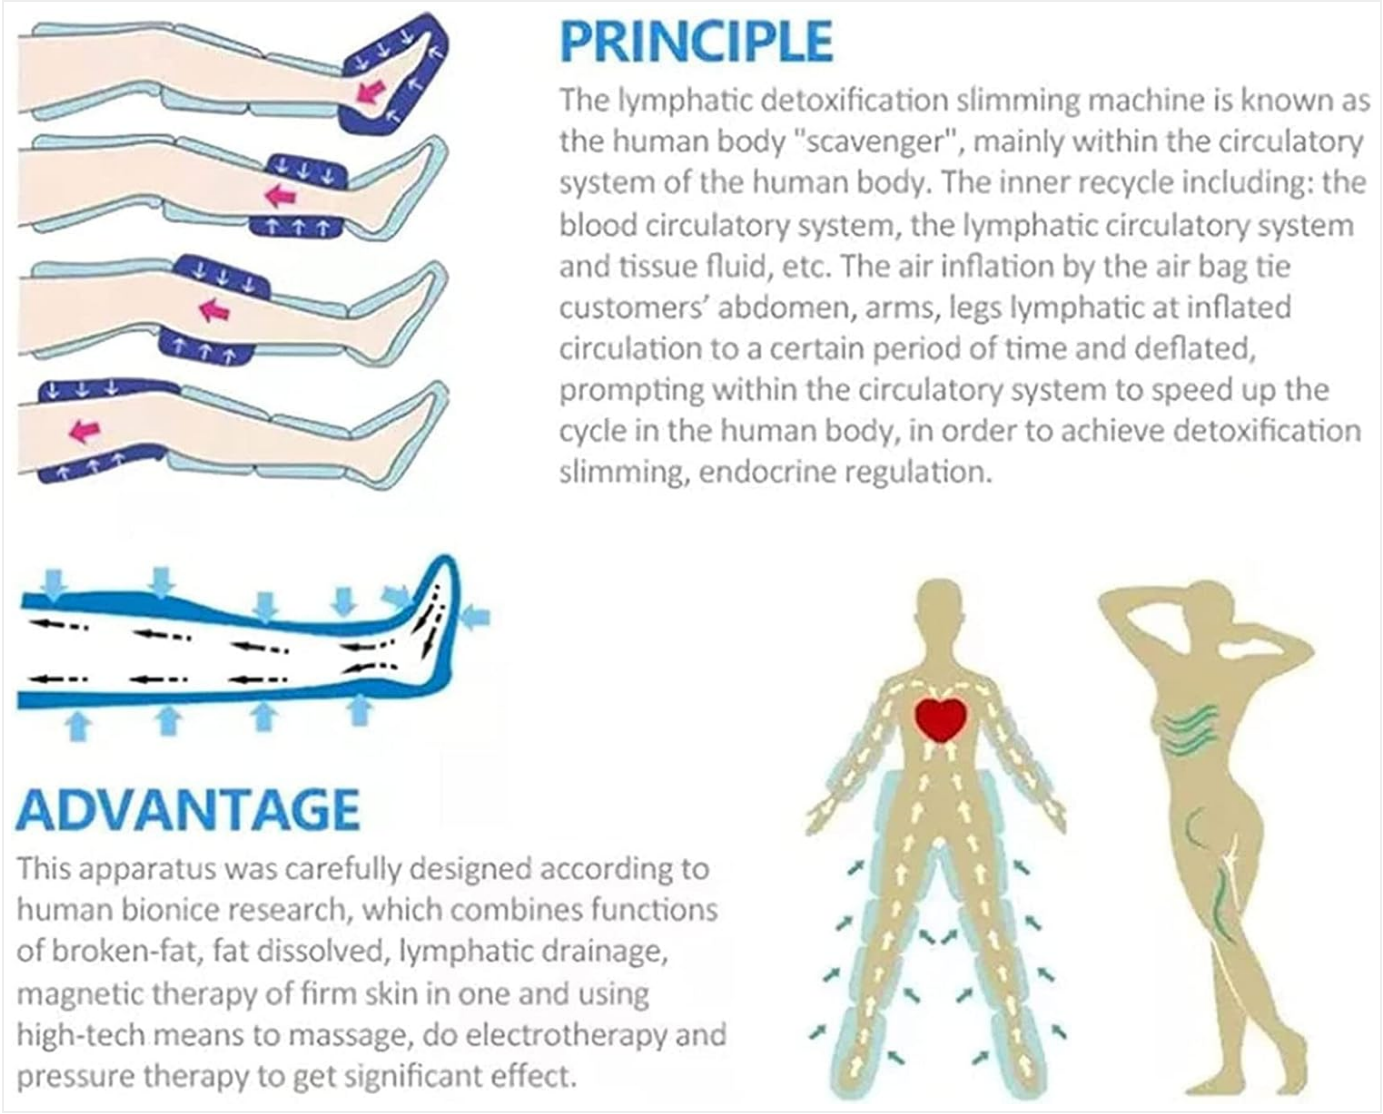

Figure 5.2: This diagram illustrates the principle of lymphatic detoxification, showing how air pressure aids circulation and lymphatic drainage. It also highlights the advantages of the apparatus, including improved circulation, collagen activation, body contouring, and muscle pain relief.

6. Maintenance

Proper maintenance ensures the longevity and optimal performance of your device.

- **Cleaning the Suit:** After each use, wipe down the air pressure suit with a soft, damp cloth. Use a mild, non-abrasive cleaner if necessary. Ensure the suit is completely dry before storage. Do not immerse the suit in water.
- **Cleaning the Control Unit:** Wipe the control unit with a dry or slightly damp cloth. Do not use harsh chemicals or abrasive materials.
- **Storage:** Store the device and suit in a cool, dry place, away from direct sunlight and extreme temperatures. Ensure the air hoses are not kinked during storage.
- **Inspection:** Regularly inspect the air hoses and power cable for any signs of wear, damage, or fraying. If any damage is found, discontinue use and contact customer support.

7. Troubleshooting

If you encounter any issues with your WJYLM Pressotherapy Machine, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Device does not power on.	Power cable not properly connected or no power from outlet.	Ensure the power cable is securely plugged into both the device and a working electrical outlet. Check the outlet with another appliance.
Air suit does not inflate.	Air hoses are not connected correctly or are kinked.	Verify that all air hoses are securely connected to both the control unit and the suit. Check for any kinks or blockages in the hoses.
Uneven pressure in the suit.	Loose air hose connection or internal air leak.	Check all air hose connections. If the problem persists, contact customer support.
Device makes unusual noise.	Normal operation sound or internal issue.	Some pump noise is normal. If the noise is excessively loud or unusual, power off the device and contact customer support.

If these steps do not resolve the issue, please contact WJYLM customer support for further assistance.

8. Specifications

Brand	WJYLM
Model Number	f8476b89-c72e-49a9-9339-9d480487468f
Power Source	Corded Electric
Material	Plastic
Color	White
Special Feature	Portable
Massager Type	Air Pressure Massage Suit
Specific Uses	Myofascial, Neuropathy, Lymphatic Drainage
Wireless	No
