Vision Aid 21LEDVisionAid

User Manual for Vision Aid 30X Hands-Free Magnifying Glass with LED Lights

Model: 21LEDVisionAid | Brand: Vision Aid

Introduction

This manual provides comprehensive instructions for the safe and effective use of your Vision Aid 30X Hands-Free Magnifying Glass with LED Lights. Please read this manual thoroughly before operating the device and retain it for future reference.

The Vision Aid 30X Hands-Free Magnifying Glass with LED Lights, featuring a blue and black design, is shown in its folded, upright position with the stand extended. This image highlights the overall design and the integrated LED lights around the lens.

Safety Information

To ensure safe operation and prevent damage, observe the following precautions:

- Do not expose the magnifying glass to direct sunlight for extended periods, as this may cause fire or damage to surfaces.
- Keep the device away from water and high humidity.

- Do not look directly at the LED lights for prolonged periods to avoid eye strain.
- Use only the specified battery type (AAA) and ensure correct polarity during installation.
- Keep out of reach of children to prevent accidental ingestion of small parts or misuse.
- Avoid dropping the device or subjecting it to strong impacts.

Package Contents

Verify that all items are present in the package:

- 1 x Vision Aid 30X Hands-Free Magnifying Glass with LED Lights
- User Manual (this document)

Note: AAA batteries are not included and must be purchased separately.

Setup

1. **Battery Installation:**
    - Locate the battery compartment on the handle of the magnifying glass.
    - Slide open the battery compartment cover.
    - Insert 3 AAA batteries, ensuring correct positive (+) and negative (-) polarity as indicated inside the compartment.
    - Close the battery compartment cover securely.
2. **Stand Setup (Hands-Free Use):**
    - Gently unfold the integrated stand located at the base of the handle.
    - Adjust the angle of the stand to achieve the desired viewing height and stability for hands-free operation.

A user is shown utilizing the Vision Aid magnifying glass in a hands-free manner, with the stand extended, while performing detailed work on a small object. This demonstrates the convenience of the integrated stand for intricate tasks.

Operating Instructions

1. **Powering On/Off the LED Lights:**
    - Locate the power button on the side of the handle.
    - Press the button once to turn on the 21 LED lights.
    - Press the button again to turn off the LED lights.

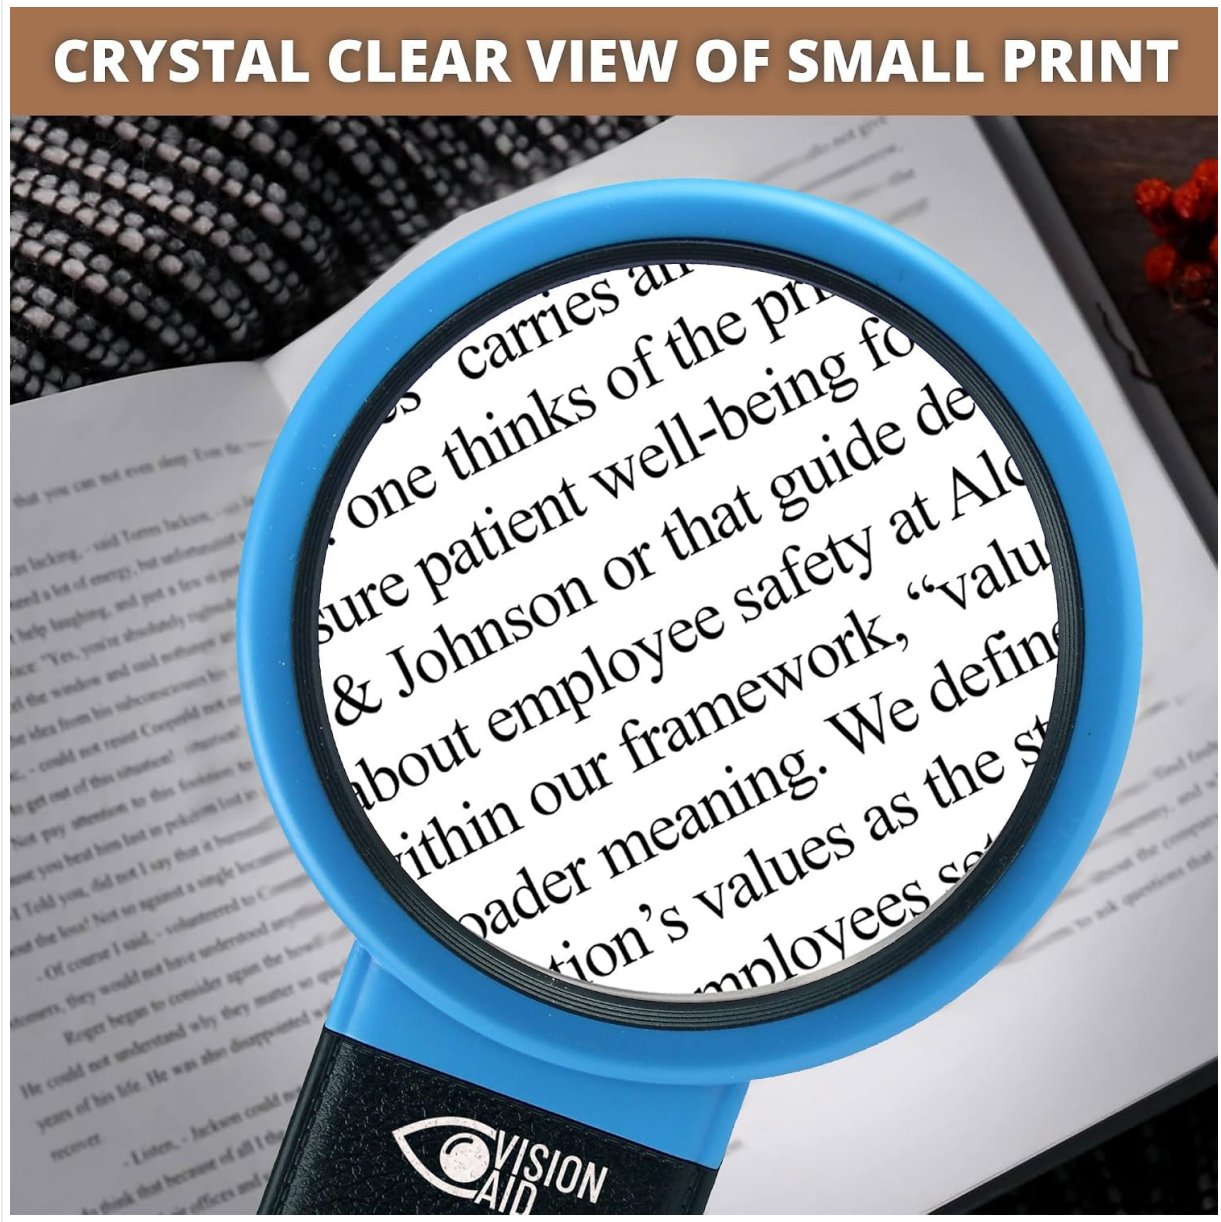

An elderly man is holding the Vision Aid magnifying glass, which has its 21 LED lights illuminated around the lens, while reading a book. The bright, evenly distributed light enhances visibility for detailed reading.

2. **Using the Magnification:**
    - Hold the magnifying glass over the object or text you wish to magnify.
    - Adjust the distance between the lens and the object until the image appears clear and in focus. The device provides 3.0X magnification.
    - For hands-free use, place the magnifying glass on a flat surface with the stand extended and position the object beneath the lens.

A close-up view demonstrates the 3.0X magnification of the Vision Aid magnifying glass, showing a magnified coin within the lens compared to unmagnified coins outside the lens. This illustrates the 300% larger view provided by the device.

The magnifying glass is positioned over a book, providing a crystal clear, distortion-free view of small print. This image emphasizes the clarity and readability for text.

This video demonstrates the Vision Aid Hands-Free Magnifier with 21 LED Lights being used for examining jewelry and beads. It highlights the brightness of the LEDs, the clarity of magnification, and the convenience of hands-free operation for intricate tasks like identifying hallmarks or repairing small items.

Maintenance

- **Cleaning:** Use a soft, lint-free cloth to clean the lens and body of the magnifying glass. Do not use abrasive cleaners or solvents.
- **Storage:** When not in use, fold the stand flat and store the magnifying glass in a dry, cool place away from direct sunlight and extreme temperatures.
- **Battery Replacement:** Replace batteries when the LED lights dim or cease to function. Dispose of used batteries responsibly according to local regulations.

Troubleshooting

Problem	Possible Cause	Solution
LED lights do not turn on.	Batteries are dead or low. Batteries are inserted incorrectly.	Replace with new AAA batteries. Check battery polarity and reinsert correctly.
Image is blurry or distorted.	Incorrect focal distance. Lens is dirty.	Adjust the distance between the lens and the object. Clean the lens with a soft, lint-free cloth.
Stand is unstable.	Not fully extended or on an uneven surface.	Ensure the stand is fully extended and placed on a flat, stable surface.
