CONOPU DH-CS03

CONOPU Dehumidifier User Manual

Model: DH-CS03 | Brand: CONOPU

1. INTRODUCTION

1.1 Product Overview

The CONOPU Portable Dehumidifier (Model DH-CS03) is designed to efficiently remove excess moisture from indoor environments, preventing dampness, mold, and mildew. This compact and energy-saving unit is ideal for small to medium-sized rooms such as bedrooms, offices, bathrooms, laundry rooms, caravans, and garages. It features ultra-quiet operation, automatic shut-off when the water tank is full, and a customizable 7-color LED night light.

1.2 Safety Information

- Always keep the dehumidifier away from ignition sources.
- Ensure the power plug is fully inserted into the outlet.
- Do not operate the unit with a damaged power cord or plug.
- Do not block the air inlet or outlet.
- Operate the dehumidifier within the recommended temperature range of 15-40°C. Performance may be reduced outside this range.
- Keep out of reach of children and pets.
- Unplug the unit before cleaning or maintenance.

2. PRODUCT COMPONENTS

The CONOPU Dehumidifier package includes the following items:

- 1 x CONOPU Dehumidifier Unit
- 1 x Power Plug
- 1 x User Manual (this document)

Key parts of the dehumidifier include the main body with air vents, the control panel on top, and the transparent water tank at the bottom.

TIPS

If you purchased our product from the online shop, please send us your order ID, so that we can support you very soon.

3. SETUP

1. **Unpack the Dehumidifier:** Carefully remove the dehumidifier and all accessories from the packaging.
2. **Choose a Location:** Place the dehumidifier on a flat, stable surface in the desired room. Ensure there is adequate space around the unit (at least 20 cm) for proper airflow. Avoid placing it directly against walls or furniture that might obstruct the air intake or outlet.
3. **Connect Power:** Insert the power plug into the dehumidifier's power port, then plug the adapter into a suitable electrical outlet.

4. OPERATING INSTRUCTIONS

4.1 Power On/Off

To turn the dehumidifier on or off, simply press the power button located on the top control panel. The unit will begin or cease operation.

4.2 Dehumidification Function

The dehumidifier will automatically start extracting moisture from the air once powered on. It can remove up to 300ml of water per day. The unit operates quietly, with a noise level as low as 40dB, making it suitable for use in bedrooms or offices without disturbance.

Silent Romance for sound sleep

4.3 Multicolor Night Light

The dehumidifier features a built-in 7-color atmosphere light. Press the light button on the control panel to activate the changing colors. You can press it again to select your preferred color or turn the mood light off completely.

LED Light Romance

a soothing ambience

4.4 Automatic Shut-off and Warning

For safety and convenience, the dehumidifier will automatically shut off when the water tank is full. The water tank light will turn red and flicker, accompanied by three "beeps," indicating that the tank needs to be emptied. This prevents water overflow.

Auto off & red-light warning

5. MAINTENANCE

5.1 Emptying the Water Tank

1. When the water tank is full, the unit will stop operating, and the red warning light will activate.
2. Turn off the dehumidifier and unplug it from the power outlet.
3. Gently turn the top of the housing counterclockwise to detach the main unit from the water tank.
4. Carefully remove the water tank and pour out the collected water.
5. Rinse the water tank with clean water and dry it thoroughly before reattaching it to the main unit.
6. Align the tank and main unit, then turn clockwise until securely locked.

5.2 Cleaning the Dehumidifier

- Wipe the exterior of the unit with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Periodically check the air inlet and outlet for dust accumulation. Use a soft brush or vacuum cleaner to gently remove any dust.
- Ensure the unit is completely dry before plugging it back in and operating.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Dehumidifier does not turn on.	Not plugged in. Power outlet malfunction. Water tank full (red light on).	Ensure the power plug is securely inserted. Try a different power outlet. Empty the water tank and reinsert it correctly.
No water collected or low dehumidification.	Room temperature too low (below 15°C). Humidity level is already low. Air inlets/outlets are blocked. Unit not running long enough.	Ensure room temperature is within 15-40°C. The unit may not collect much water if humidity is low. Clear any obstructions from air vents. Allow the unit to run for several hours, especially in humid conditions.
Unit is noisy.	Unit not on a flat surface. Obstruction in fan.	Place the unit on a stable, flat surface. Check for and remove any foreign objects.
