1. Introduction

Thank you for choosing the BOFENG Queen Bed Frame. This manual provides detailed instructions for the safe assembly, operation, and maintenance of your new bed frame. Please read all instructions carefully before beginning assembly and retain this manual for future reference.
This bed frame features a sturdy metal platform design with reinforced steel slats, eliminating the need for a box spring. It includes a wood headboard with integrated storage and a convenient charging station.

2. Safety Information

- **Weight Capacity:** Do not load the bed frame with more than 880 pounds (approximately 400 kg). Exceeding this limit may cause structural damage or injury.

- **Assembly:** Follow all assembly instructions precisely. Improper assembly can lead to instability or collapse. It is recommended that two adults assemble this product.
- **Children:** Do not allow children to climb or jump on the bed frame.
- **Electrical Safety:** Ensure the charging station is connected to a properly grounded electrical outlet. Do not overload the charging ports. Disconnect power before cleaning or if any damage is observed.
- **Placement:** Place the bed frame on a flat, level surface to ensure stability.

6. Maintenance

- **Cleaning:** Wipe the metal and wood surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners that could damage the finish.
- **Check Connections:** Periodically inspect all bolts and screws to ensure they remain tight. Retighten if necessary to maintain stability and prevent squeaking.

- **Charging Station:** Keep the charging station free from dust and debris. Do not attempt to disassemble or repair the electrical components yourself.

7. Troubleshooting

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable	Loose bolts or uneven placement.	Ensure all bolts are securely tightened. Verify the bed frame is on a flat, level surface.
Squeaking noises	Loose connections between frame components or slats.	Retighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to connection points if necessary. Ensure slats are properly seated.
Charging station not working	Power cord not plugged in, outlet issue, or device incompatibility.	Check if the power cord is securely plugged into a working wall outlet. Test the outlet with another device. Ensure your device is compatible with USB or standard AC charging.
