1. INTRODUCTION

This manual provides instructions for the proper use and maintenance of your Carkio RV Refrigerator Airing Device. This device is designed to maintain airflow within your RV refrigerator when it is not in use, preventing the accumulation of odors and moisture.

Please read this manual thoroughly before installation and use to ensure optimal performance and longevity of the product.

2. PRODUCT OVERVIEW

The Carkio RV Refrigerator Airing Device is a simple yet effective tool for RV owners. It is specifically designed to fit Dometic refrigerator models DM26XX, DM28XX, RM37XX, and RM39XX, which are typically 6-8 cubic feet in size. The device holds the refrigerator door slightly ajar, allowing air circulation and preventing stale air and mold growth.

ESSENTIAL ITEMS FOR RV OWNERS

Image 2.2: The Carkio RV Refrigerator Airing Devices shown in context next to an open RV refrigerator, illustrating their intended use in a camping environment.

Key Features:

- **Odor Prevention:** Facilitates air circulation to prevent unpleasant odors.
- **Moisture Control:** Helps reduce moisture buildup, inhibiting mold and mildew.
- **Compatibility:** Designed for Dometic models DM26XX, DM28XX, RM37XX, RM39XX (6-8 cubic feet).
- **Easy Installation:** Simple to attach and remove.
- **Durable Construction:** Made from high-quality materials for extended use.

3. SETUP & INSTALLATION

The Carkio RV Refrigerator Airing Device is designed for quick and easy installation. No tools are required.

Compatibility Check:

Before installation, ensure your RV refrigerator is one of the compatible Dometic models (DM26XX, DM28XX, RM37XX, RM39XX) and is within the 6-8 cubic feet size range. Refer to your refrigerator's manual for model identification.

Installation Steps:

1. **Prepare the Refrigerator:** Ensure the refrigerator is empty, clean, and dry before installing the airing device.
2. **Locate the Door Latch/Catch:** Identify the mechanism on your refrigerator door frame that secures the door when closed. The airing device is designed to interact with this part.
3. **Insert the Device:** Gently slide the Carkio RV Refrigerator Airing Device into the refrigerator door latch or catch mechanism. The design allows it to hold the door open by approximately 1 inch.
4. **Verify Placement:** Ensure the device is securely seated and the door is held open slightly, allowing for consistent airflow.

Image 3.1: An illustration demonstrating the ease of installation and disassembly of the Carkio RV Refrigerator Airing Device. It shows an icon of a refrigerator with a downward arrow, indicating simple setup.

THE PERFECT CAMPING TRIP!

Image 3.2: A close-up view of the Carkio RV Refrigerator Airing Device installed on the side of an RV refrigerator door, holding it slightly open. The device is black and fits snugly into the door's edge.

4. OPERATING INSTRUCTIONS

The Carkio RV Refrigerator Airing Device operates passively by maintaining a small gap in your refrigerator door. It is intended for use when the RV refrigerator is turned off and not in active use, typically during storage or extended periods of non-operation.

When to Use:

- During RV storage.
- When the RV refrigerator is turned off for cleaning or defrosting.
- Any time the refrigerator is not actively cooling and you wish to prevent odor and moisture buildup.

How it Works:

Once installed, the device keeps the refrigerator door slightly ajar (approximately 1 inch). This small opening allows ambient air to circulate inside the refrigerator and freezer compartments, preventing the stale, musty odors and mold that can develop in sealed, unused appliances.

Image 4.1: A diagram illustrating the function of the airing device. It shows arrows indicating air flowing into the refrigerator and a crossed-out cloud icon, symbolizing the prevention of odor accumulation.

Removal:

To remove the device, simply pull it out from the door latch. Store it in a safe place when the refrigerator is in active use.

5. CARE & MAINTENANCE

The Carkio RV Refrigerator Airing Device requires minimal maintenance to ensure its effectiveness and longevity.

- **Cleaning:** If the device becomes dirty, wipe it with a damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Inspection:** Periodically inspect the device for any signs of wear or damage. While made from durable materials, extreme temperatures or physical stress could affect its integrity.
- **Storage:** When not in use, store the device in a cool, dry place away from direct sunlight.

Image 5.1: An image emphasizing the quality of the product, showing an icon for "High Quality Materials" and another for "Strong and Durable" next to a hand holding the black airing device.

6. SPECIFICATIONS

Product Specifications

Feature	Detail
Product Name	Carkio RV Refrigerator Airing Device
Brand	Carkio
Model Compatibility	Dometic Models DM26XX, DM28XX, RM37XX, RM39XX (6-8 Cubic Feet)
Material	High-quality, durable plastic
Color	Black
Dimensions (Approximate)	89mm (3.5") Length x 48mm (1.89") Width x 1.7mm (0.07") Thickness
