MERITLINE Twin Daybed with Trundle and Storage Drawers

MERITLINE Twin Daybed with Trundle and Storage Drawers User Manual

Model: Twin Daybed with Trundle and Storage Drawers (Grey)

Introduction

Thank you for choosing the MERITLINE Twin Daybed with Trundle and Storage Drawers. This manual provides essential information for the safe assembly, operation, and maintenance of your new daybed. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

Setup and Assembly

Assembly of your MERITLINE Twin Daybed is required. All necessary tools and detailed instructions are included in the packaging. Please follow the step-by-step guide provided with your product for proper and safe assembly. Ensure all components are present before starting.

Operating Instructions

Using the Trundle Bed

The trundle bed is designed to provide an additional sleeping surface. To extend the trundle, gently pull the front panel outwards from beneath the main daybed. The trundle is equipped with wheels for smooth movement. To retract, push the trundle back into its position under the daybed until it is fully nested.

Using the Storage Drawers

The daybed includes two storage drawers located beneath the trundle. To access, pull the drawer handles outwards. To close, push the drawers back into the frame until they are flush with the daybed structure.

Mattress Requirements

- **Main Daybed:** Accommodates a twin-size mattress with a recommended thickness of 8-10 inches.
- **Trundle Bed:** Accommodates a twin-size mattress with a recommended thickness of up to 6 inches to ensure it slides smoothly under the main daybed.

No box spring is required for either the main daybed or the trundle bed, as both are equipped with sturdy slat support systems.

Maintenance and Care

- **Upholstery Care:** The linen-blend upholstery should be dry cleaned only. Do not use liquid cleaners or abrasive materials, as this may damage the fabric.

- **Frame Care:** Wipe the wood and engineered wood components with a soft, dry cloth. Avoid harsh chemicals.
- **Regular Checks:** Periodically check all bolts, screws, and fasteners to ensure they are tight. Re-tighten if necessary to maintain stability and safety.
- **Weight Capacity:** Do not exceed the maximum weight capacity of 250 pounds per bed (main daybed or trundle).

Troubleshooting

Daybed Feels Unstable

Ensure all assembly bolts and screws are securely tightened. If the issue persists, disassemble and reassemble the affected sections, carefully following the instructions.

Trundle or Drawers Not Sliding Smoothly

Check for any obstructions beneath the trundle or in the drawer glides. Ensure the wheels are clean and free of debris. Verify that the trundle and drawers are correctly aligned within their tracks.

Squeaking Noises

Squeaking can often be resolved by tightening all hardware. If the noise continues, apply a small amount of lubricant to metal-on-metal contact points, if applicable, or consult the manufacturer's assembly guide for specific recommendations.
