Maintenance

Proper care will extend the life and appearance of your bed.

- **Cleaning Upholstery:** For general cleaning, vacuum the fabric regularly using an upholstery attachment. For spills, blot immediately with a clean, dry cloth. For stubborn stains, use a mild fabric cleaner following the product's instructions, testing on an inconspicuous area first. Do not saturate the fabric.
- **Cleaning Wood/MDF Surfaces:** Wipe wood and MDF surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners. Dry immediately with a clean cloth.

- **Hardware Check:** Periodically check all bolts, screws, and connections to ensure they are tight. Re-tighten as needed to maintain stability and safety.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fading of the upholstery fabric.
- **Weight Distribution:** Distribute weight evenly across the bed frames to prevent stress on individual slats or components.

Troubleshooting

If you encounter any issues, refer to the following common problems and solutions:

- **Bed Squeaks:**
  - Ensure all bolts and screws are securely tightened. Loose connections are a common cause of squeaking.
  - Check if the slats are properly seated in their supports.
- **Drawers or Trundle Stick:**
  - Verify that the bed is on a level surface. Uneven flooring can cause misalignment.
  - Check for any obstructions in the drawer or trundle tracks.
  - Ensure the drawers/trundle were assembled correctly and are not overloaded.
- **Missing Parts:**
  - Refer to the package contents list and assembly guide. If parts are genuinely missing, contact customer support.
  - Remember the product ships in two packages, which may arrive separately.
- **Instability:**
  - Re-check all connections and ensure they are fully tightened.
  - Confirm that the bed is assembled according to the instructions.
