Airefina A09

Airefina Twin Air Mattress User Manual

Model: A09

1. INTRODUCTION

Thank you for choosing the Airefina Twin Air Mattress. This manual provides essential information for the proper setup, operation, maintenance, and troubleshooting of your air mattress. Designed for comfort and convenience, this air mattress features a built-in electric pump for quick inflation and deflation, a flocked surface for comfort, and durable waterproof material. Please read this manual thoroughly before use to ensure optimal performance and longevity of your product.

2. SETUP AND INFLATION

Your Airefina Twin Air Mattress is equipped with a powerful built-in electric pump for effortless inflation and deflation.

2.1 Inflation

1. Unroll the air mattress on a clean, flat surface, free from sharp objects.
2. Locate the built-in electric pump on the side of the mattress.
3. Plug the power cord into a standard electrical outlet.
4. Turn the pump dial to the "Inflate" position. The mattress will begin to inflate rapidly, typically reaching full inflation in less than 5 minutes.
5. Once the desired firmness is achieved, turn the pump dial to the "Off" position and unplug the cord.
6. Store the power cord neatly within the integrated cord storage compartment to prevent tripping hazards and for easy transport.

Note: During the first few uses, the PVC material may naturally stretch, causing the mattress to feel softer. This is normal. Simply re-inflate the mattress to your desired firmness as needed.

Quick Inflation Deflation in minutes

2.2 Deflation

1. Ensure the mattress is unplugged from the power outlet.
2. Turn the pump dial to the "Deflate" position. The mattress will rapidly deflate.
3. Once fully deflated, turn the pump dial to the "Off" position.
4. Fold or roll the mattress neatly for storage.

3. OPERATING INSTRUCTIONS

The Airefina Twin Air Mattress is designed for superior comfort and versatility.

3.1 Comfort and Support

This air mattress combines air coils and a high-strength composite mesh structure to provide excellent spinal support and comfort. The plush, velvety flocced top offers a soft sleeping surface, enhancing your rest whether at home or camping.

Extra-strong Support with 21 Air Coils to 650lb/295kg

4. MAINTENANCE

4.1 Cleaning

To clean your Airefina Air Mattress, simply spot clean with a damp cloth and mild soap. Ensure the area is completely dry before storing or re-inflating. The mattress features thick, waterproof material for easy cleaning and durability.

Thick Waterproof Material

Image: Close-up of the thick waterproof material, illustrating its resistance to liquids.

4.2 Storage

For compact and easy storage, deflate the mattress completely and roll it up. It comes with a convenient travel carry bag for protection and portability.

Note: Inflate a little more air regularly to obtain a desired firmness

Image: A visual guide demonstrating the compact and easy storage process for the air mattress.

5. TROUBLESHOOTING

- **Mattress losing firmness:** It is normal for the PVC material to stretch and expand during initial uses, which can cause a slight loss of firmness. Re-inflate the mattress periodically to maintain your desired firmness.
- **Puncture or Leak:** The air mattress comes with repair patches. To use a repair patch:
 - a. Deflate the mattress completely.
 - b. Clean the leaking area thoroughly and ensure it is completely dry.
 - c. Peel off the film from the repair patch and firmly press the patch over the leaking area.
 - d. Squeeze out any air bubbles and wait for 48 hours to ensure the patch is properly secured before re-inflating.

- **Pump not working:** Ensure the power cord is securely plugged into a working electrical outlet and the pump dial is set to the correct "Inflate" or "Deflate" position.

Important Safety Note: Do not wear or place sharp objects on the mattress. Clean the area before placing the mattress to prevent punctures.

6. SPECIFICATIONS

Feature	Detail
Size	Twin
Model Name	A09
Brand	Airefina
Color	Black
