CONOPU DH-JH01 & DH-JH06 Compatible Filter

CONOPU Air Purifier Replacement Filter User Manual

Model: DH-JH01 & DH-JH06 Compatible Filter

Brand: CONOPU

INTRODUCTION

This manual provides essential information for the proper use and maintenance of your CONOPU Air Purifier Replacement Filter. This filter is specifically designed for CONOPU Air Purifier models DH-JH01 and DH-JH06, ensuring optimal performance and air quality.

KEY FEATURES

- **Compatibility:** Designed as a direct replacement filter for CONOPU Air Purifier models DH-JH01 and DH-JH06.
- **H13 HEPA Filtration:** Features an H13 True HEPA filter layer capable of capturing 99.97% of airborne particles as small as 0.3 microns.
- **Efficient 4-Layer Filtration System:**
 1. **Pre-filter:** Captures large particles such as dust, hair, and pet fur.
 2. **Special Silver Ions Layer:** Designed to catch particles through static electricity.
 3. **HEPA H13 Filter:** Filters pollen, dander, bacteria, and mold.
 4. **Activated Carbon Layer:** Effectively removes smoke fume, pet odor, and Volatile Organic Compounds (VOCs).
- **Extended Lifespan:** Recommended replacement every 3-6 months, or approximately 2000 hours of operation. The air purifier's indicator light will turn red when replacement is due.

4 Layers Filtration

NO.4

Activated Carbon Layer

Smoke fume, pet odor, VOCs.

NO.3

HEPA H13 filter

Pollen,dander,bacteria,mold.

NO.2

Special Silver Ions Layer

Catch particles through static electricity.

NO.1

Pre-filter

Capture big particles like dust,hair,pet fur.

INSTALLATION AND SETUP

Follow these steps to properly install the replacement filter in your CONOPU Air Purifier (DH-JH01 or DH-JH06):

1. **Prepare the Air Purifier:** Ensure the air purifier is turned off and unplugged from the power outlet before proceeding.
2. **Unlock the Bottom Cover:** Gently turn the bottom cover of the air purifier in the counter-clockwise direction to unlock it.
3. **Remove Used Filter:** Carefully remove the old, used filter from the air purifier. Dispose of the old filter responsibly.
4. **Unpack New Filter:** Remove the new replacement filter from its plastic protective bag. *Important: Do not operate the filter with the plastic bag still on.*
5. **Insert New Filter:** Place the new filter into the air purifier, ensuring it is seated correctly.
6. **Lock the Bottom Cover:** Turn the bottom cover clockwise to securely lock it back into place.
7. **Power On:** Plug the air purifier back into the power outlet and turn it on. If the filter replacement indicator was red, it

should reset after installation.

HEPA H13 FILTER For Purifier DH-JH01, DH-JH06

Image: The CONOPU Air Purifier models DH-JH01 and DH-JH06 are shown alongside the replacement filter, indicating where the filter is installed within the units.

OPERATING CONSIDERATIONS

While the filter itself does not have operational controls, its proper installation is crucial for the air purifier's effective operation. The filter works continuously with your CONOPU air purifier to clean the air. Ensure the air purifier is placed in an open area, away from obstructions, to allow for optimal air circulation and filtration.

MAINTENANCE

Regular filter replacement is essential to maintain the efficiency and performance of your CONOPU Air Purifier.

- **Replacement Frequency:** It is recommended to replace the filter every 3 to 6 months, depending on usage and air quality in your environment. Heavy usage or highly polluted environments may require more frequent replacement.

- **Filter Life Indicator:** Your CONOPU Air Purifier is equipped with a filter life indicator. When the filter has accumulated approximately 2000 hours of operation, this indicator will illuminate red, signaling that a replacement is needed.
- **Disposal:** Dispose of used filters according to local waste disposal regulations.

3~6 Months Replacement

It is recommended that replace Filter every 3-6 months to ensure constant clean air. When the cue light turns red, please change a new filter.

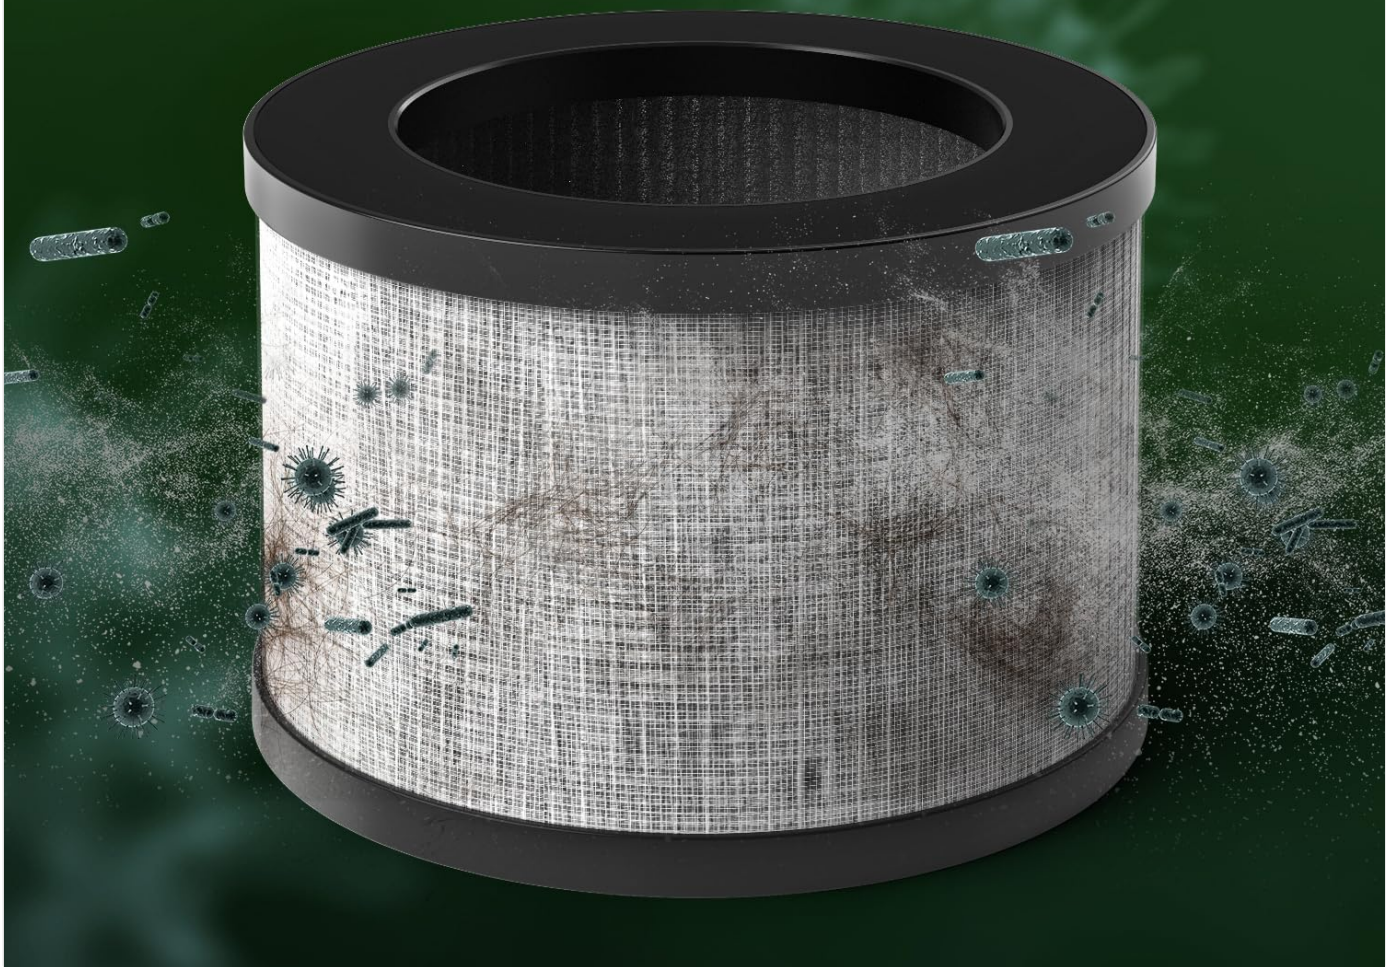

Image: A visual representation of a used filter, demonstrating the accumulation of dust and particles after 3-6 months of use, emphasizing the need for timely replacement.

TROUBLESHOOTING

If you experience issues with your air purifier's performance, consider the following:

- **Reduced Airflow or Odor:** If the air purifier's airflow seems weaker or if unpleasant odors persist, it is likely time to replace the filter. A clogged filter reduces efficiency.
- **Filter Indicator Light Remains Red:** After replacing the filter, ensure you have correctly reset the filter life indicator on your air purifier (refer to your air purifier's specific manual for reset instructions). Also, confirm the new filter's plastic packaging has been removed.

- **Unusual Noises:** Ensure the filter is properly seated and the bottom cover is securely locked. A loose filter can cause vibrations or rattling.

SPECIFICATIONS

Attribute	Detail
Brand	CONOPU
Model Compatibility	CONOPU Air Purifier DH-JH01 & DH-JH06
Filter Type	H13 True HEPA with Activated Carbon and Pre-filter (4-Layer Filtration)
MERV Rating	13
Product Dimensions	13.1 x 13.1 x 9.3 cm (5.16 x 5.16 x 3.66 inches)
Product Weight	170 Grams (0.37 lbs)
Material	Polyester
Recommended Replacement	Every 3-6 months or 2000 hours of use
Batteries Required	No

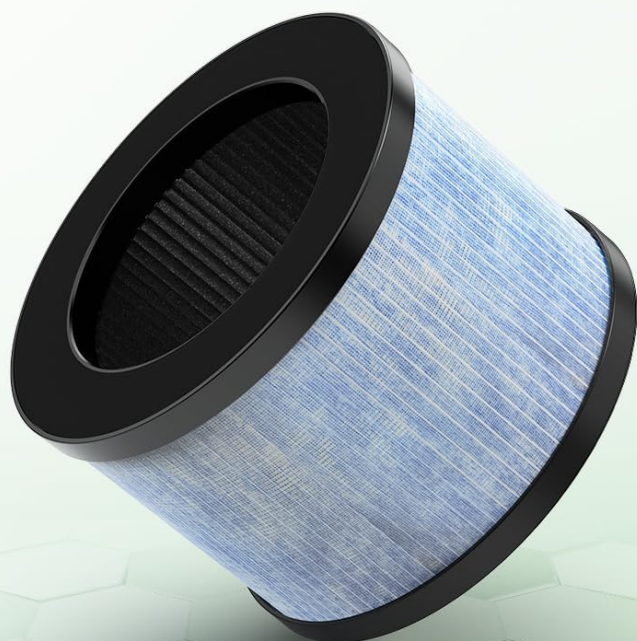

WARRANTY AND SUPPORT

Specific warranty information for this replacement filter is not provided in this manual. For details regarding warranty coverage, returns, or technical support, please refer to the original CONOPU Air Purifier user manual or contact CONOPU customer service directly through their official website or the retailer where the product was purchased. Always ensure you purchase genuine CONOPU replacement filters to maintain product warranty and optimal performance of your air purifier.
