Troubleshooting

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Vacuum cleaner not charging.	Adapter not properly connected.	Ensure the barrel connector is fully inserted into the vacuum and the adapter is firmly plugged into the wall.
	Power outlet is not active.	Test the power outlet with another device.
	Vacuum cleaner battery is old or faulty.	Rechargeable batteries have a limited lifespan (typically 1-3 years). An old or bad battery may not accept a charge, which is not an issue with the charger itself. Consider replacing the vacuum's battery if it's old.
Adapter feels warm during charging.	Normal operation.	A slight warmth is normal during operation. If the adapter becomes excessively hot or emits smoke/odor, unplug it immediately and discontinue use.
