

Cecotec 7900 Hybrid

Cecotec Flow 7900 Hybrid Mattress 150x200 Instruction Manual

1. INTRODUCTION AND OVERVIEW

This manual provides essential information for the proper setup, use, and maintenance of your Cecotec Flow 7900 Hybrid Mattress. Designed for optimal rest, this mattress combines multiple layers, including a pocket spring core and viscoelastic foam, to offer medium-high firmness and advanced comfort features. The Cecotec Flow 7900 Hybrid Mattress (150x200 cm) integrates several technologies:

- **SpringCore:** Encased pocket springs providing firmness and enhanced breathability.
- **ViscoCare+:** Viscoelastic layer that adapts to your body's contours.
- **SeparateMuv:** Technology ensuring independent movement zones, minimizing disturbance from partner movements.
- **BreathSoft:** Fabric offering elasticity, softness, high breathability, and durability for easy cleaning.

2. SAFETY INSTRUCTIONS

- Do not jump on the mattress.
- Keep the mattress away from open flames and heat sources.
- Ensure the mattress is placed on a stable and appropriate bed base.
- When unpacking, use caution with sharp objects to avoid damaging the mattress fabric.
- Allow adequate ventilation in the room, especially during the initial expansion period.

3. SETUP

1. **Unpacking:** Your Cecotec Flow 7900 Hybrid Mattress is delivered rolled and vacuum-packed for convenient transport. Carefully remove the outer packaging. Place the rolled mattress on your bed base.
2. **Unrolling:** Gently unroll the mattress.
3. **Removing Plastic:** Carefully cut and remove the plastic wrapping. The mattress will begin to expand immediately.

4. **Expansion:** Allow the mattress to fully expand for 24 to 72 hours. While it may appear fully expanded sooner, this period ensures all layers and springs settle into their intended shape and firmness.
5. **Placement:** Ensure the mattress is correctly positioned on a flat, sturdy bed base or frame that provides adequate support.

4. OPERATING (USAGE)

The Cecotec Flow 7900 Hybrid Mattress is designed to provide a balanced sleep experience with its multi-layer construction. The combination of pocket springs and viscoelastic foam offers both support and pressure relief.

- **Firmeza Medio Alta (Medium-High Firmness):** This mattress offers a medium-high firmness level, suitable for individuals seeking robust support without sacrificing comfort.
- **SeparateMuv Technology:** The individually encased pocket springs minimize motion transfer, allowing you and your partner to sleep undisturbed by each other's movements.
- **ViscoCare+ Adaptation:** The viscoelastic layer conforms to your body's shape, distributing weight evenly and reducing pressure points.
- **BreathSoft Ventilation:** The breathable fabric and pocket spring core promote air circulation, helping to regulate temperature and maintain a fresh sleeping environment.

Rotation Recommendations

To ensure even wear and prolong the life of your mattress, it is recommended to rotate it head-to-foot every 3-6 months. This helps maintain consistent support and comfort across the entire sleeping surface.

Image 3: A person sleeping on the mattress, illustrating comfort and support.

Image 4: A person lying on the mattress, demonstrating the adaptability of the viscoelastic layer.

5. MAINTENANCE

Proper care will extend the lifespan and maintain the hygienic properties of your mattress.

- **Cleaning:** For spills or stains, spot clean immediately using a mild detergent and a damp cloth. Avoid saturating the mattress. Do not use harsh chemicals, bleach, or abrasive cleaners. Allow the cleaned area to air dry completely before covering.
- **Protection:** It is highly recommended to use a mattress protector to shield against spills, stains, and allergens.
- **Ventilation:** Regularly air out your mattress by removing bedding for a few hours. This helps to dissipate moisture and maintain freshness.
- **Hygiene:** The mattress composition is designed to help prevent the appearance of mites, bacteria, and fungi, contributing to a healthier sleep environment.

6. TROUBLESHOOTING

Common Issues and Solutions

- **Initial Odor:** A new mattress, especially one that has been vacuum-packed, may have a slight factory odor upon unpacking. This is normal and harmless. To dissipate the odor, allow the mattress to air out in a well-ventilated room for 24-72 hours before use.
- **Uneven Expansion:** If the mattress does not appear to expand evenly after 24 hours, gently walk on the surface or apply light pressure to encourage the foam and springs to settle. Ensure it has the full 72 hours to expand.
- **Perceived Firmness:** Mattress firmness can feel different initially. Your body may need a few weeks to adjust to a new mattress. If after this period the firmness is not as expected, ensure the bed base provides adequate support.

7. SPECIFICATIONS

Feature	Detail
Brand	Cecotec
Model Number	07721 (Flow 7900 Hybrid)
Dimensions (L x W x H)	200 x 150 x 30 cm
Weight	39.5 kg
