## TEYOUYI 1037

# TEYOUYI Mobile Attachment Connector Piece Replacement for 4moms mamaRoo, Model 1037

Instruction Manual

## 1. INTRODUCTION

---

This manual provides comprehensive instructions for the installation and maintenance of the TEYOUYI Mobile Attachment Connector Piece Replacement. This product is designed to replace a worn, damaged, or stripped attachment piece on the 4moms mamaRoo Toy Arm, specifically for Model 1037, restoring the mobile's proper position and functionality.

## 2. PRODUCT OVERVIEW

---

The TEYOUYI Mobile Attachment Connector Piece is a durable plastic replacement part for the 4moms mamaRoo swing (Model 1037). It consists of a toy bar attachment point and a spacer, designed to securely hold the mamaRoo's mobile in its intended position, preventing it from drooping. This replacement ensures the mobile remains at a safe and engaging height for your child.

### 3. SAFETY INFORMATION

---

- Always ensure the replacement part is securely installed before placing a child in the mamaRoo.
- Regularly inspect the attachment piece for any signs of wear or damage. Discontinue use and replace if damage is observed.
- Keep small parts away from children to prevent choking hazards during installation.
- This product is a replacement part for the 4moms mamaRoo Model 1037 only. Do not attempt to use it with other models or products.

### 4. PACKAGE CONTENTS

---

Please verify that all items are present in the package:

- 1 x Toy Bar Attachment Point
- 1 x Spacer

### 5. SETUP AND INSTALLATION

---

Follow these steps to replace the mobile attachment connector piece on your 4moms mamaRoo Model 1037.

1. **Verify Model Number:** Before proceeding, locate the model number on the bottom of your mamaRoo base. This replacement part is exclusively for 4moms mamaRoo Model 1037.
2. **Remove Existing Part:** If an old, damaged attachment piece is present, carefully remove it. This typically involves unscrewing it from the mamaRoo's toy arm connection point. A Phillips head screwdriver may be required.
3. **Prepare the New Part:** The package includes a toy bar attachment point and a spacer. The spacer has a "Thick Side" and a "Thin Side." Ensure you understand the orientation for proper fit.

Image 5.1: Identifying the Thick and Thin Sides of the Spacer.

4. **Install the Attachment Point and Spacer:** Insert the new toy bar attachment point into the designated slot on the mamaRoo's frame. Then, position the spacer as needed to ensure a snug fit for the toy bar. The goal is to lift the removable toy bar back to its original, elevated position.

## Attachment can Fixed Your Mamaroo swing mobile

Image 5.2: Installing the Attachment Piece onto the mamaRoo frame.

5. **Secure the Toy Bar:** Once the attachment point and spacer are in place, reattach the mamaRoo's toy bar. Ensure it fits securely and does not droop. The fit should be tight to prevent future sagging.

## 6. OPERATING

---

After successful installation, the mamaRoo's mobile should be securely positioned and function as intended. The replacement part does not alter the electronic operation of the mamaRoo swing itself, only the physical attachment of the toy bar.

## 7. MAINTENANCE

---

- Clean the attachment piece with a damp cloth and mild soap as needed. Avoid harsh chemicals.
- Ensure the attachment point remains free of debris or obstructions that could affect its fit.
- Periodically check the tightness of any screws used during installation to ensure the toy bar remains secure.

## 8. TROUBLESHOOTING

---

### 8.1 Toy Bar Still Droops After Installation

- **Check Model Number:** Confirm your mamaRoo is indeed Model 1037. This part is not compatible with other models.
- **Verify Installation:** Ensure the attachment point and spacer are correctly oriented and fully inserted. A tight fit is expected.

- **Inspect for Damage:** If the new part was damaged during installation or arrived damaged, it may not function correctly. Contact support for assistance.

## 8.2 Part Does Not Fit

- **Double-Check Model:** Reconfirm your mamaRoo model number.
- **Examine Spacer Orientation:** The spacer has a thick and thin side; try adjusting its orientation.
- **Gentle Force:** The fit can be snug. Apply gentle, even pressure during installation. Avoid excessive force that could cause breakage.

## 9. SPECIFICATIONS

---

<b>Item Model Number</b>	1037
<b>Package Dimensions</b>	3.35 x 2.17 x 0.83 inches
<b>Item Weight</b>	0.317 ounces
<b>Batteries Required</b>	No
<b>Material</b>	Plastic
