## Maintenance

Proper care will ensure the longevity of your building block set:

- **Storage:** Store the assembled set or individual blocks in a clean, dry place away from direct sunlight and extreme temperatures to prevent material degradation or discoloration.
- **Handling:** Avoid excessive force when connecting or disconnecting blocks to prevent damage.

## Troubleshooting

Here are solutions to common issues you might encounter:

- **Missing Pieces:** If you discover missing pieces during assembly, carefully re-check the packaging and sorting area. If pieces are still missing, please contact Sluban customer support as detailed in the 'Warranty and Support' section.
- **Difficulty Connecting Blocks:** Ensure that the blocks are correctly aligned. Some new blocks may require a bit more pressure to connect initially. If a block consistently does not fit, check if it is the correct piece according to the instructions.
- **Assembled Structure is Unstable:** Review the assembly steps to ensure all connections are firm and all pieces are in their correct positions. An unstable structure often indicates a loose connection or an incorrectly placed block.
