## INSTALLATION GUIDE

The ARIEL Hepburn vanity arrives fully assembled, simplifying the installation process. The countertop is not attached to the vanity for easier handling and plumbing access. Professional installation is recommended for plumbing connections.

### Preparation:

- Ensure the installation area is clean, dry, and level.
- Confirm all necessary plumbing lines are in place and accessible.
- Gather required tools: silicone sealant, caulk gun, level, measuring tape, and appropriate wrenches for plumbing.

### Installation Steps:

1. **Position the Vanity Base:** Carefully place the fully assembled vanity base in its desired location. The

open back design allows for easier plumbing connections.

2. **Level the Vanity:** Use a level to ensure the vanity base is perfectly level. Adjust the hidden leveling feet as needed.
3. **Install the Sink to Countertop:** The ceramic sink needs to be attached to the underside of the marble countertop. Apply a bead of silicone sealant around the rim of the sink and carefully press it into place on the marked area of the countertop. Secure with under-mount clips provided. Allow adequate drying time (12-24 hours) for the sealant to cure.
4. **Apply Silicone to Vanity Top:** Once the sink is secured to the countertop, apply a continuous bead of silicone sealant along the top edges of the vanity base where the countertop will rest.
5. **Place the Countertop:** With assistance, carefully lift and place the marble countertop onto the vanity base, aligning it precisely. Press down firmly to ensure good adhesion with the silicone.
6. **Install Backsplash:** Apply silicone sealant to the back edge of the countertop and the back of the backsplash piece. Carefully set the backsplash in place against the wall and countertop.
7. **Connect Plumbing:** Install your chosen 3-hole, 8-inch widespread faucet (not included) and connect the water supply lines and drain according to the manufacturer's instructions and local plumbing codes.
8. **Wipe Excess Sealant:** Immediately wipe away any excess silicone sealant with a damp cloth for a clean finish.

## CARE AND MAINTENANCE

Proper care will preserve the beauty and functionality of your ARIEL Hepburn vanity for years to come.

## Marble Countertop Care:

- Clean regularly with a soft cloth and a pH-neutral cleaner. Avoid abrasive cleaners, acidic substances (like lemon juice, vinegar), and harsh chemicals, as these can etch or stain the marble.
- Wipe up spills immediately, especially those from cosmetics, alcohol, or food.
- Consider sealing the marble periodically (every 6-12 months) with a stone sealer to protect against stains.
- Use coasters under toiletries and hot items to prevent damage.

## Wood Cabinet Care:

- Wipe down the cabinet exterior with a soft, damp cloth. Dry immediately to prevent water spots or damage.
- Avoid using silicone-based polishes or waxes, as they can build up and create a hazy film.
- Do not expose the cabinet to excessive moisture or humidity. Ensure proper ventilation in the bathroom.
- For minor scratches, touch-up pens or kits matching the white painted finish may be used.

## Hardware Care:

- Clean hardware (handles, knobs) with a soft, damp cloth. Avoid abrasive cleaners or polishes that could damage the finish.
- Periodically check that all screws and fasteners are tight.

## TROUBLESHOOTING

Here are some common issues and their potential solutions:

Problem	Possible Cause	Solution
Drawers/Doors not closing softly	Soft-close mechanism obstruction or misalignment.	Check for obstructions. Ensure drawer slides or door hinges are properly aligned and free of debris. Adjust hinges if necessary.
Water leaks from plumbing	Loose connections, damaged seals, or improper sealant application.	Tighten all plumbing connections. Inspect and replace any damaged washers or seals. Reapply plumber's putty or silicone sealant as needed. Consult a professional plumber if issues persist.
Vanity is wobbly or uneven	Uneven floor or improper leveling.	Adjust the hidden leveling feet at the bottom of the vanity until it is stable and level. Use a spirit level to verify.

Problem	Possible Cause	Solution
Stains on marble countertop	Acidic spills, oil, or colored liquids left on surface.	Identify the type of stain and use appropriate marble cleaning poultice or cleaner. For best results, consult a stone care professional. Prevent future stains by wiping spills immediately and sealing the marble.
