Afloia LM-1

Afloia 6-in-1 Pet Grooming Kit with Vacuum Suction

Model: LM-1 User Manual

Introduction

This manual provides detailed instructions for the safe and effective use of your Afloia 6-in-1 Pet Grooming Kit, Model LM-1. This comprehensive system is designed to simplify pet grooming at home by combining vacuum suction with various grooming tools, including clippers, a nail grinder, and brushes. Please read this manual thoroughly before first use and retain it for future reference.

Safety Information

Always observe the following safety precautions to prevent injury or damage:

- Keep the device away from water sources. Avoid using it near sinks, bathtubs, or in wet environments.
- Do not use this product on infants or very young children.
- Exercise caution when grooming around sensitive areas such as the pet's eyes, ears, skin folds, and nails.
- Ensure the device is unplugged before cleaning or performing any maintenance.
- Regularly clean and maintain the device and its attachments as instructed to ensure optimal performance and hygiene.
- Do not attempt to disassemble or repair the unit yourself. Contact customer support for assistance.

Package Contents

Verify that all components are present in your package:

- Main Vacuum Unit
- Flexible Hose
- Grooming Brush
- Deshedding Tool
- Electric Clipper
- Pet Nail Grinder

- Pet Paw Trimmer
- Cleaning Brush Nozzle
- 6 Interchangeable Comb Guides (3mm, 6mm, 9mm, 12mm, 15mm, 18mm)
- Power Adapter
- Storage Bag

Setup

1. **Unpack Components:** Carefully remove all items from the packaging.
2. **Connect Hose:** Insert one end of the flexible hose into the designated port on the main vacuum unit until it clicks securely into place.

3. **Attach Grooming Tool:** Select the desired grooming attachment (e.g., grooming brush, clipper) and firmly connect it to the other end of the flexible hose. Ensure it is securely fastened.
4. **Power Connection:** Plug the power adapter into the main vacuum unit and then into a suitable electrical outlet.

Figure 2: Assembly of the main unit, hose, and attachment.

Pre-use Desensitization Tips for Pets

To ensure a positive grooming experience and minimize pet anxiety, especially for first-time users or sensitive pets, follow these desensitization steps:

1. **Familiarization:** Allow your pet to sniff and investigate the grooming kit while it is turned off. Place it in their living space for a few days so they can get used to its presence.
2. **Introduce Sound:** Turn on the vacuum unit at the lowest setting in a different room or at a distance from your pet. Gradually decrease the distance over several sessions, rewarding calm behavior with treats.
3. **Gentle Contact:** Once your pet is comfortable with the sound, gently touch them with the turned-off grooming tool. Progress to briefly touching them with the tool while the vacuum is running on the lowest setting.
4. **Short Sessions:** Start with very short grooming sessions (1-2 minutes) and gradually increase the duration as your pet becomes more comfortable. Always end on a positive note.
5. **Grooming Order:** For initial sessions, groom the body first, saving the head and paws for last, as these areas can be more sensitive.

Figure 3: Steps for desensitizing your pet to the grooming kit.

Operating Instructions

Before operating, ensure your pet's fur is clean and free of large debris or mats to prevent snagging and ensure optimal performance.

General Operation

1. **Power On:** Press the power button on the main unit to turn on the vacuum.
2. **Adjust Suction:** Use the suction level button to select from three available suction settings (Low, Medium, High) based on your pet's coat thickness and comfort.
3. **Power Off:** Press the power button again to turn off the unit after grooming.

Using the Attachments

- **Grooming Brush:**

  Use this tool for daily brushing to remove loose hair and smooth the coat. The vacuum suction collects the hair directly, preventing mess.

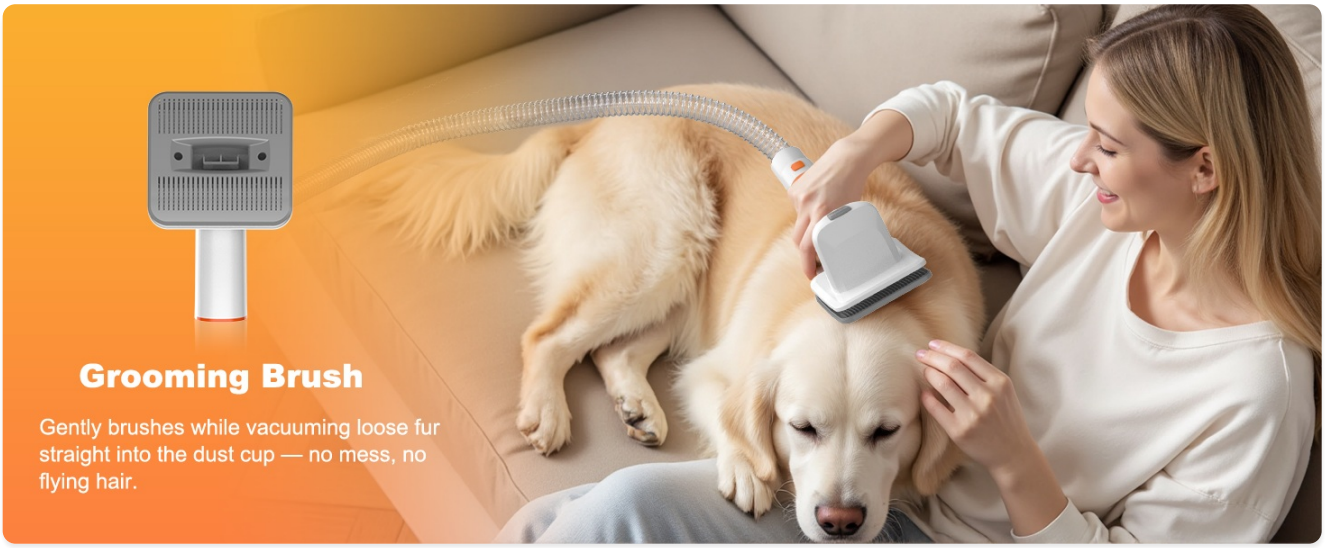

Figure 5: Grooming brush in action, collecting loose fur.

- **Deshedding Tool:**

  Ideal for pets with thick undercoats. Gently comb through the fur to remove shedding hair effectively. The vacuum ensures hair is collected immediately.

- **Electric Clipper:**

  Attach the desired comb guide (3mm, 6mm, 9mm, 12mm, 15mm, or 18mm) to the clipper head. Use for full-body trimming or specific styles. The vacuum collects trimmed hair, reducing cleanup.

Figure 6: Electric clipper with various comb guide options.

- **Pet Paw Trimmer:**

  This smaller clipper attachment is designed for precise trimming around paws and other delicate areas. It helps prevent dirt buildup and improves hygiene.

Figure 7: Paw trimmer and nail grinder in use.

- **Pet Nail Grinder:**

  Use this tool to gently file and smooth your pet's nails after trimming or to shorten overgrown nails. Introduce it slowly to your pet to ensure comfort.

- **Cleaning Brush Nozzle:**

  Attach this nozzle to the hose to vacuum up any stray hairs from furniture, floors, or clothing after grooming.

Maintenance and Cleaning

Regular cleaning ensures the longevity and optimal performance of your grooming kit.

1. **Empty Dust Cup:** After each grooming session, or when the dust cup is full, detach it from the main unit and empty the collected hair into a trash receptacle. The 1.5L dust cup is designed for easy, no-mess emptying.
2. **Clean Filters:** The dust cup contains internal filters. Regularly remove and clean these filters. They can be washed with water; ensure they are completely dry before reassembling.

3. **Clean Attachments:** Remove any hair or debris from the grooming brushes, clipper blades, and other attachments using the provided cleaning brush or a soft cloth. For clipper blades, a small amount of clipper oil can be applied periodically to maintain sharpness and smooth operation.
4. **Wipe Main Unit:** Use a dry or slightly damp cloth to wipe down the exterior of the main vacuum unit. Do not immerse the unit in water.

Troubleshooting

Problem	Possible Cause	Solution
Low suction power	Dust cup full; filters clogged; hose or attachment blocked.	Empty dust cup. Clean or replace filters. Check hose and attachments for blockages and clear them.
Clipper snagging or not cutting effectively	Blades are dull; hair is matted or contains debris; comb guide is incorrect.	Ensure pet's fur is clean and detangled before clipping. Clean blades and apply clipper oil. Consider replacing blades if excessively dull. Use appropriate comb guide for hair length.

Problem	Possible Cause	Solution
Pet is anxious or scared	Unfamiliarity with the device; loud noise.	Refer to the 'Pre-use Desensitization Tips'. Start with low suction. Use treats and positive reinforcement. Conduct shorter grooming sessions.
Device does not turn on	Not plugged in; power outlet issue; device malfunction.	Ensure power adapter is securely plugged into both the unit and a working electrical outlet. Test the outlet with another device. If problem persists, contact customer support.

Specifications

- **Model Name:** LM-1
- **Item Weight:** 8.78 pounds (3.99 Kilograms)
- **Item Dimensions (LxWxH):** 16.14 x 12.4 x 7.28 inches
- **Dust Cup Capacity:** 1.5 Liters
- **Power Source:** Corded Electric
- **Batteries:** 1 Lithium Ion battery required (included for wireless clipper)
- **Material:** Plastic
- **Color:** Silver
- **Noise Level:** Below 60dB (approx. 55dB)
