5. MAINTENANCE

To ensure the longevity and optimal performance of your VEIKK Voila L tablet, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to gently wipe the tablet surface and stylus. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the device.
- **Storage:** When not in use, store the tablet and stylus in a clean, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Nib Replacement:** The stylus nibs will wear down over time. Use the included nib clip to carefully remove worn nibs and insert new ones. Replace nibs as needed to maintain drawing precision.
- **Cable Care:** Handle the USB-C cable gently. Avoid bending or twisting it sharply, which can damage the internal wires.

If you encounter issues with your VEIKK Voila L tablet, refer to the following common solutions:

- **Tablet Not Responding:**
 - Ensure the USB-C cable is securely connected to both the tablet and your computer/device.
 - Try connecting the tablet to a different USB port.

- Restart your computer and reconnect the tablet.

- **Stylus Not Working / No Pressure Sensitivity:**

- Verify that the VEIKK driver is correctly installed and running. Reinstall the driver if necessary.
- Check if the stylus nib is properly inserted. Replace the nib if it appears worn or damaged.
- Ensure no other tablet drivers (e.g., Wacom, Huion) are installed on your system, as they can conflict. Uninstall any conflicting drivers.
- Test the stylus in different drawing applications.

- **Hotkeys / Quick Dial Not Functioning:**

- Open the VEIKK driver software and check the hotkey/dial settings. Ensure they are assigned to desired functions.
- Confirm that the driver is active and not conflicting with other software.

- **Mac Compatibility Issues:**

- Some Mac users may experience driver instability. Ensure you have the latest driver from the VEIKK website.
- Check macOS Security & Privacy settings to ensure the VEIKK driver has necessary permissions (e.g., Accessibility, Input Monitoring).
- If using a Mac with an M-series chip, ensure the driver explicitly supports your architecture.
