1. **Prepare Components:** Unpack all components and verify against the parts list. Locate the hardware pack within the hidden compartment under the seat cushion.

2. **Attach Backrest to Seat:** Align the backrest cushion with the seat cushion. Secure them together using the provided screws. Ensure the Velcro flap on the underside of the backrest is open to access the screw holes.
3. **Install Adjustable Footpads:** Screw the adjustable footpads into the bottom of each leg of the wooden frame. These can be adjusted later to level the chair on uneven surfaces and protect your floor.
4. **Attach Armrest Frames:** Connect the left and right armrest frames to the assembled seat and backrest. Use the provided screws and washers. Ensure all connections are secure but do not overtighten until all pieces are aligned.
5. **Final Tightening and Plugs:** Once all components are in place and aligned, fully tighten all screws. Insert the wooden plugs into any visible screw holes on the outside of the wooden frame for a finished look.
