

Orbit 21008

Orbit B-hyve Gen 2 Wi-Fi Hub

USER MANUAL

Model: 21008 | Brand: Orbit

1. INTRODUCTION

The Orbit B-hyve Gen 2 Wi-Fi Hub (Model 21008) is designed to extend the functionality of your B-hyve Bluetooth devices by enabling Wi-Fi connectivity. This hub allows you to control and monitor your compatible B-hyve devices remotely through the B-hyve app, providing greater convenience and flexibility for your watering and smart home needs. It acts as a central bridge, connecting multiple B-hyve Bluetooth devices to your home Wi-Fi network.

2. SETUP

2.1. What's in the Box

- Orbit B-hyve Gen 2 Wi-Fi Hub
- Wall Adapter (integrated)

2.2. Installation

To install your B-hyve Gen 2 Wi-Fi Hub, simply plug it into a standard electrical outlet. Ensure the outlet is within range of your home's Wi-Fi network for optimal performance. The hub includes an integrated wall adapter for direct plug-in.

The Orbit B-hyve Gen 2 Wi-Fi Hub is a compact black device designed to plug directly into a standard electrical outlet. It features a yellow hexagonal logo with a 'b' inside and 'GEN 2' text at the top. A small green LED indicator light is visible when powered on, signifying connectivity. The device is shown plugged into a white wall outlet.

2.3. Initial Pairing

Once plugged in, the hub will power on. Follow the instructions within the B-hyve mobile application to pair the hub with your account and connect it to your Wi-Fi network. This process typically involves selecting the hub in the app and entering your Wi-Fi credentials. Ensure your mobile device is connected to the same Wi-Fi network you intend to connect the hub to during setup.

3. OPERATING

3.1. Connecting Devices

The B-hyve Gen 2 Wi-Fi Hub enables Wi-Fi features in select B-hyve Bluetooth devices. Once the hub is successfully connected to your Wi-Fi network, you can link multiple compatible B-hyve Bluetooth devices to this single hub. This eliminates the need for a separate hub for each device, streamlining your smart watering system.

3.2. Remote Control

With the hub connected, your B-hyve Bluetooth devices can now be controlled from anywhere with an internet connection via the B-hyve app. This allows for remote scheduling, manual watering, and monitoring of your irrigation system.

3.3. Compatible Devices

This hub works with B-hyve Bluetooth devices with the following model numbers: 24511, 24516, 24632, 24537, 24634, 54539, 71000, 71003, and 71005.

4. MAINTENANCE

The Orbit B-hyve Gen 2 Wi-Fi Hub requires minimal maintenance. Keep the device clean and free from dust. Ensure it is plugged into a dry indoor outlet and avoid exposing it to extreme temperatures or moisture, as this can affect its performance and lifespan.

5. TROUBLESHOOTING

5.1. Connectivity Issues

- **Hub not connecting to Wi-Fi:** Ensure the hub is within range of your Wi-Fi router. Try relocating the hub closer to the router or using a Wi-Fi extender. Verify your Wi-Fi password is correct in the B-hyve app.
- **Devices not connecting to hub:** Ensure your B-hyve Bluetooth devices are within range of the hub. The hub can be hundreds of feet away from your sprinkler time clocks, but obstructions can reduce range.
- **Intermittent connection:** Check for Wi-Fi interference from other electronic devices. Ensure your Wi-Fi network is stable.

5.2. Pairing Difficulties

If you experience difficulty pairing the hub or your devices, try the following:

- Restart the B-hyve app.
- Unplug the hub from the outlet, wait 10 seconds, and plug it back in.
- Ensure your mobile device's Bluetooth is enabled when initially pairing Bluetooth devices to the hub.

For persistent issues, refer to the B-hyve app's help section or the Orbit customer support website.

6. SPECIFICATIONS

Feature	Detail
---------	--------

Product Dimensions	3 x 2 x 4 inches (3"D x 2"W x 4"H)
Item Weight	2.89 ounces
Manufacturer	Orbit
ASIN	B0BHXCLDSP
